Development and Aging Klaus Warner Schaie,Sherry L. Willis,1986 Cognitive Development in Adulthood Mark L. Howe,Charles J. Brainerd,2012-12-06 For some time now the study of cognitive development has been far and away the most active discipline within developmental psychology Although there would be much disagreement as to the exact proportion of papers published in developmental journals that could be considered cognitive 50% seems like a conservative estimate Hence a series of scholarly books devoted to work in cognitive development is especially appropriate at this time The Springer Series in Cognitive Development contains two basic types of books namely edited collections of original chapters by several authors and original volumes written by one author or a small group of authors The flagship for the Springer Series is a serial publication of the advances type carrying the subtitle Progress in Cognitive Development Research Each volume in the Progress sequence is strongly thematic in that it is limited to some well defined domain of cognitive developmental research e g logical and mathematical development development of learning All Progress volumes will be edited collections Editors of such collections upon consultation with the Series Editor may elect to have their books published either as contributions to the Progress sequence or as separate volumes All books written by one author or a small group of authors are being published as separate volumes within the series A fairly broad definition of cognitive development is being used in the selection of books for this series **A Journey Called Aging** James C. Fisher,Henry C. Simmons,2012-11-12 A Journey

Called *Aging* presents an insightful exploration of the years between the entry into older adulthood and death. This text examines the significant changes and major landmarks of older persons between 60 and 90. Grounded by a developmental framework based on empirical research, this book presents a new way of looking at older adulthood, describing the older adult years in intensely human terms through both anecdotes and research-based findings to engage the reader as both guide and traveler. Using a series of sequential stages as a framework, *A Journey Called Aging* discusses the experiences of older adults, addressing the challenges and opportunities presented at each stage. This clear analysis can be used as a guide to help persons plan their own odyssey through the older years. Topics in *A Journey Called Aging* include research and results of the study, entering older adulthood, the long stable stage of Extended Middle Age, Early Transition, Older Adult Lifestyle, Later Transition, the stable stage near the end of life, and the final transition. *A Journey Called Aging* is crucial reading for professionals who work with older adults, including pastors, attorneys, facilities managers, and program directors; gerontology educators and students; and older adults themselves, their families, and those who care for and about them.

Middle Adulthood Sherry L. Willis, Mike Martin, 2005-06-23 Willis, Pennsylvania State U and Martin, U of Zurich. This text considers facets of life from age 40 to 65. Taking a multicultural perspective, it addresses topics including the emergence of middle age as a normative developmental period in the life course, change and stability in personality during middle age, and cognitive development and decline.

Handbook of Research on Adult Learning and Development M. Cecil Smith, Nancy DeFrates-Densch, Assistant Editor, 2008-11-19. The time is right for this comprehensive state-of-the-art Handbook that analyzes, integrates, and summarizes theoretical advances and research findings on adult development and learning, a rapidly growing field reflecting demographic shifts toward an aging population in Western societies. Featuring contributions from prominent scholars across diverse disciplinary fields—education, developmental psychology, public policy, gerontology, neurology, public health, sociology, family studies, and adult education—the volume is organized around six themes: theoretical perspectives on adult development and learning; research methods in adult development research; research on adult learning; aging and gerontological research; policy perspectives on aging. The Handbook is an essential reference for researchers, faculty, graduate students, and practitioners whose work pertains to adult and lifespan development and learning.

The Journey of Adulthood Barbara R. Bjorklund, 2013-07-24. For undergraduate courses in Adulthood and Aging, Gerontology, and Adult Development. This best-selling book discusses the aspects of successful aging, covering growth and development from emerging adulthood to old age and the impact that culture, gender, ethnicity, and individual differences have on these processes. For Barbara Bjorklund, the subject matter in *Journey of Adulthood* has never been far from home, as a middle-aged adult who is on this very journey along with her husband, looking ahead toward their parents who are in late adulthood and back toward their children who are making their own way through young adulthood. She has found that there is always room to learn, always room to grow. One of the major goals of this text is to capture this dynamic process of adult development from

emerging adulthood to the end of life Its core is made up of research findings from large longitudinal studies and major theories of adult development but it also reflects smaller studies of diverse groups showing the influences of gender culture ethnicity race and socioeconomic background on this journey Combined this material creates for an exciting and thorough view on the process of successful aging *The Oxford Handbook of Emotion, Social Cognition, and Problem Solving in Adulthood* Paul Verhaeghen, Christopher Hertzog, 2014-03-20 Over the last decade the field of socio emotional development and aging has rapidly expanded with many new theories and empirical findings emerging This trend is consistent with the broader movement in psychology to consider social motivational and emotional influences on cognition and behavior The Oxford Handbook of Emotion Social Cognition and Problem Solving in Adulthood provides the first overview of a new field of adult development that has emerged out of conceptualizations and research at the intersections between socioemotional development social cognition emotion coping and everyday problem solving This field roundly rejects a universal deficit model of aging highlighting instead the dynamic nature of socio emotional development and the differentiation of individual trajectories of development as a function of variation in contextual and experiential influences It emphasizes the need for a cross level examination from biology and neuroscience to cognitive and social psychology of the determinants of emotional and socio emotional behavior This volume also serves as a tribute to the late Fredda Blanchard Fields whose thinking and empirical research contributed extensively to a life span developmental view of emotion problem solving and social cognition Its chapters cover multiple aspects of adulthood and aging presenting developmental perspectives on emotion antecedents and consequences of emotion in context everyday problem solving social cognition goals and goal related behaviors and wisdom The landmark volume in this new field The Oxford Handbook of Emotion Social Cognition and Problem Solving in Adulthood is an important resource for cognitive developmental and social psychologists as well as researchers and graduate students in the field of aging emotion studies and social psychology **Mechanisms of Age-cognition Relations in**

Adulthood Timothy A. Salthouse, 2013-05-13 This monograph is the written version of a series of talks delivered as recent MacEachran Lectures at the University of Alberta The informal style of the lectures and the inclusion of a relatively large number of figures has been preserved in order to keep the monograph faithful to the concept of an individual attempting to integrate his own research into a reasonably coherent framework Although the volume is very much a personal account of one individual s perspective the studies reported are naturally a product of many collaborations as well as inspirations from colleagues The fundamental issue addressed is how adult age differences in fluid or process aspects of cognitive functioning are to be explained Several potential mediators are considered with most of the emphasis devoted to the investigation of working memory and processing speed as variables mediating relations between age and cognition
