*The Wintu & Their Neighbors* Christopher K. Chase-Dunn, Kelly Marie Mann, 1998-10 On the cutting edge of world systems theory comes *The Wintu and Their Neighbors* the first case study to compare and contrast systematically an indigenous Native American society with the modern world at large Using an interdisciplinary approach that combines sociology anthropology political science geography and history Christopher Chase Dunn and Kelly M Mann have scoured the archaeological record of the Wintu an aboriginal people without agriculture metallurgy or class structure who lived in the wooded valleys and hills of northern California By studying the household composition kinship and trade relations of the Wintu they call into question some of the basic assumptions of prior sociological theory and analysis Chase Dunn and Mann argue that Immanuel Wallerstein's world systems perspective originally applied only to the study of modern capitalistic societies can also be applied to the study of the social economic and political relationships in small stateless societies They contend that despite the fact that the Wintu appear on the surface to have been a household based society this indigenous group was in fact involved in a myriad of networks of interaction which resulted in intermarriage and which extended for many miles around the region These networks which were not based on the economic dominance of one society over another a concept fundamental to Wallerstein's world systems theory led to the eventual expansion of the Wintu as a cultural group Thus despite the fact that the Wintu did not behave like a modern society lacking wealth accumulation class distinctions and cultural dominance Chase Dunn and Mann insist that the Wintu were

involved in a world system and argue therefore that the concept of the minisystem should be discarded They urge other scholars to employ this comparative world systems perspective in their research on stateless societies      **The Maya World** Scott R.
