Research In Law And Economics Vol 17 Research In Law And Economics:

Research in Law and Economics Richard O. Zerbe, Richard O. Zerbe, Jr., 1995 Part of a series focusing on research into law and economics this volume discusses a variety of topics in the field *The Triumph of Ethernet* Urs von Burg, 2001 One of the most important elements in the computer revolution has been agreement on technological standards This book tells the complete story of the battle between several competing technologies in the late 1970s and early 1980s to become the compatibility standard in one high tech arena the LAN local area network industry Cliometrics as Economics Imperialism: Across the Watershed Benjamin Fine, 2023-11-27 In Cliometrics as Economics Imperialism Ben Fine traces the cliometric revolution from before its emergence through three phases of the new the newer and the newest economic history These phases are shown to correspond to those of economics imperialism the colonisation of topics and fields by mainstream economics moving successively through as if there were perfectly working markets as if imperfectly working markets and these combined plus arbitrary inclusion of other variables The text draws upon case studies for example of the putative eighteenth century consumer revolution Douglass North path dependence and the British coal industry and through exposing the reduction of economic theory and economic history deployed within them and giving rise to a corresponding reduction in the presence of the social the historical and political economy **40 Years of Research on Rent Seeking 2** Roger D. Congleton, Arye L. Hillman, Kai A. Konrad, 2008-08-01 The last survey of the rent seeking literature took place more than a decade ago Since that time a great deal of new research has been published in a wide variety of journals covering a wide variety of topics The scope of that research is such that very few researchers will be familiar with more than a small part of contemporary research and very few libraries will be able to provide access to the full breadth of that research This two volume collection provides an extensive overview of 40 years of rent seeking research The volumes include the foundational papers many of which have not been in print for two decades They include recent game theoretic analyses of rent seeking contests and also applications of the rent seeking concepts and methodology to economic regulation international trade policy economic history political competition and other social phenomena The new collection is more than twice as large as any previous collection and both updates and extends the earlier surveys Volume I contains previously published research on the theory of rent seeking contests which is an important strand of contemporary game theory Volume II contains previously published research that uses the theory of rent seeking to analyze a broad range of public policy and social science topics The editors spent more than a year assembling possible papers and although the selections fill two large volumes many more papers could have been included **Invisible Hands, Russian Experience, and Social Science** Stefan Hedlund, 2011-06-20 This book investigates cases in which national and international activities have gone massively wrong entailing seriously negative consequences and in which the sophisticated analytical models of social science have ceased to be helpful Illustrations range from the global financial crisis to the failure to achieve speedy systemic change in the former

Soviet Union and the failure to achieve development in the Third World The analysis uses as a backdrop long term Russian history and short term Russian encounters with unrestrained capitalism to develop a framework that is based in the so called new institutionalism Understanding the causes of systemic failure is shown to require an approach that spans across the increasingly specialized subdisciplines of modern social science Demonstrating that increasing theoretical sophistication has been bought at the price of a loss of perspective and the need for sensitivity to the role of cultural and historical specificity the book pleads the case for a new departure in seeking to model the motives for human action

ITF Research Reports Liberalisation of Air Transport International Transport Forum,2019-05-03 Aviation is one of the most regulated industries in the world Much of this regulation is safety related to mitigate the inherent risks tied with air transport But aviation is also subject to economic regulation that influences which airline flies which route at which frequency capacity and price It even stipulates the nationality of its owners and decision makers Aviation has freed itself from some restrictions over the past three decades with many benefits to society Yet liberalisation has also raised issues with regard to maintaining fair competition high labour standards and mitigating aviation s growing environmental impact

Knowledge Capital and the "New Economy" Pontus Braunerhjelm,2012-12-06 According to its proponents the new economy is associated with sustainable growth increased demand for labor and zero inflation On the micro level this bright avenue into the future is propelled by knowledge capital flexibility and new ways of organizing production such as clusters and networks Progress in information technology together with massive deregulation on the national and the international levels have been credited with setting this development into motion The concept of the new economy has been rapidly embraced by politicians as it seems to offer a way out of the traditional trade off between unemployment and wage inflation However empirical evidence regarding the microeconomic mechanisms of the new economy is scarce Knowledge Capital and the New Economy Firm Size Performance and Network Production intends to narrow this gap by empirically analyzing the composition of knowledge capital and how knowledge capital is distributed across firms of different size Moreover the impact of knowledge capital on firms profitability and international competitiveness is also examined Finally we compare cluster dynamics and the institutional set up in Europe and the U S with the purpose of identifying regulations that seem to hinder a conducive environment for expanding and dynamic European clusters The results of this study emphasize the role of knowledge capital and flexibility Thus irrespective of how sustainable the new economy turns out to be the policy implications in terms of providing institutions that facilitate knowledge enhancing economic activities flexible markets and transparent incentive structures are undeniable Countries that fail in this respect may find themselves trailing in the international growth and welfare rankings
