Heppenheimer,2014-09-30 Basing his work on virtually untapped NASA archives T A Heppenheimer has produced the second volume of his definitive history of the space shuttle Volume Two traces the development of the shuttle through a decade of engineering setbacks and breakthroughs program management challenges and political strategizing culminating in the first launch in April 1981 The focus is on the engineering challenges propulsion thermal protection electronics onboard systems and the author covers in depth the alternative vehicles developed by the U S Air Force and European countries The first launch entailed a monumental amount of planning and preparation that Heppenheimer explains in detail      **Federal Register** ,2002-05-03      **Communication Practices in Engineering, Manufacturing, and Research for Food and Water Safety** David Wright,2015-09-08 This book demonstrates some of the ways in which communication and developing technologies can improve global food and water safety by providing a historical background on outbreaks and public resistance as well as generating interest in youth and potential professionals in the field History of muckraking in the food industry Case study on groundwater regulation Interviews with members of the beef industry and livestock market owners      **American Geographical Society Research Series** American Geographical Society of New York,1922      **Research in History and Philosophy of Mathematics** Maria Zack,Elaine Landry,2016-12-15 This volume contains seventeen papers that were presented at the 2015 Annual Meeting of the Canadian Society for History and Philosophy of Mathematics La Soci t  Canadienne d'Histoire et de Philosophie des Math matiques held in Washington D C In addition to showcasing rigorously reviewed modern scholarship on an interesting variety of general topics in the history and philosophy of mathematics this meeting also honored the memories of Jacqueline Jackie Stedall and Ivor Grattan Guinness celebrated the Centennial of the Mathematical Association of America and considered the importance of mathematical communities in a special session These themes and many others are explored in these collected papers which cover subjects such as New evidence that the Latin translation of Euclid's Elements was based on the Arabic version attributed to al ajj j Work done on the arc rampant in the seventeenth century The history of numerical methods for finding roots of nonlinear equations An original play featuring a dialogue between George Boole and Augustus De Morgan that explores the relationship between them Key issues in the digital preservation of mathematical material for future generations A look at the first twenty five years of The American Mathematical Monthly in the context of the evolving American mathematical community The growth of Math Circles and the unique ways they are being implemented in the United States Written by leading scholars in the field these papers will be accessible to not only mathematicians and students of the history and philosophy of mathematics but also anyone with a general interest in mathematics      Multidisciplinary Research Area in Arts, Science & Commerce (Volume-4) ,2025-07-18      The Sleep of Others and the Transformation of Sleep Research

Kenton Kroker,2007-12-15 We tend to think of sleep as a private concern a night time retreat from the physical world into the realm of the subconscious Yet sleep also has a public side it has been the focal point of religious ritual philosophic speculation political debate psychological research and more recently neuroscientific investigation and medical practice In this first ever history of sleep research Kenton Kroker draws on a wide range of material to present the story of how an investigative field at one time dominated by the study of dreams slowly morphed into a laboratory based discipline The result of this transformation Kroker argues has changed the very meaning of sleep from its earlier conception to an issue for public health and biomedical intervention Examining a vast historical period of 2500 years Kroker separates the problems associated with the history of dreaming from those associated with sleep itself and charts sleep related diseases such as narcolepsy insomnia and sleep apnea He describes the discovery of rapid eye movement REM during the 1950s and shows how this discovery initiated the creation of dream laboratories that later emerged as centres for sleep research during the 1960s and 1970s Kroker s work is unique in subject and scope and will be enormously useful for both sleep researchers medical historians and anybody who s ever lost a night s sleep
