Foreign Direct Investment and Urban Growth in China Lei

Wang, 2016-04-15 This book puts forward an institutional explanation of the recent dynamics of foreign direct investment FDI in China It argues that the concentration of FDI in the Chinese manufacturing economy since the beginning of this century is largely the result of China's entrepreneurial urban growth strategy which was in turn motivated by the overall political and fiscal structures of China and was facilitated by urban land use under the manipulation of municipalities By identifying the interactions between cross border capital flow national regulations and local responses this book not only provides a fresh understanding of China's FDI pattern from an urban perspective that has been rare among publications on similar topics but also sheds light on the drivers underlying China's rapid economic growth and its implications for sustainable development It also stands as a useful reference for other countries and regions that plan to launch their own state led development projects

Foreign Direct Investment and Human Development Olivier de Schutter, Johan F. M. Swinnen, Jan Wouters, 2013

This book presents original research that examines the growth of international investment agreements as a means to attract foreign direct investment FDI and considers how this affects the ability of capital importing countries to pursue their development goals The hope of countries signing such treaties is that foreign capital will accelerate transfers of technologies create employment and benefit the local economy through various types of linkages But do international investment agreements in fact succeed in attracting foreign direct investment And if so are the sovereignty costs involved worth paying In particular are these costs such that they risk undermining the very purpose of attracting investors which is to promote human development in the host country This book uses both economic and legal analysis to answer these questions that have become central to discussions on the impact of economic globalization on human rights and human development It explains the dangers of developing countries being tempted to signal their willingness to attract investors by providing far reaching protections to investors rights that would annul or at least seriously diminish the benefits they have a right to expect from the arrival of FDI It examines a variety of tools that could be used by capital exporting countries and by capital importing countries alike to ensure that FDI works for development and that international investment agreements contribute to that end This uniquely interdisciplinary study located at the intersection of development economics international investment law

and international human rights is written in an accessible language and should attract the attention of anyone who cares about the role of private investment in supporting the efforts of poor countries to climb up the development ladder

Does Foreign Direct Investment Promote Development? Theodore Moran, Edward M Graham, Magnus Blomström, 2005-04-15

Foreign Direct Investment and Regional Development in East Central Europe and the Former Soviet Union David Turnock, 2017-11-28 With the achievement of further EU and NATO enlargement a critical political and economic lens is now focused on East Central Europe and to a lesser extent the other former communist states Economic growth in each transition state and more broadly the region pivots around the prospects for foreign direct investment FDI with decisions on where foreign investors will locate their projects now vitally important This book the first one devoted to a geographical survey concentrating specifically on FDI in the region brings together a wide range of

prominent authors from the US and Europe including the late Frank Carter to provide a timely and critical examination of the importance of foreign investment. It presents a detailed analysis of location patterns and their significance for regional development with particular emphasis given to the important socioeconomic and political consequences of uneven distribution of FDI across the region and its constituent countries. Divided into two parts, the book first deals with general overarching themes and issues before applying these to more specific country case studies. The second part deals with regional studies focusing broadly on the Western Balkans and Bulgaria before looking at specific economic sectors in individual countries.

Policy makers and development professionals will find in this book a useful guide to draw sound policies based on facts and rigorous analyses.

Foreign Direct Investment in the United States, 1997 Foreign Direct Investment in Bahrain Lobna Ali Al-Khalifa, 2010-05 A significant volume of literature has been developed that seeks to provide an explanation for the growth of FDI and its impact on less developed countries. The literature is characterized by diversity and controversy. Based on it, a range of reasons for encouraging investment have been proposed including its favorable effects on employment levels, the balance of payments and balance of trade of the host country and also the potential for acquisition of technology and skills. Cave 1982 and Dunning 1993. Equally, the potentially negative effects of growing levels of foreign investment on domestic market structures and national sovereignty have long been the focus of attention. Vernon 1971 and Jenkins 1987. More recent studies focused on the positive effect FDI can create through the integration of a host country into the global economy and the system of international division of labor based on fragmentation of production. Gereffi and Korzeniewicz 1994 and Henderson, Decker, Hess, Coe and Yeung 2002. Little if any research has examined the impact of FDI on the oil monarchies. Conventional expectations persisted that once they enter the post oil phase of their histories it will be difficult for them to uphold their political legitimacy and survive intense domestic and international pressures upon their regimes. Taeker 1998 and O'Reilly 1999. It has been argued that oil income enable them to pacify opponents by providing their subjects with jobs that pay well and has had detrimental effect on both economic development and political liberalization. These expectations have tended to be contradicted by actual development. The private sector has become remarkably strong in the oil monarchies and their governments were not highly resistant to change as depicted by the rentier state paradigm. Mahdavy 1970 and Beblawi 1987. Taking Bahrain as a case study, this thesis argues that despite its limitations as a small nation and the paucity of its oil reserves, Bahrain punched well above its weight due to its open economy and foreign direct investment. Its domestic economy is well integrated into the global market. It was able to exploit some of the

opportunities that were presented by economic globalization when niches were opened or vacated within the networks of global production. It has developed energy intensive industries aluminium and petrochemicals and became the major financial centre of the Middle East. Yet in spite of the government incentives it still faces some challenges in attracting FDI in downstream activities related to oil and aluminium which suggests that additional reforms are needed. **Foreign Direct Investment in Thailand** Ratchanee Wattanawisitporn, 2005

Foreign Direct Investment Inflows Into the South East European Media Market Zvezdan Vukanović, 2016-07-25 This book offers a strategic analysis of current and future perspectives of Foreign Direct Investment FDI inflows into the South East European media market. The author develops a hybrid FDI business model strategy to guide media companies wishing to more effectively position and leverage their media infrastructure within the increasingly globalized and expanding media market. By conducting sixteen comparative and exploratory case studies of the South East European media market the author explores how specific microeconomic factors influence spillover effects absorption capacities and investment incentives between local and foreign firms through FDI inflows. The book is directed towards researchers and students as well as practitioners professionals involved with media organizations. Foreign Direct Investment as a Tool for Poverty Reduction in Developing Countries Ronald K.S.

Wakyereza, 2019-10-15 The textbook experience of poverty can be witnessed in a number of developing countries in Sub Saharan Africa South East Asia and Latin America. Accordingly Foreign Direct Investment FDI has been identified as an important tool for poverty reduction as it is noted to accelerate economic growth and employment in a nation and is currently an essential issue for countries such as Uganda. This book finds that Ragnar s 1953 Vicious Circle of Poverty remains undisputed even today showing that attracting FDI is not the end but that a nation s absorption capacity is equally paramount. The implications of the FDI frog leap theory for developing countries and the Community Capital Absorption Capacity Development CCACD framework provide plausible poverty reduction approaches in the 21st century. Without such measures bringing an end to poverty is likely to elude governments and multinational corporations in developing countries.

Opportunities and Challenges for Multinational Enterprises and Foreign Direct Investment in the Belt and Road Initiative Bhuiyan, Miraj Ahmed, Beraha, Isidora, 2022-06-24 The Belt and Road Initiative BRI is establishing significant connectivity networks including a complex network of aviation e services and trade network systems. It has promoted economic and financial development in regions covered by the BRI in terms of infrastructure construction and interconnection and attracted large foreign direct investment flows. At the bottom of the escalation of the China US trade dispute is a more fundamental shift where China has become the US s strategic competitor and political economic tensions have continued to climb. Opportunities and Challenges for Multinational Enterprises and Foreign Direct Investment in the Belt and Road Initiative analyzes the opportunities and challenges of multinational enterprises MNEs and cross border foreign investments transactions. This valuable reference adopts an economic and international business perspective to address these issues and

presents novel and state of the art research insights into the role of MNEs and their influence on the Silk Road Economic Belt Covering topics such as economic determinants foreign direct investment promotion policies and trade gravity model this premier reference source is an excellent resource for business leaders and CEOs policymakers geopolitical experts politicians government officials sociologists libraries students and educators of higher education researchers and academicians

Foreign Direct Investment in Europe Klaus Liebscher, 2007-01-01 This book provides authoritative academic and professional insights into the effects of foreign direct investment FDI on home and host countries It highlights global trends and patterns and explores related policy challenges all with a special focus on the countries in Central Eastern and South Eastern Europe The book cuts through the existing data fog by offering a wide range of up to date academic findings and institutional expertise Those findings are rounded off with lessons to be learned from historical developments Ireland's success story an evaluation of current trends the role of China and an investment promotion agency policy for attracting sustainable investment CzechInvest Contributions made by central bank officials institutional representatives members of academia and professionals provide for a uniquely complementary view on FDI developments and their implications At a time of big changes in the FDI landscape this book offers both empirical and econometric evidence on foreign direct investment and will be of great interest to economists and other experts in the fields of economic policy and European integration from central commercial and investment banks governments international organizations universities and research institutes The special focus on FDI will attract those interested in or directly involved in tackling the challenges of attracting sustainable investment or investing successfully abroad

Globalization and Development in the Mekong Economies Suiwah Leung, Ben Bingham, Matt Davies, 2010-01-01 A very topical book Organiser Weekly Since the late 1980s Vietnam Cambodia PDR Lao and Myanmar have been opening their economies to international trade and investment With the exception of Myanmar the reforms have yielded impressive results but the process is far from complete In this enlightening book a group of leading scholars outline the continuing reform efforts needed to survive the current global recession and place these economies in a competitive position on the recovery of the world economy In the aftermath of the global financial crisis of 2008 this topical book analyses the opportunities and threats to continued globalization for the Mekong 4 particularly in relation to rapid industrialization through joining the production networks of East Asia It then assesses the political will for sustaining the reform process This book will be an important resource for national government agencies such as the department of foreign affairs and aid agencies that have significant bilateral relationships with the Mekong 4 namely Australia Canada Japan Scandinavia and the USA International financial institutions that have existing or potential business links with the Mekong 4 as well as universities with courses in development economics will warmly welcome this book
