Mobility and Worker Adaptation to Economic Change in the United States Herman Travis,1963 **Index of Economic Articles in Journals and Collective Volumes** American Economic Association,1991 *Malaysia's*

Socio-Economic Transformation Sanchita Basu Das,2014-11-07 Since 1957 Malaysia's economic development has been an account of growth transformation and of structural change More than 75 per cent of its gross domestic product GDP comes from the manufacturing and services sectors However Malaysia is stuck in a middle income trap and is facing challenges on the economic and political front In June 2010 Prime Minister Najib Razak unveiled the 10th Malaysian Plan 2011-15 to chart the development of Malaysia from a middle to high income nation This publication represents a policy oriented stocktake and evaluation by academics policymakers and business people on Malaysia's achievements present work in progress endeavours and some of the future challenges facing the nation in its pursuit to achieve a developed high income country status

General Catalogue of Printed Books British Museum. Department of Printed Books,1969 Business Dynamics and Productivity OECD,2017-03-31 This publication focuses on business dynamics across eight countries Belgium Brazil Canada Costa Rica Japan New Zealand Norway United Kingdom and over time building upon the evidence collected in the framework of the OECD DynEmp project for 22 countries **Golden Growth** Indermit S. Gill,Martin Raiser,2012-04-25 The public debt crisis in Europe has shaken the confidence not just in the Euro but in the European model Aging and uneconomical Europeans are being squeezed between innovative Americans and efficient Asians it is said With debt and demographics dragging down them down one hears that European economies will not grow much unless radically new ways are discovered The end of complacency in Europe is a good thing but this loss of confidence could be dangerous The danger is that in a rush to rejuvenate growth the attractive attributes of the European development model could be abandoned along with the weak In fact the European growth model has many strong points and enviable accomplishments One can say without exaggeration that Europe had invented a convergence machine taking in poor countries and helping them become high income economies World Bank research has identified 27 countries that have grown from middle income to high income since 1987 a few thanks to the discovery and exploitation of massive natural resources e.g oil in Oman and Trinidad and Tobago several others like Japan Hong Kong Singapore Taiwan and South Korea embracing aggressive export led strategies which involved working and saving a lot postponing political liberties and looking out only for themselves But half of the countries that have grown from middle income to high income Croatia Cyprus Czech Republic Estonia Greece Hungary Latvia Malta Poland Portugal Slovak Republic and Slovenia are actually in Europe This is why the European model was so attractive and unique and why with some well designed efforts it ought to be made right again **From Oil to Knowledge** Ibrahim Alfaki,Allam Ahmed,2017-09-08 Over reliance on oil challenges the long term sustainability of an economy The UAE's government has placed considerable focus on a comprehensive strategic planning exercise to transform the country's economic structure

from relying heavily on hydrocarbon resources to becoming a knowledge based economy Non oil is to account for 80% of the country s economy by 2021 From Oil to Knowledge examines the role of this major powerhouse of the Arab World to transform itself into a leader in the adoption of science technology and innovation to drive economic success on the international stage In this first book to present and critically evaluate the extent of the UAE s success in diversifying its economy and implementing the principles and approaches of a Knowledge Economy the authors identify the achievements of the government to date and the areas of further development From Oil to Knowledge will be utilized as a guide by policymakers and senior managers to enhance their ability to think strategically towards implementing the pillars of a Knowledge Economy within their own organisations and nation states
