Research Ethics A Psychological Approach:

Research Ethics Barbara Stanley, Joan E. Sieber, Gary B. Melton, 1996-01-01 Although psychologists have been relatively reticent in approaching ethical issues as a research topic some have begun to use psychological principles theories and studies to understand and solve ethical dilemmas in their research This book examines relations between ethics and psychology the contributions that psychology can make to ethical studies and standards in all areas of human empirical science and the specific ethics of psychological research The eleven contributors describe the kinds of ethical problems that arise in psychological research review current literature with a focus on empirical studies of ethical issues in human research and identify the theoretical and methodological tools they use to understand the ethical problems arising in their work This book addresses important issues such as the definitions of normative and deviant groups the discovery and neutralization of bias sensitivity to the interests of experimental subjects and the counterweighing factors in rules regulations and enforcement Barbara H Stanley is a professor of psychology at City University of New York John Jay College and a lecturer in the Department of Psychiatry at Columbia University Joan E Sieber is a professor of psychology at California State University Hayward They are the coeditors of Social Research on Children and Adolescents Ethical Issues Gary B Melton is a professor of neuropsychiatry law pediatrics and psychology and director of the Institute for Families in Society at the University of South Carolina He is the editor of Adolescent Abortion Psychological and Legal Issues Nebraska 1986 Research Ethics Ana Smith Iltis, 2006-01-16 Medicine in the twenty first century is increasingly reliant on research to guarantee the safety and efficacy of medical interventions As a result the need to understand the ethical issues that research generates is becoming essential This volume introduces the principal areas of concern in research on human subjects offering a framework for understanding research ethics and the relationship between ethics and compliance Research Ethics brings together leading scholars in bioethics and the topics covered include the unique concerns that arise in specific areas of research such as gene therapy and stem cell research Individual chapters also address the ethical issues that occur when conducting research with specific populations such as infants or adolescents and the volume looks at important emerging questions in human subjects research namely financial conflicts of interest and the interpretation of scientific data The Handbook of Social Research Ethics Donna M. Mertens, Pauline E. Ginsberg, 2009 Brings together international scholars across the social and behavioural sciences and education to address those ethical issues that arise in the theory and practice of research within the technologically advancing and culturally complex world in which we live Conducting Research in Developmental Psychology Nancy Jones, Melannie Platt, Krystal D. Mize, Jillian Hardin, 2019-11-25 This comprehensive guide offers a rich introduction to research methods experimental design and data analysis techniques in developmental science emphasizing the importance of an understanding of this area of psychology for any student or researcher interested in examining development across the lifespan The expert contributors enhance the reader s knowledge base understanding of

methods and critical thinking skills in their area of study They cover development from the prenatal period to adolescence and old age and explore key topics including the history of developmental research ethics animal models physiological measures eye tracking and computational and robotics models They accessibly explore research measures and design in topics including gender identity development the influence of neighborhoods mother infant attachment relationships peer relationships in childhood prosocial and moral development patterns developmental psychopathology and social policy and the examination of memory across the lifespan Each chapter ends with a summary of innovations in the field over the last ten years giving students and interested researchers a thorough overview of the field and an idea of what more is to come

Conducting Research in Developmental Psychology is essential reading for upper level undergraduate or graduate students seeking to understand a new area of developmental science developmental psychology and human development It will also be of interest to junior researchers who would like to enhance their knowledge base in a particular area of developmental science human development education biomedical science or nursing

Understanding Extreme Sports: A Psychological

Perspective Eric Brymer, Francesco Feletti, Erik Monasterio, Robert D. Schweitzer, 2020-03-30 Extreme sports those activities that lie on the outermost edges of independent adventurous leisure activities where a mismanaged mistake or accident would most likely result in death have developed into a significant worldwide phenomenon Brymer Patterson 2002 and Generation Z turn to extreme sports because they are popular and linked to escapism Giannoulakis Pursglove 2017 Arguably extreme sports now support a multi billion dollar industry and the momentum seems to be intensifying Traditional explanations for why extreme sports have become so popular are varied For some the popularity is explained as the desire to rebel against a society that is becoming too risk averse for others it is about the spectacle and the merchandise that is associated with organised activities and athletes For others it is just that there are a lot of people attracted by risk and danger or just want to show off For others still it is about the desire to belong to sub cultures and the glamour that goes with extreme sports Some seek mastery in their chosen activity and in situations of significant challenges This confusion is unfortunate as despite their popularity there is still a negative perception about extreme sports participation There is a pressing need for clarity The dominant research perspective has focused on positivist theory driven perspectives that attempt to match extreme sports against predetermined characteristics For the most part empirical research has conformed to predetermined societal perspectives Other ways of knowing might reveal more nuanced perspectives of the human dimension of extreme sport participation This special edition brings together cutting edge research and thought examining psychology and extreme sports with particular attention payed to the examination of motivations for initial participation continued participation effective performance and outcomes from participation References Brymer E Schweitzer R 2017a Phenomenology and the extreme sports experience NY Routledge Brymer E Schweitzer R D 2017b Evoking the Ineffable The phenomenology of extreme sports Psychology of Consciousness Theory Research and Practice 4 1 63 74 Giannoulakis C Pursglove L K 2017
