Department of Health and Human Services,1998 This Surgeon General s report on tobacco use summarizes current information on risk factors and patterns related to tobacco use among members of four major racial and ethnic minority groups in the United States African Americans American Indians and Alaska Natives Asian Americans and Pacific Islanders and Hispanics In addition this report presents information on national and regional efforts to curtail consumption of tobacco products among members of these four groups Previous Surgeon General s reports on smoking and health have briefly summarized findings related to one or more of the racial ethnic groups covered in this report but this is the first Surgeon

General's report to concentrate specifically on the four major racial/ethnic groups in the United States. Several factors prompted the development of this report. First, the information in this report has never before been compiled in one source. Consequently, policymakers, community leaders, researchers, and public health workers have had difficulty determining the extent of the problem, identifying gaps in information regarding tobacco use among members of the four groups, or being aware of existing tobacco control programs that have demonstrated effectiveness. Thus, incorporating such information into the design and implementation of culturally appropriate services has been difficult. Second, the four racial/ethnic groups currently constitute about one-fourth of the population of this country, and the Bureau of the Census projects that by 2050 the non-Hispanic white population in the United States will total only 53 percent. Day 1996. Preventing health problems related to tobacco use among the individuals in racial and ethnic groups will be integral to achieving U.S. public health objectives such as those proposed in Healthy People 2000. National Health Promotion and Disease Prevention Objectives. U.S. Department of Health and Human Services (USDHHS). 1991-1995. National Center for Health Statistics (NCHS). 1994. This report contributes essential knowledge that must be incorporated into efforts to accomplish the Healthy People 2000 objectives.

Child and Adolescent Drug and Substance Abuse Louis A. Pagliaro, Ann Marie Pagliaro, 2019-11-01. By offering unique analysis and synthesis of theory, empirical research, and clinical guidance in an up-to-date and unbiased context, this book assists health and social care professionals in understanding the use of drugs and substances of abuse by children and adolescents. A comprehensive reference for health and social care professionals, the book identifies and corrects related false narratives and, with the use of the authors' combined experience of over 70 years of clinical and academic experience in drug and substance abuse, provides current pharmacotherapeutic and psychotherapeutic approaches for the treatment of alcohol or other dependence or use disorders among children and adolescents. The book also provides a useful reference for identifying brand, trade, and street names of the drugs and substances of abuse commonly used by children and adolescents. Also included is a comprehensive cross-referenced subject index. Clear, comprehensive, accessible, and fully referenced, this book will be an invaluable resource for professionals and students who aim to treat children and adolescents. Child and Adolescent Drug and Substance Abuse is the 19th clinical pharmacology and therapeutic text that the Pagliaros have written over the past 40 years and is the sixth that deals exclusively with drug and substance abuse. Current Perspectives on Substance Use Disorders in South Asia S. M. Yasir Arafat, Sujita Kumar Kar, 2024-11-25. This book is about public mental health needs and aspects of substance use disorders in South Asian countries. South Asia consists of eight countries with low and middle income backgrounds. The people of this region, with a combined population of around 2 billion, share common cultures, beliefs, and behavioral patterns regarding physical and mental health. Among them, more than 66 million people use different forms of substances, including cannabis, opium, and opiates, amphetamine, and prescription drugs. Substance abuse brings deadly consequences. It affects almost all spheres of life, i.e., personal, social, recreational, criminal, and family aspects.

both physical and mental health and economy of the society as well as the country Advanced management and holistic prevention are public health priorities However very little attention has been paid to the issues as a region as well as in countries like Afghanistan Bangladesh and Pakistan Hence the editors of this book aimed to publish a book that discusses the public mental health and healthcare issues related to substance use disorder in a densely populated low and middle income setting
