and human factors to apply to various sectors of the industry including subsea and refineries      **Adoption in the Digital Age** Julie Samuels, 2018-02-13 *Adoption in the Digital Age* explores the transformation of adoption due to social and digital media technologies. The most prolific of these changes can be seen within contact arrangements particularly those that are not managed by an intermediary between adopted minors and their biological kin. Within this shift it becomes clear that this often breached contact arrangement lends itself towards discussions about further openness within adoption. At the same time these technologies continue to document the way adopted individuals and their biological kin feel about themselves and each other. It is for these reasons that the Internet remains both a promise and threat. Samuels explores this in detail highlighting that what it means to be adopted continues to evolve in the context of networked media cultures. Combining both theoretical discussions with the human experience of adoption. *Adoption in the Digital Age* will be of interest to students and scholars across a range of disciplines including sociology, social work and cultural studies as well as practitioners working with adoptive families and other members of the adoption triad connected and disconnected by adoption      **Supreme Court Reporter**, 1906      **The Occupied Clinic** Saiba Varma, 2020-09-21 *In The Occupied Clinic* Saiba Varma explores the psychological, ontological and political entanglements between medicine and violence in Indian controlled Kashmir, the world's most densely militarized place. Into a long history of occupations, insurgencies, suppressions, natural disasters and a crisis of public health infrastructure come interventions in human distress, especially those of doctors and humanitarians who struggle against an epidemic. More than sixty percent of the civilian population suffers from depression, anxiety, PTSD or acute stress. Drawing on encounters between medical providers and patients in an array of settings, Varma reveals how colonization is embodied and how overlapping state practices of care and violence create disorienting worlds for doctors and patients alike. Varma shows how occupation creates worlds of disrupted meaning in which clinical life is connected to political disorder, subverting biomedical neutrality, ethics and processes of care in profound ways. By highlighting the imbrications between humanitarianism and militarism and between care and violence, Varma theorizes care not as a redemptive practice but as a fraught sphere of action that is never quite what it seems      Federal Register, 1989-04-21      *The Federal Cases*, 1894
