

Republic Of Kazakhstan Transition Of The State

Elena G. Popkova

Republic Of Kazakstan Transition Of The State:

Kazakhstan Sally N. Cummings, 2002-10-01 Kazakhstan is the largest state in Central Asia Rich in oil gas and other natural resources and sandwiched between China and Russia it occupies a key geopolitical position the importance of which was further heightened following the attacks of 9 11 and subsequent wars in the wider Middle East But Kazakhstan was born by default gaining independence only reluctantly as the Soviet Union collapsed Its political elite facing complex tasks of state building also lacked a monoethnic base on which to build its legitimacy Based on original material and extensive interviews in the capital and three of the country s regions the book places the elite in the country s broader institutional and historical context analysing their identity behaviour and how they gained and secured power in the early independence years Kazakhstan Power and the Elite is essential reading for all those interested in the history politics and international relations of this fascinating country Kazakhstan's Developmental Journey Anastasia Koulouri, Nikolai Mouraviev, 2020-09-17 This book discusses Kazakhstan s transitioning trajectory to a market economy since it declared its independence from the Soviet Union in 1991 It analyses the evolution of key policy areas and sectors through the lens of policy development and implementation and evaluates their suitability in pursuing the country s strategic objectives Topics include policy initiatives for economic development new policy paradigms in public service delivery and infrastructure improvement and water energy food WEF nexus thinking in governing the WEF sectors The book argues that policies developed in the 1990s and 2000s have so far served the nation s needs Nevertheless as Kazakhstan seeks to achieve a competitive edge worldwide many of these policies would require adjustment or a paradigm shift Providing a unique outlook on policy and governance this book will appeal to scholars students and practitioners involved with Kazakhstan and Central Asia and interested in the transformation of ex Soviet nations their policy and sustainable development *The Politics of Transition in Central Asia and the Caucasus* Amanda E Wooden, Christoph H. Stefes, 2009-06-08 Most books on the Caucasus and Central Asia are country by country studies This book on the other hand fills a gap in Central Eurasian studies as one of the few comparative case study books on Central Eurasia covering both the Caucasus and Central Asia it considers key themes right across the two regions highlighting both political change and continuity Comparative case study chapters written by regional experts from a variety of methodological backgrounds provide historical context and evaluate Soviet political legacies and emerging policy outcomes Key topics include the varied types and sources of authoritarianism political opposition and protest politics predetermined outcomes of post Soviet economic choices social and stability impacts of natural resource wealth variations in educational reform international norm influence on gender policy and the power of human rights activists Overall the book provides a thorough up to date overview of what is increasingly becoming a significant area of concern 1993 Patt Leonard, Rebecca Routh, 1996 Journal articles books book chapters book reviews dissertations and selected government publications on East Central Europe and the former Soviet Union published in the United States and Canada **The**

Creation of Kazakh National Identity Dmitry V. Shlapentokh, 2023-10-31 This monograph utilizes three theoretical models to explain Kazakhstan's emergence as an independent state and its changing relationships with the broader world particularly Russia since the beginning of the twentieth century The book first explores the construction of Kazakh national identity and the ways in which intellectuals appealed to history to substantiate their claims about Kazakhstan's future Secondly the narrative demonstrates that not all segments of totalitarian machinery work in unison While terror reached its peak in the 1930s cultural and ideological control was not as rigid as it would become in the late 1940s and early 1950s Most importantly the work is grounded in the study of the social universe The book introduces the notion of cosmos the peculiar connections between social economic and political forces While not necessarily directly dependent on each other they nevertheless created a unique interplay among the segments of societal structures and the state's relationship with the wider universe Taking this framework as the point of departure this research analyzes Kazakhstan's multi vectorism as uniquely fit to contemporary global arrangements when no global power dominates and the lines between friend and foe are blurred This compelling approach to Kazakhstan's history will appeal to postgraduate students and scholars in Russian history and world history

Cities and Local Governments in Central Asia Madina Junussova, 2020-02-28 This book presents the changing roles of urban governments and how local governments struggle to gain administrative fiscal and political power to combat current urban challenges in Kazakhstan Focusing on the cities and regions selected by the national government of Kazakhstan to be the drivers of national economic development the author analyses the impact of decentralization on the role of local governments The book examines the practical experiences of city and regional governments with an emphasis on urban planning public investment in national projects and management of urban transport Due to the complexity and irregular distribution of political reforms at different levels of local government in Kazakhstan three separate studies are presented each looking at a specific aspect of decentralization reform and local government function related to physical urban development and distribution of public investment The author argues that if the national government of Kazakhstan wants to concentrate economic resources in urban agglomerations it is not enough to assume that local governments are ready to play the role of efficient planners and managers of urban development A useful analysis illustrating cities and urban conglomerations as engines of growth in economic development this book will be of interest to academics studying Central Asian Studies in particular political and economic development Development Studies and Urban Studies The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Environment in Times of War Aldo Ferrari, Eleonora Tafuro Ambrosetti, 2022-07-27 The impact of Russia's war against Ukraine has been devastating both politically and environmentally On top of the environmental damage directly caused by military operations the invasion has put an abrupt end to the EU Russia green cooperation which had previously raised many hopes At the same time it has also shifted international attention

away from climate and environmental concerns which are particularly acute in the post Soviet region This Report analyses some of the main climate change and environmental issues in the post Soviet space providing an initial assessment of the invasion s impact The bulk of the latest scholarly and policy production on these matters focuses on Russia given the country s geopolitical and energy relevance However this analysis finds that environmental disasters such as the desertification of the Aral Sea transcend state borders and require a broader approach both from an analytic and policy standpoint

Technological Horizons of Decarbonization Based on Environmental Innovations Elena G. Popkova,2025-08-02 This book highlights the technological horizons of decarbonization in the digital economy based on environmental innovations It reveals the advantages of digital technologies and innovations for decarbonization and identifies the industry features of decarbonization based on digital technologies and innovations The book describes in detail and discusses the international experience of decarbonization of the economy with the use of digital technologies and innovations A set of authors recommendations has been developed to unlock the potential of decarbonization based on digital technologies and innovations Applied solutions for the use of digital technologies and innovations in the interests of decarbonization have also been proposed

CAREC Energy Outlook 2030 Asian Development Bank,2022-12-01 This report analyzes future energy market options for Central Asia Regional Economic Cooperation CAREC program members It aims to facilitate strategic decisions and sustainable investments in energy infrastructure by equipping investors and policy makers with crucial insights on regional trends It can help identify potential investment opportunities that will improve energy services and reduce carbon emissions across CAREC countries The report provides forecasts at both individual country and regional levels It includes energy supply and demand scenarios assessments of innovative technologies estimates of investment needs in the energy sector and possible trajectories for carbon emissions

Ideology, Political Transitions and the City Aleksandra Djurasovic,2016-06-10 Recent history has seen Bosnian and Herzegovinian BiH cities undergoing several transitions Their cities have developed under socialism 1945 1992 have suffered through the civil war during the 1990s and during the last twenty years have been undergoing a slow and multifaceted transition to an indeterminate end point Focusing on the post socialist postwar and neoliberal transitions experienced in BiH the book shows that planning systems deviated from control oriented and top down regulation to flexible approaches for more open for informal development The book analyzes several levels of planning related processes the former Yugoslavia BiH the city of Mostar and three urban zones the Industrial Zone Bi e Polje the City Zone Rondo and the Historic District and the Old Town Zone in order to offer insights into the new planning systems in the late phase of post socialist transition

Postcommunist Welfare States Linda J. Cook,2013-07-02 In the early 1990s the countries of the former Soviet Bloc faced an urgent need to reform the systems by which they delivered broad basic social welfare to their citizens Inherited systems were inefficient and financially unsustainable Linda J Cook here explores the politics and policy of social welfare from 1990 to 2004 in the Russian Federation Poland Hungary

Belarus and Kazakhstan Most of these countries she shows tried to institute reforms based on a liberal paradigm of reduced entitlements and subsidies means testing and privatization But these proposals provoked opposition from pro welfare interests and the politics of negotiating change varied substantially from one political arena to another In Russia for example liberalizing reform was blocked for a decade Only as Vladimir Putin rose to power did the country change its inherited welfare system Cook finds that the impact of economic pressures on welfare was strongly mediated by domestic political factors including the level of democratization and balance of pro and anti reform political forces Postcommunist welfare politics throughout Russia and Eastern Europe she shows are marked by the large role played by bureaucratic welfare stakeholders who were left over from the communist period and in weak states by the development of informal processes in social sectors

Landscape Dynamics of Drylands across Greater Central Asia: People, Societies and Ecosystems

Garik Gutman, Jiquan Chen, Geoffrey M. Henebry, Martin Kappas, 2020-04-14 This volume is a compilation of studies on interactions of changes in land cover land use and climate with people societies and ecosystems in drylands of Greater Central Asia It explores the effects of collapse of socialist governance and management systems on land use in various parts of Central Asia including former Soviet Union republics Mongolia and northern drylands of China Often regional land atmosphere feedbacks may have large global importance Remote sensing is a primary tool in studying vast dryland territories where in situ observations are sporadic State of the art methods of satellite remote sensing combined with GIS and models are used to tackle science questions and provide an outlook of current changes at land surface and potential scenarios for the future In 10 chapters contributing authors cover topics such as water resources effects of institutional changes on urban centers and agriculture landscape dynamics and the primary drivers of environmental changes in dryland environment Satellite observations that have accumulated during the last five decades provide a rich time series of the dynamic land surface enabling systematic analysis of changes in land cover and land use from space The book is a truly international effort by a team of scientists from the U S Europe and Central Asia It is directed at the broad science community including graduate students academics and other professionals at all levels within natural and social sciences In particular it will appeal to geographers environmental and social scientists economists agricultural scientists and remote sensing specialists

The Reform of Teacher Education in the Post-Soviet Space Ian Menter, 2024-08-06 This book draws on scholarly expertise across the former Soviet Union to provide a comparative analysis of the policies and practices that are discussed within the context of global reform of teacher education Divided into three parts chapters of this book discuss the context behind economic and political reform across the former Soviet Union and the resulting change that has occurred within teacher education systems within the 15 republics that now exist in this post Soviet space Offering a complex and nuanced account of vernacular globalisation the book discusses the significant contribution that teacher education can make to the process of nationbuilding In doing so this truly international volume offers fresh insights and original perspectives on this dynamic

educational landscape Being the first comprehensive account of reforms in all 15 nations that emerged in the post Soviet world this book will be of interest to students scholars and academics in the fields of teacher education international and comparative education and education policy and politics It should also be of relevance to teacher educators and policymakers around the world more broadly **The Platform Economy** Maxim I. Inozemtsev, Elina L. Sidorenko, Zarina I.

Khisamova, 2022-09-27 Digital ecosystems formed on the basis of digital platforms are significantly transforming modern reality Today it is difficult to imagine life without LinkedIn Facebook or Amazon The total income generated by them is estimated at trillions of dollars Digital platforms are the main driving force of the digital economy The impact and growth of digital platforms on social and economic processes today is difficult to overestimate The pandemic has further deepened their influence on society as almost all social communication and economic activity has moved to online format on digital platforms The growth of the share of digital platforms in various segments of the economy was so rapid that regulators around the world were not ready for such large scale transformations All this has caused a number of crisis phenomena when IT giants have grown into an independent branch of power which has direct access to the personal and financial data of millions of citizens and moreover have the opportunity to directly influence them This monograph is a unique publication in which for the first time a large scale and sufficiently deep team of experts and scientists from various countries of the world studied in detail the multidimensional phenomenon of the platform economy and the measures taken by states to regulate these processes The book will be interesting to a wide range of readers interested in the problems of the development of digital platforms and the developing branch of law and science the law of digital platforms Global Agendas and Education

Reforms Birol Akgün, Yusuf Alpaydın, 2024-07-25 This open access book examines the effects of global education agendas such as digitalization innovation and entrepreneurship education in emergencies globalization internationalization diversity and sustainability on education reforms in several countries and regions It explores how increasing international interaction and communication tools bring along a more intense convergence in national education policies It emphasizes that in today's world education politicians and experts in different parts of the world follow the global agenda more effectively and increase reform initiatives Hence in order to understand national education policies more deeply it is important to pay attention to their global context It explains that education reforms in countries are heavily influenced by both national and global agendas Chapters in this book analyze the reflections of these global agendas on educational reforms of the country countries chosen to focus on Chapter authors draw attention to the impacts of reforms on several aspects of education like pedagogy curriculum teacher training and educational administration **Higher Education and the COVID-19**

Pandemic, 2022-06-13 COVID 19 caused massive disruptions in the higher education sector across the world The transition to online learning exposed the deep rooted inequalities between countries systems institutions and student groups in terms of the availability of information technology infrastructure internet access and digital literacy as well as prior training and

experiences of faculty in online education This volume explores various aspects of the impact of the pandemic on higher education management including how university administration responded to the crisis and the role of local and national government agencies in academic support and higher education delivery The key findings highlight the importance of better organisation and preparedness of higher education systems for future crises and the need for a better dialogue between governments higher education institutions and other stakeholders The book calls for a collective response to address the digital divide among various groups and financial inequalities within and between the private and public universities and to plan for the serious challenges that international students face during crisis situations
