## Rereading Capital:

Rereading Capital Ben Fine, Laurence Harris, 1979      **Understanding Capital** Duncan K. FOLEY, Duncan K. Foley, 2009-06-30 Understanding Capital is a brilliantly lucid introduction to Marxist economic theory Duncan Foley builds an understanding of the theory systematically from first principles through the definition of central concepts to the development of important applications      **Essays on Marx's Capital** Geert Reuten, 2024-05-13 In this book Geert Reuten presents 21 of his previously published essays on the three volumes Marx's Capital dating from 1991-2019 The essays largely take the form of a summary of Marx's text a Volume or its Parts or Chapters followed by an appreciation and when required a reconstruction The book thus offers an overview of each of the three volumes of Capital including their interconnection as well as a focus on specific Parts of Capital Throughout the general overviews and more focused analyses Reuten emphasises Marx's systematic dialectical method and his monetary value form analysis      **Lively Capital** Kaushik Sunder Rajan, 2012-04-02 This collection of anthropology of science essays explores the new forms of capital markets ethical legal and intellectual property concerns associated with new forms of research in the life sciences      Is There a Future for Marxism? Alex Callinicos, 1982-02-01      **The Value Dimension (Routledge Revivals)** Ben Fine, 2013-05-02 The essays in this edited collection first published in 1986 focus on important debates surrounding the central Marxian problem of the transformation of values into prices The collection brings together major contributions on the value theory debate from the decade prior to the book's publication and assesses the debate's significance for wider issues Value theory emerges as much more than a technical relation between labour time and prices and the structure of the capitalist economy is scrutinised This is a relevant and comprehensive work valuable to students academics and professionals with an interest in political and Marxist economy      **The Palgrave Handbook of Critical International Political Economy** Alan Cafruny, Leila Simona Talani, Gonzalo Pozo Martin, 2016-07-05 Challenging the assumptions of mainstream International Political Economy IPE this Handbook demonstrates the considerable value of critical theory to the discipline through a series of cutting edge studies The field of IPE has always had an inbuilt vocation within Historical Materialism with an explicit ambition to make sense from a critical standpoint of the capitalist mode of production as a world system of sometimes paradoxically and sometimes smoothly overlapping states and markets Having spearheaded the growth of a vigorous critical scholarship in the 1960s and 1970s however Marxism and neo Gramscian approaches became increasingly marginalized over the course of the 1980s The authors respond to the exposure of limits to mainstream contemporary scholarship in the wake of the onset of the Global Financial Crisis and provide a comprehensive overview of the field of Critical International Political Economy Problematising socioeconomic and political structures and considering these as potentially transitory and subject to change the contributors aim not simply to understand a world of conflict but furthermore to uncover the ways in which purportedly objective analyses reflect the interests of those in positions of privilege and power      **Marxist Thought on Imperialism** Charles A.

Barone, 2016-07-08 First Published in 2015 Classic and contemporary Marxist theoretical works on imperialism are systematically summarized and critiqued in this useful survey Throughout the discussion attention is focused analyses of the causes of capitalist foreign economic expansion and the impact of that expansion The study begins with a discussion of Marx's political economy and the work of early theorists of imperialism Vladimir Lenin Rosa Luxemburg Nikolai Bukharin and Rudolf Hilferding This analysis then serves as the basis for a critical survey of the major strands of postwar Marxist thought including the work of Paul Baran and Paul Sweezy Harry Magdoff James O'Connor Andre Gunder Frank and more Following the survey are extended critiques of Baran and Sweezy's theory of monopoly capitalism and Arghiri Emmanuel's theory of unequal exchange

**The Elgar Companion to Marxist Economics** Ben Fine, Alfredo Saad-Filho, Marco Boffo, 2012-01-01 This Companion takes stock of the trajectory achievements shortcomings and prospects of Marxist political economy It reflects the contributors' shared commitment to bringing the methods theories and concepts of Marx himself to bear across a wide range of topics and perspectives and it provides a testimony to the continuing purpose and vitality of Marxist political economy As a whole this volume analyzes Marxist political economy in three areas the critique of mainstream economics in all of its versions the critical presence of Marxist political economy within and its influence upon each of the social science disciplines and cutting across these the analysis of specific topics that straddle disciplinary boundaries Some of the contributions offer an exposition of basic concepts accessible to the general reader laying out Marx's own contribution its significance and subsequent positions and debates with and within Marxist political economy The authors offer assessments of historical developments to and within capitalism and of its current character and prospects Other chapters adopt a mirror image approach of pinpointing the conditions of contemporary capitalism as a way of interrogating the continuing salience of Marxist analysis This volume will inform and inspire a new generation of students and scholars to become familiar with Marxist political economy from an enlightened and unprejudiced position and to use their knowledge as both a resource and gateway to future study

**Money and Totality** Fred Moseley, 2015-09-29 This ambitious book presents a comprehensive new macro-monetary interpretation of Marx's logical method in Capital based on substantial textual evidence which emphasises two main points 1 Marx's theory is primarily a macroeconomic theory of the total surplus value produced in the economy as a whole and 2 Marx's theory is a monetary theory from beginning to end and the circuit of money capital  $M-C-M'$  is the logical framework of Marx's theory It follows from this macro-monetary interpretation that contrary to the prevailing view there is no transformation problem in Marx's theory i.e. Marx did not fail to transform the inputs of constant capital and variable capital in his theory of prices of production in Part 2 of Volume III

*Re-Reading Education Policies*, 2009-01-01 This book collects studies with a critical education policy orientation and presents itself as a handbook of matters of public concern The term critical does not refer to the adoption of a particular theoretical framework or methodology but rather it refers to a very specific ethos or way of relating to the present and the belief that the future should not be the repetition of the past This implies a concern about what is happening in our societies today and what could or should be happening in the future As a consequence the contributors to the book rely on a general notion of public policy that takes on board processes practices and discourses at a variety of levels in diverse governmental and non governmental contexts and considers the relation of policy to power to politics and to social regulation Following the detailed introduction that aims at picturing the landscape of studies with a critical education policy orientation the book presents re readings of six policy challenges globalization knowledge society lifelong learning equality democracy social inclusion accountability control efficiency and teacher professionalism It seeks to contextualise these in relation to issues of current global concern at the start of the 21st century Despite the diversity of approaches this collection of critical education policy studies shares a concern with what could be called the public and its education and represents a snapshot of education policy research at a particular time

**A Japanese Reconstruction Of Marxist Theory** Robert Albritton, 1986-04-02 *The Falling Rate of Profit in the Postwar United States Economy* Fred Moseley, 1991-06-18 Presents an empirical test of Marx's theory of the falling rate of profit by deriving estimates of the Marxian rate of profit and its determinants for the post World War II US economy in order to determine whether the trends in these variables were in the directions predicted by Marx's theory

**Capitalism Versus Anti-Capitalism** Paul Fabra, 1993-01-01 Fabra's central thesis is that economics will not get out of the blind alley in which it has led itself and everyone else until it undertakes an epistemological inquiry into the sources of its biases This book is concerned then with the most general structural problems that confront the economist Covering every major theme of modern economics from the labor market to the gold standard Fabra

aims to show that the classical theories of Ricardo prevail over the more recent doctrines of both Marx and Keynes. He turns every major premise of economics on its head starting with the reality of money and ending with the abolition of wage labor as a triumph of capitalism and market forces.

**Marx's Inferno** William Clare Roberts, 2018-03-13 Marx's Inferno reconstructs the major arguments of Karl Marx's Capital and inaugurates a completely new reading of a seminal classic. Rather than simply a critique of classical political economy, William Roberts argues that Capital was primarily a careful engagement with the motives and aims of the workers' movement. Understood in this light, Capital emerges as a profound work of political theory. Placing Marx against the background of nineteenth-century socialism, Roberts shows how Capital was ingeniously modeled on Dante's Inferno and how Marx, playing the role of Virgil for the proletariat, introduced partisans of workers' emancipation to the secret depths of the modern social Hell. In this manner, Marx revised republican ideas of freedom in response to the rise of capitalism. Combining research on Marx's interlocutors, textual scholarship, and forays into recent debates, Roberts traces the continuities linking Marx's theory of capitalism to the tradition of republican political thought. He immerses the reader in socialist debates about the nature of commerce, the experience of labor, the power of bosses and managers, and the possibilities of political organization. Roberts rescues those debates from the past and shows how they speak to ever-renewed concerns about political life in today's world.

**The Hegel-Marx Connection** T. Burns, I. Fraser, 2000-07-19 A major and timely re-examination of key areas in the social and political thought of Hegel and Marx. The editors' extensive introduction surveys the development of the connection from the Young Hegelians through the main Marxist thinkers to contemporary debates. Leading scholars, including Terrell Carver, Chris Arthur, and Gary Browning, debate themes such as the nature of the connection itself, scientific method, political economy, the Hegelian basis to Marx's Doctoral Dissertation, human needs, history, and international relations.

Value and the World Economy Today R. Westra, A. Zuege, 2003-11-30 Value and the World Economy Today brings together a diverse group of globally renowned scholars of international political economy and critical economics to examine the relevance of value theory for understanding the world economy today. The book is unique in the way that it connects literatures that have for the most part developed in isolation from each other and therefore brings questions of theory to bear directly upon the problems of analyzing current global trends and formulating responses to them.

Historical Dictionary of Marxism Elliott Johnson, David Walker, Daniel Gray, 2014-09-09 The second edition of the Historical Dictionary of Marxism covers the basics of Karl Marx's thought, the philosophical contributions of later Marxist theorists, and the extensive real-world political organizations and structures his work inspired: that is, the myriad political parties, organizations, countries, and leaders who subscribed to Marxism as a creed. This text includes a chronology, an introductory essay, and an extensive bibliography. The dictionary section has over 500 cross-referenced entries on important personalities, both thinkers and doers, political parties and movements, and major communist or ex-communist countries. This book is an excellent access point for students, researchers, and anyone wanting to
