*Research Activities of the IMF, January 1991-December 1999* International Monetary Fund, 2000-01-01 Research activity in the IMF emphasizes the links between the organization's policy and operational concerns. The main objectives of research is IMF staff understanding of policy and operational issues relevant to the institution and to improve the analytical quality of the work prepared for management and the Executive Board and the advice provided to member countries. The scope of research in the IMF is defined by the purposes and functions of the institution. In order to foster innovation and ensure quality control the IMF makes much of its research available outside the institution and encourages staff to interact with academia and other research organizations through conferences, seminars and occasional joint research projects. The visiting scholar's program has also enhanced the quality of research done in the IMF. This program brings in leading members of the economics profession from around the world to assist in the preparation of papers for the Executive Board and to conduct research on IMF related issues.

*The Long Battle for Global Governance* Stephen Buzdugan, Anthony Payne, 2016-01-08 The Long Battle for Global Governance charts the manner in which largely excluded countries variously described as ex-colonial, underdeveloped, developing, Third World and lately emerging have challenged their relationship with the dominant centres of power and major institutions of global governance across each decade from the 1940s to the present. The book offers a fresh perspective on global governance by focusing in particular on the ways in which these countries have organised themselves politically, the demands they have articulated and the responses that have been offered to them through all the key periods in the history of modern global governance. It re-tells this story in a different way and in so doing describes and analyses the current rise to a new prominence within several key global institutions, notably the G20 of countries such as Brazil, China, India and South Africa. It sets this important political shift against the wider history of longstanding tensions in global politics and political economy between so-called Northern and Southern countries. Providing a comprehensive account of the key moments of change and contestation within leading international organisations and in global governance generally since the end of the
