*Monthly Catalog of United States Government Publications*, 1998      A Global Perspective on Real Estate Cycles Stephen J. Brown, Crocker H. Liu, 2012-12-06 In March 1999 New York University Salomon Center in association with the Department of Finance at NYU Stern held a one day conference on the impact of real estate cycles on the real estate industry both from a domestic as well as an international perspective The conference featured the leading research on this topic in the United States Europe and Asia Currently the real estate industry is at a critical point New development projects around the world are being put on hold given recent developments in the international capital markets The industry is hard hit by the decline in real estate investment trust REIT share prices and a shrinking pool of capital for real estate ventures This has unfortunately coincided with serious financial problems of very large hedge funds and other institutional investors in the market for commercial mortgage backed securities There is need for new insights into the implications of U S and global real estate cycles on real estate securities including REITs and mortgage backed securities as well as direct real estate investment This global orientation is important given the high mobility of capital into the real estate the increasing integration of real estate markets and the proposed expansion of real estate investment trusts REIT into international real estate The process of globalization has resulted in increased competition between cities for the attraction of investment

rarely been the focus of systematic research and informed practice In Street Commerce Andres Sevtsuk presents a comprehensive analysis of the issues involved in implementing successful street commerce Drawing on economic theory urban design principles regulatory policies and merchant organization models he conceptualizes key problems and offers innovative solutions He provides a range of examples from around the world to detail how different cities and communities have bolstered and reinvigorated their street commerce According to Sevtsuk successful street commerce can only be achieved when the private sector urban policy makers planners and the public are equipped with the relevant knowledge and tools to plan and regulate it

**Mortgage Revenue Bonds** D. Durning,2012-12-06 This book brings together much of the best policy oriented research on state and local mortgage revenue bond MRB programs Most of this re search was conducted to evaluate the impact of MRB subsidies on housing markets and potential home buyers All of the research is concerned with the so what question often ignored by economists it addresses the implications of the research results for public policy decisions concerning MRBs The need for this book becomes apparent when reading the transcripts of congressional hearings

on MRBs At those hearings the policy debate seems underinformed Aside from discussions of the General Accounting Office s periodic evaluations of MRB programs and impassioned rebuttals by MRB proponents the hearing testimony consists mostly of assertions and anecdotal evidence with some yes MRBs work and no they don t exchanges Although the research in this book may not improve the level of the policy debate on MRBs it can inform decision makers experts and citizens interested in housing policy about issues that should be examined when considering the future of MRBs Also it can point other researchers interested in housing policy in the direction of the questions about MRB programs that need additional attention     Monthly Checklist of State Publications Library of Congress.
