*Recent OECD Publications* Organisation for Economic Co-operation and Development, 1998      The Conference Proceedings of the 1997 Air Transport Research Group (ATRG) of the WCTR Society WCTR Society. Air Transport Research Group. Conference, 1997      *The Economics of Urban Transportation* Kenneth A. Small, Erik T. Verhoef, 2007-10-18 This timely new edition of Kenneth A Small's seminal textbook *Urban Transportation Economics* co-authored with Erik T Verhoef has been fully updated covering new areas such as parking policies reliability of travel times and the privatization of transportation services as well as updated treatments of congestion modelling environmental costs and transit subsidies Rigorous in approach and making use of real world data and econometric techniques it contains case studies from a range of countries including congestion charging in Norway Singapore and the UK light rail in the Netherlands and freeway tolls in the US Small and Verhoef cover all basic topics needed for any application of economics to transportation forecasting the demand for transportation services under alternative policies measuring all the costs including those incurred by users setting prices under practical constraints choosing and evaluating investments in basic facilities designing ways in which the private and public sectors interact to provide services This book will be of great interest to students with basic calculus and some knowledge of economic theory who are engaged with transportation economics planning and or engineering travel demand analysis and many related fields It will also be essential reading for researchers in any aspect of urban transportation      Shaping Air Transport in Asia Pacific Tae Oum, Chunyan Yu, 2019-06-04 This title was first published in 2000 A comprehensive assessment of the markets and outlook for the air transport industry in the Asia Pacific region The book examines options for improvement of the regulatory system and industry structure drawing on experience within and outside of the region It includes the short and long term effects of the current economic crisis on Asian airlines and air transport markets and differs from other works due to its description and analysis of all major aspects of the Asian air transport industry and airlines      From Physics to Daily Life Beatrice Bressan, 2014-08-18 Beatrice Bressan brings together a number of outstanding examples of successful cross disciplinary technology transfer originating in fundamental physics research which dramatically impacted progress in biomedical research and clinical applications Many of these examples were developed at CERN a hotbed of fundamental inventions in particle physics Additional sections of the book deal with knowledge management and technology transfer including its economic aspects While each chapter has been drafted by an expert in the field the editor has carefully edited the whole book ensuring a coherent overall structure A must have for policy makers technology companies investors strategic planners in research and technology as well as attractive reading for the research community      **Urban Transport Environment and Equity** Eduardo Alcantara Vasconcellos, 2014-05-01 Traditional transport planning has generated transport systems that propagate an unfair distribution of accessibility and have environmental and safety issues This book highlights the importance of social and political aspects of transport policy

and provides a methodology to support this approach It emphasizes the importance of co ordinating urban transport and traffic planning and addresses the major challenge of modifying the building and use of roads The author makes suggestions for innovative and radical new measures towards an equitable and sustainable urban environment *International Symposium on Theory and Practice in Transport Economics Key Issues for Transport beyond 2000 15th International Symposium on Theory and Practice in Transport Economics, Tessaaloniki, Greece, 7th - 9th June 2000* European Conference of Ministers of Transport,2002-06-07 A clear dichotomy exists between an European economy centred on international trade and the environmental damage to which this focus gives rise There is a need for a novel approach based on a shift away from the goal of ever faster travel and *Contingent Valuation* R. Carson,2012-01-01 This major reference work the first of its kind provides a comprehensive and authoritative introduction to the large and growing literature on contingent valuation It includes entries on over 7 500 contingent valuation papers and studies from over 130 countries covering both the published and grey literatures This book provides an interpretive historical account of the development of contingent valuation the most commonly used approach to placing a value on goods not normally sold in the marketplace The major fields catalogued here include culture the environment and health application This bibliography is an ideal starting point for researchers wanting to find other studies that have valued goods or used techniques similar to those they are interested in For those wanting to conduct meta analyses the book will serve as an invaluable guide to source material For those wanting to conduct meta analyses the book will serve as an invaluable guide to source material In addition to the print edition we offer access for purchasers of the book to a website providing the contents of as a searchable Word document and in a variety of standard bibliographic database forms Contingent Valuation is an indispensable reference source for researchers scholars and policymakers concerned with survey approaches to the problem of environmental valuation

**Driving and the Built Environment** National Research Council,Transportation Research Board,Board on Energy and Environmental Systems,Committee for the Study on the Relationships Among Development Patterns, Vehicle Miles Traveled, and Energy Consumption,2010-01-25 TRB Special Report 298 Driving and the Built Environment Effects of Compact Development on Motorized Travel Energy Use and CO2 Emissions examines the relationship between land development patterns and vehicle miles traveled VMT in the United States to assess whether petroleum use and by extension greenhouse gas GHG emissions could be reduced by changes in the design of development patterns The report estimates the contributions that changes in residential and mixed use development patterns and transit investments could make in reducing VMT by 2030 and 2050 and the impact this could have in meeting future transportation related GHG reduction goals

**Road Freight and Privatisation** Nabil Abdel-Fattah,Richard Gray,Sharon Cullinane,2019-05-23 First published in 1999 this volume forms part of the Plymouth Studies in Contemporary Shipping series and focuses on Egyptian road freight privatisation The series represents a unique collection of papers and edited texts from the leading maritime institute in Western Europe at the

University of Plymouth It covers all aspects of the industry from operations through to the logistical framework that supports the sector Designed both for practising academics and the shipping and ports industry itself the series combining the output from some of the leading academic commentators in the world from the UK Korea Germany and Poland is an original and novel contribution to the maritime debate     Sustainable Transportation in Natural and Protected Areas Francesco Orsi,2015-07-16 Protected areas are at the centre of nature based tourism which is increasingly popular across the world As visitor numbers increase so does awareness of the harmful effects that large crowds may have on both natural resources and individuals recreational experience This volume considers the challenge of transportation to and within natural and protected areas the improvement of which has already been recognised as having great potential for mitigating the environmental impacts of ecotourism While several books have focused considerable attention to the management of protected areas in general little has been said about the specific issue of sustainable transport an emerging trend that is already reshaping visitation patterns in natural settings This book provides current knowledge on issues associated with the transportation of visitors in natural and protected areas and a comprehensive overview of the technical and strategic options available to tackle these issues It approaches the subject via three main topics preferences or the visitors attitudes towards transportation practices where current approaches are assessed through examples and case studies of successful experiences and methodologies from around the world and policies where suggestions and recommendations are put forward for both local scale strategies and broad scale regulatory action with global relevance Contributors include academics in the field of natural resource management and tourism with extensive experience in protected area management and active partnerships with natural park administrations     Progress in Economics Research, Volume 11 Albert Tavidze,2007 This series spans the globe presenting leading research in economics It is perhaps a sign of the times that economic weapons seem to be as powerful as or more so than tanks International applications and examples of economic progress are invaluable in the world of the 21st century     *New Transportation Research Progress* Filip Gustavsson,2008 This book deals with new research in the fields of passenger and freight transportation modes policy analysis formulation and evaluation planning interaction with the political socioeconomic and physical environment design management and evaluation of transportation systems     **Transportation Decision Making** Kumares C. Sinha,Samuel Labi,2011-09-09 This pioneering text provides a holistic approach to decisionmaking in transportation project development and programming whichcan help transportation professionals to optimize their investmentchoices The authors present a proven set of methodologies forevaluating transportation projects that ensures that all costs andimpacts are taken into consideration The text s logical organization gets readers started with asolid foundation in basic principles and then progressively buildson that foundation Topics covered include Developing performance measures for evaluation estimatingtravel demand and costing transportation projects Performing an economic efficiency evaluation that accounts forsuch factors as travel time safety and vehicle

operating costs Evaluating a project's impact on economic development and land use as well as its impact on society and culture Assessing a project's environmental impact including air quality noise ecology water resources and aesthetics Evaluating alternative projects on the basis of multiple performance criteria Programming transportation investments so that resources can be optimally allocated to meet facility specific and system wide goals Each chapter begins with basic definitions and concepts followed by a methodology for impact assessment Relevant legislation is discussed and available software for performing evaluations is presented At the end of each chapter readers are provided resources for detailed investigation of particular topics These include Internet sites and publications of international and domestic agencies and research institutions The authors also provide a companion Web site that offers updates data for analysis and case histories of project evaluation and decision making Given that billions of dollars are spent each year on transportation systems in the United States alone and that there is a need for thorough and rational evaluation and decision making for cost effective system preservation and improvement this text should be on the desks of all transportation planners engineers and educators With exercises in every chapter this text is an ideal coursebook for the subject of transportation systems analysis and evaluation

Regulation of Weights, Lengths, and Widths of Commercial Motor Vehicles Transportation Research Board, 2005-07-14 TRB Special Report 267 Regulation of Weights Lengths and Widths of Commercial Motor Vehicles recommends the creation of an independent public organization to evaluate the effects of truck traffic pilot studies of new truck designs and a change in federal law authorizing states to issue permits for operation of larger trucks on the Interstates In 1991 Congress placed a freeze on maximum truck weights and dimensions Some safety groups were protesting against the safety implications of increased truck size and weight and the railroads were objecting to the introduction of vehicles they deemed to have an unfair advantage Railroads unlike trucking firms must pay for the capital costs of their infrastructure The railroads contend that large trucks do not pay sufficient taxes to compensate for the highway damage they cause and the environmental costs they generate Although Congress apparently hoped it had placed a cap on maximum truck dimensions in 1991 such has not proven to be the case Carriers operating under specific conditions have been able to seek and obtain special exceptions from the federal freeze by appealing directly to Congress without any formal review of the possible consequences thereby encouraging additional firms to seek similar exceptions In the Transportation Equity Act for the 21st Century Congress requested a TRB study to review federal policies on commercial vehicle dimensions The committee that undertook the study that resulted in Special Report 267 found that regulatory analyses of the benefits and costs of changes in truck dimensions are hampered by a lack of information Regulatory decisions on such matters will always entail a degree of risk and uncertainty but the degree of uncertainty surrounding truck issues is unusually high and unnecessary The committee concluded that the uncertainty could be alleviated if procedures were established for carrying out a program of basic and applied research and if evaluation and monitoring were permanent components of the administration of trucking regulations

The committee recommended immediate changes in federal regulations that would allow for a federally supervised permit program. The program would permit the operation of vehicles heavier than would normally be allowed provided that the changes applied only to vehicles with a maximum weight of 90 000 pounds double trailer configurations with each trailer up to 33 feet and an overall weight limit governed by the federal bridge formula. Moreover enforcement of trucks operating under such a program should be strengthened and the permits should require that users pay the costs they occasion. States should be free to choose whether to participate in the permit program. Those that elected to do so would be required to have in place a program of bridge management safety monitoring enforcement and cost recovery overseen by the federal government. The fundamental problem involved in evaluating proposals for changes in truck dimensions is that their effects can often only be estimated or modeled. The data available for estimating safety consequences in particular are inadequate and probably always will be. Thus the committee that conducted this study concluded that the resulting analyses usually involve a high degree of uncertainty. What is needed is some way to evaluate potential changes through limited and carefully controlled trials much as proposed new drugs are tested before being allowed in widespread use. The committee recommended that a new independent entity be created to work with private industry in evaluating new concepts and recommending changes to regulatory agencies. Limited pilot tests would be required which would need to be carefully designed to avoid undue risks and ensure proper evaluation. Special vehicles could be allowed to operate under carefully controlled circumstances just as oversize and overweight vehicles are allowed to operate under special permits in many states. Changes in federal laws and regulations would be required to allow states to issue such permits on an expanded network of highways under the condition that a rigorous program of monitoring and evaluation be instituted.

Special Report 269 Summary     Market-Based Governance John D. Donahue, Joseph S. Nye, 2004-05-26 A Brookings Institution Press and Visions of Governance for the 21st Century publication. The latest in a series exploring twenty first century governance this new volume examines the use of market means to pursue public goals. Market based governance includes both the delegation of traditionally governmental functions to private players and the importation into government of market style management approaches and mechanisms of accountability. The contributors all from Harvard University assess market based governance from four perspectives. The demand side deals with new revised or newly important forms of interaction between government and the market where the public sector is the customer. Chapters in this section include Steve Kelman on federal procurement reform Karen Eggleston and Richard Zeckhauser on contracting for health care and Peter Frumkin. The supply side section deals with unsettled questions about government's role as a provider rather than a purchaser within the market system. Contributors include Georges de Menil Frederick Schauer and Virginia Wise. A third section explores experiments with market based arrangements for orchestrating accountability outside government by altering the incentives that operate inside market institutions. Chapters include Robert Stavins on market based environmental policy Archon Fung on social

markets and Cary Coglianese and David Lazer The final section examines both the upside and the downside of the market based approach to improving governance Contributors include Elaine Kamarck John D Donahue Mark Moore and Robert Behn An introduction by John D Donahue frames market based governance as an effort to engineer into public work some of the intensive accountability that characterizes markets without surrendering the extensive accountability of conventional government A preface by Joseph S Nye Jr sets the book in the context of a larger inquiry into the future of governance
