Prospects for Saline Agriculture R. Ahmad, K.A. Malik, 2013-11-09. Saline land is a resource capable of significant production. Recent advances in research in breeding for salt tolerance in wheat, biotechnology in rice, and selection and rehabilitation of salt-tolerant plants are of economic importance in arid saline conditions. This book gives some practical approaches for saline agriculture and afforestation and describes examples of cultivating salt-tolerant halophytic plants for commercial interest on salt-affected land or with highly salinized water in Australia, China, Central Asia, Egypt, Pakistan, and Russia. It also explores the possibilities of arid saline agriculture and afforestation in UAE.
