Research In Sociology Of Knowledge Sciences And Art Volume :

Research in Sociology of Knowledge, Sciences and Art, 1978 **Science Studies** David J Hess, 1997-10-01 The first comprehensive survey of this interdisciplinary field combining a concise overview of key concepts with an original and integrated framework Virtually every aspect of modern life is suffused with the biproducts of scientific research yet the study of science itself what it is how it is done and how it has evolved over time is relatively new By examining the political historical and cultural dimensions of science and technology science studies provides a conceptual tool kit for thinking about scientific in more sophisticated ways In the process of bringing disparate fields together under one tent David J Hess realizes the full promise of science studies long uncomfortably squeezed into other more traditional disciplines He provides a clear discussion of the issues and misunderstandings that have arisen in these interdisciplinary conversations His survey includes recent developments in philosophy sociology anthropology history cultural studies and feminist studies Science Studies moves beyond the discipline bound blinders of a sociology history philosophy or anthropology of science By creating its own transdisciplinary field Hess argues science studies can provide crucial conceptual tools for public discussions about the role of science and technology in a democratic society **The Micropolitics of Knowledge** Emmanuel Lazega, 2024-11-01 For many years Emmanuel Lazega has explored communication behavior and decision making processes of small workgroups within larger organizations To account for the knowledge claims of members of those groups and for the ways in which such claims are legitimated collectively and translated into action he presents a theory of the interactive elaboration of information on which decisions are based **Science and Technology in a Multicultural World** David J. Hess, 1995 This new approach to the study of multiculturalism focuses on its applications to science and technology It explores new studies that describe the role of culture and power in the making of theories facts and machines **In Search of Community** Eileen B. Leonard, Hermann Strasser, Kenneth Westhues, 1993 In Search of Community is a collection of thirteen essays by former students of Dr Werner Stark influential historian of social thought The work opens with an introduction succinctly relating an outline of Stark's life's work encompassing the historical framework that influences him and the personal events that shape his outlook and scholarship The essayists address the entire range of central subjects of the sociological discipline by focusing on four areas of scientific debate the epistemic Sociology of Knowledge the theoretical Social Thought the societal Social Bond and the religious Sociology of Religion Those four areas were also of substantive concern to Werner Stark and his extraordinary range and depth of knowledge is reflected in this collection of essays **The Ethnomethodological Movement** Pierce J. Flynn, 2011-06-01 No detailed description available for The Ethnomethodological Movement *Mobilities of Knowledge* Heike Jöns, Peter Meusburger, Michael Heffernan, 2017-01-16 This collection of essays examines how spatial mobilities of people and practices technologies and objects knowledge and ideas have shaped the production circulation and transfer of knowledge in different historical and geographical contexts

Targeting an interdisciplinary audience *Mobilities of Knowledge* combines detailed empirical analyses with innovative conceptual approaches The first part scrutinizes knowledge circulation transfer and adaption focussing on the interpersonal communication process early techniques of papermaking a geographical text indigenous knowledge in exploration the genealogy of spatial analysis and different disciplinary knowledges about the formation of cities states and agriculture The second part analyses the interplay of mediators networks and learning by studying academic careers travels and collaborations within the British Empire public internationalism in Geneva the global transfer of corporate knowledge through expatriation graduate mobility from the global south to the global north and the international mobility of degree programs in higher education This book is open access under a CC BY 4.0 license

The Social Relations of Physics, Mysticism, and Mathematics S. Restivo, 2012-12-06 The problems I address in this book are among the least studied in the sociology of science and knowledge Part I is a critique of the claim that there are parallels between ancient mysticism and modern physics and a sociological analysis of this claim as a strategy in intellectual conflict This study must ultimately be rooted more firmly in a type of sociology of knowledge that is just now beginning to crystallize and which I discuss in Chapter 7 and a sociology of religion that is not so much unknown as underground and timid that is a non worshipful materialist sociology of religion My study of physics mysticism parallelism is a vehicle for exploring epistemic strategies I thus conclude Part I by sketching a materialist emancipatory epistemic strategy My conclusion brings together a number of ideas formulated by myself and others over the past several years but stops short of a systematic synthesis A more integrated and coherent model than what I can sketch here must wait on the results of research now in progress in the critical as opposed to apologetic or worshipful sociology of knowledge

The Pragmatics of Defining Religion Jan G. Platvoet, Arie Leendert Molendijk, 1999 *The Pragmatics of Defining Religion* is a multidisciplinary volume on the problem of the definition of religion with chapters on the polemics of defining religion in modern contexts the history of the concept of religion the methodology of its definition it includes several definition proposals

The Rise of Early Modern Science Toby E. Huff, 2017-06-15 In this revised third edition Toby E Huff charts the rise of early modern science within Europe China and Islamic civilisations

The Social Process of Scientific Investigation W.R. Knorr, R. Krohn, Richard P. Whitley, 2012-12-06 practice some of which is translated into the standard forms of public discourse in publication and then retranslated by readers and adapted again to local practice at self selected other sites Less may be left implicit and additional personal and contextual information is carried by the informal methods of communication which mediate local projects and international publication But both methods of communication are screens as well as conduits of information

History and Background of the Volume When the planning of this volume began in the spring of 1977 it seemed a natural part of the mandate for the Yearbook There had also been a number of more specific calls for deeper studies of research in social and historical context 3 These calls can be seen as giving permission and legitimacy to ask questions otherwise seen as irrelevant or even disrespectful and as attempts to

develop new perspectives from which to ask and to answer them The implied and expressed irreverence toward traditions and institutions of great respect may have prolonged this process of initial apologetics In any case in May 1977 the theme of The Social Process of Scientific Investigation was proposed to the Editorial Board for Volume IV as the heart of the subject That is the ethnographic and detailed historical study of actual scientific activity and thinking at or close to the work site

The Pragmatics of Defining Religion Platvoet, Arie Molendijk, 2018-11-13 This volume promotes a pragmatic anti essentialist and anti hegemonic approach to the problem of the definition of religion It argues that definitions of religion are context bound strategies for pursuing a variety of purposes extra academic as well as academic Religions being immensely varied complex and multi functional phenomena they need to be studied by several academic disciplines from many different perspectives It is therefore legitimate and useful that many definitions of religions are developed The volume has contributions from scholars in Philosophy of Religion the Comparative Study of Religions Anthropology of Religion Sociology of Religion and Psychology of Religion It has chapters on the polemics of defining religion in modern contexts the history of the concept of religion and the methodology of its definition it includes several definition proposals Tackling Wicked Problems Through the Transdisciplinary Imagination Valerie A. Brown, John Alfred Harris, Jacqueline Y. Russell, 2010 First Published in 2010 Routledge is an imprint of Taylor Francis an informa company *Social Reality* Janak Pandey, 1988

Performing Action Joseph R. Gusfield, 2017-09-08 In recent years the social sciences and the humanities have drawn closer to each other in thought and method This rapprochement has led to new perceptions of human behavior by sociologists as well as new methodological orientations Sociologist Joseph R Gusfield draws upon drama and fiction to show how human action is shaped by the formal dimensions of performance Gusfield first defines the concept of behavior as artistic performance He then analyzes routine and classic social research reports as literary performances in qualitative and quantitative terms Next he moves to social movements and public actions demonstrating how objects and events are products of the interpretation and reflection of individuals He draws upon literary and artistic conventions to deal with issues of representation and meaning In the first and last chapters Gusfield provides a conceptual summary examining the relation between sociology as science and art arguing that sociological methods are neither science nor art but partake of both Following the philosopher Paul Ricoeur Gusfield shows how human behavior can be read as a text always telling the participant or observer something about something Performing Action will be of interest to sociologists psychologists and students of aesthetics and critical theory *Questioning Science in East Asian Contexts* Yung Sik Kim, 2014-01-16 Questioning Science in East Asian Contexts brings together twelve essays written by Yung Sik Kim addressing various questions about the social and cultural contexts of science in East Asia Most of the essays deal with the relationship between science and Confucianism especially the roles that Confucian thought values and institutions have on the development of science Kim shows that this relationship is very complex and multifaceted and cannot be dealt with in a simplistic manner

Kim offers comparative perspectives and discusses the problems of intercultural comparisons he demonstrates that in spite of the potential dangers that accompany these comparisons they should be made nonetheless as they allow for a better understanding of the situation in East Asia

Emile Durkheim Ivan Strenski, 2017-05-15 A new appreciation of Durkheim now into its fourth decade has extended our grasp of his intellectual ambitions beyond standard academic boundaries Contributions to this revival of interest in Durkheim many secreted away in obscure periodicals are well worth being recognized for their unqualified excellence in helping us to uncover the original Durkheimian intellectual project in all its interdisciplinary complexity Besides classic Durkheimian subjects such as religion social solidarity and suicide these studies bring to light Durkheim's intellectual inquiry into political theory comparative ethnology social reconstruction questions of civil society and his articulation of an updated individualism in conversation with Marx Hegel Spencer and others Authors who have helped us attain this more rounded conception of the Durkheimian project include such well known figures as Robert N Bellah Robert Alun Jones Anthony Giddens W S F Pickering and Edward Tiryakian More than matching these contributions are the surprising writings by authors from across the disciplines including such contemporaries of Durkheim as historian Henri Berr and theologian Alfred Loisy as well as modern day writers who deserve to be much better known such as philosopher John Brooks III or historian John Bossy Although this collection is overwhelmingly drawn from sources in English two classic critical pieces by French contemporaries of Durkheim enhance the value of this anthology

Professional Learning in the Knowledge Society Karen Jensen, Leif Chr. Lahn, Monika Nerland, 2012-10-20 This book presents an entirely new approach to professional learning based on perspectives of the knowledge society and in particular an interpretation of Knorr Cetina's

work on scientific epistemic cultures Starting with a conceptual chapter and followed by a suite of empirical studies from accountancy education nursing and software engineering the book elaborates how a knowledge production and circulation take distinct forms in those fields b how the knowledge objects of practice in those fields engross and engage professionals and in the process people and knowledge are transformed by this engagement By foregrounding an explicit concern for the role of knowledge in professional learning the book goes much farther than the current fashion for describing practice based learning It will therefore be of considerable interest to the research policy practitioner and student communities involved with professional education learning or interested in innovation and knowledge development in the professions **Fuzzy**
