R. Uys, 2006-01-01 This title is directed primarily towards health care professionals outside of the United States THE NURSING PROCESS A GLOBAL CONCEPT critically explores a concept that was introduced into nursing in the 1970s and rapidly spread all over the world It begins with the background and history of the Nursing Process and analyses its use in various fields such as managerial technologies and psychiatric nursing It then goes on to look at its use in six different countries from a variety of world regions in Europe Finland Germany and the Czech Republic as well as South Africa Australia and the Caribbean It explores its strengths and weaknesses and tries to make some predictions about future use The book combines descriptions of the state of the art based on extensive literature surveys as well as analytical approaches It creates opportunities for comparison especially with regard to problem solving strategies Combines diverse perspectives of the core concept and its use Provides international overviews as well as detailed country reports Based on extensive literature surveys as well as analytical approaches Creates opportunities for comparison especially with regard to problem solving strategies **Research Methods for Nursing and Healthcare** John Maltby, Glenn Williams, Julie McGarry, Liz Day, 2014-02-04 Research Methods for Nursing and Healthcare is an essential introductory text for all nursing and healthcare students coming to research methods for the first time or those nurses and healthcare staff wishing to improve their skills in this area The book includes comprehensive coverage of the main research methods topics and provides guidance on how to understand and apply research techniques Everyday nursing examples are used throughout to explain research methods concepts and their relevance to practice Simple self assessment tasks are included at the end of chapters the tests can be undertaken individually or within groups to assess the students understanding of the concepts and skills being learnt Research Methods for Nursing and Healthcare takes the fear out of research methods for all nursing and healthcare professionals Excellent introductory text that brings interest to research methods for student nurses Dr Aimee Aubeeluck Deputy Director Graduate Entry Nursing School of Nursing Midwifery and Physiotherapy University of Nottingham I think this is one of the most

readable books on research I have read Not the most scholarly but that was not the intention It is certainly the most user friendly book that will make the whole often scary subject of research less threatening Paula Crick Principal Lecturer Faculty of Health Staffordshire University I do think this is one of the most engaging texts aimed at nursing that I have read in a while This does seem much more exciting and more importantly real world Lucy Land Senior Academic Centre for Health and Social Care Research Faculty of Health Birmingham City University Useful resource for our students dissertation which can be a literature review or a research proposal Melanie Brooke Read Department of Health Social Studies University of Bedfordshire Excellent text book which actually takes away the fear of research within healthcare Angela Cobbold Institute of Health Social Care Anglia Ruskin University The text is very comprehensive and I found chapter 7 on action research particularly useful in supporting a student I was supervising I also like the self assessment exercises which I intend to incorporate in my teaching strategy Ms Mulcahy School of Nursing and Midwifery University College Cork

Nursing Research Judith Haber, 1998 An overview of the evolution of nursing research with real world examples For undergraduate students who are learning the steps of the research process learning how to critique published research literature and learning when and how to apply research findings in clinical practice [Understanding Nursing Research](#) Nancy Ann Burns, Susan K. Grove, 1999 The new second edition of this AJN Book of the Year introduces each step in the nursing research process and shows how to read summarize critique and use the findings in clinical practice The authors both published nurse researchers employ a consistent style and a nursing oriented approach Highlights from published research studies and critique questions make this subject easy to understand and enjoyable to learn *Nursing and Midwifery Research* Dean Whitehead, Geri LoBiondo-Wood, Judith Haber, 2012-10-30 The new edition upholds the premise that knowledge about research process and design is mandatory in today's health care arena and that all nurses and midwives need to understand research findings and their implication for changing practice It is completely revised with many new chapters The text has been restructured into three sections Section 1 Research Awareness sets the scene for the importance of nursing and midwifery research and provides an overview of research theory and practice as processes Chapters on searching for and reviewing the literature provide detailed advice for undergraduates and facilitate access to research articles online One of the new chapters discusses ethical issues in Australia and New Zealand Section 2 Appreciation and Application provides a detailed discussion of qualitative quantitative and mixed methods research approaches with many useful examples from the clinical area Section 3 Conducting primary research is new and is designed to accommodate both undergraduate and postgraduate students in their research effort Writing research proposals may be a requirement for undergraduates in their research program and postgraduates will find the information useful for undertaking a higher degree or applying for university or external funding This final Section is also useful as a guide on disseminating and publishing conducted research findings Combined Australian and New Zealand editorship ensures greater trans Tasman coverage awareness and relevance

Contributions from international luminaries are balanced by a heightened focus on research conducted within Australia and New Zealand New edition conscientiously recognises midwifery research as related to but independent from nursing The research process driven approach is directed towards consumers of research and the comprehensive coverage extends from undergraduate through to a postgraduate level of knowledge Expanded pedagogy includes Key Terms and Learning Outcomes at the beginning of each chapter Icons throughout that direct readers to web based material Evidence based Tips Research in Brief boxes and Points to Ponder for constant reinforcement that links evidence to practice Integrated Tutorial Triggers with suggested answers provided and Multiple Choice Questions enable students to assess their understanding of key points Evolve Website provides True False questions and access to journal articles cited in the text with additional reflective questions Chapter 1 The significance of nursing research identifies the current changes in practice and future directions in Australian health care Previous chapters 3 and 4 have been combined to become Chapter 3 Searching and reviewing the literature A detailed discussion of qualitative quantitative and mixed methods research approaches Increased Australian and New Zealand context and research examples More accessible language throughout
