Between the Lines Kenneth Brophy, 2015-10-05 Reading Between the Lines The Neolithic Cursus Monuments of Scotland is the first systematic analysis of Scotland's cursus monuments and is written by one of the foremost scholars of the Neolithic in Scotland Drawing on fifteen years of experience of cropmark interpretation as well as his involvement in several excavations of cursus monuments and contemporary sites Kenneth Brophy uncovers some of the secrets of the Neolithic landscape While outlining the physical characteristics of the cursus this book also addresses the limitations of this kind of typological description when applied to monuments which varied so remarkably in terms of materiality and size Moving beyond a morphological account Brophy considers what can be said of this diverse group of sites and how they were actually built and used in prehistory in light of several decades of aerial reconnaissance and excavation in Scotland Through a close study of the differences as well as the similarities between these structures this book offers a nuanced account of cursus monuments finally allowing this important monument type to be better understood and placed alongside others of the period Offering exciting new ways of thinking about these enigmatic yet important monuments Reading Between the Lines The Neolithic Cursus Monuments of Scotland is an essential resource for students and specialists in British prehistory providing an introduction to the Early Neolithic archaeology of lowland Scotland as well as a meditation on broader aspects of monumentality and architecture An Easy Guide To British History Joan Green, 2011-03-16 A history of the remarkable events that have made the British race and culture over the past 15 000 years The only consecutive history of Britain in print Easy reading and thought provoking for the student history lover and general reader Strongholds of the Picts Angus Konstam, 2013-02-20 When the Romans withdrew from Britain the north of the country was ruled by the mysterious ancient British race the Picts Much of what is known about these painted warriors comes from the remains of the fortifications that they left scattered around Scotland Although the Picts are famous as sea raiders they were also subjected to attacks from a number of opponents To their south the Romano British reoccupied the abandoned Roman fortifications and hired Saxon mercenaries to strike against the Picts Meanwhile from the west a new group the Scoti attacked from Ireland This book covers the fortification of the ancient Picts in all their conflicts and discusses the importance of these sites as religious centres and seats of power while using up to date archaeological evidence to help unravel the mystery of this ancient race

Tourism in Peripheral Areas Frances Brown,Derek D. Hall,Derek R. Hall,2000-08-31 There has been little research on tourism in those European countries or regions which lie outside the continent's main centres of production and population even though tourism may be one of the few economic options open to them This volume aims to fill a gap by presenting a range of case studies including northern Sweden the Orkneys the tip of Norway and northern Cyprus on tourism in the peripheral areas of Europe Taking as a leitmotiv the paradoxes inherent in developing places whose very attraction may lie in their lack of development the case studies investigate and illustrate both the opportunities and the threats that tourism presents to peripheral areas Although they share certain similarities the cases also demonstrate differing approaches to tourism development and varying outcomes over time They suggest solutions for dealing with for example community participation as well as providing practical insights into visitor perceptions of peripheral areas and into ways of marketing such areas in a sensitive manner Together they provide a picture of the needs of peripheral areas and of how far and how best tourism can fulfil those needs

Princes of the Church David Rollason, 2017-06-14. *Princes of the Church* brings together the latest research exploring the importance of bishops' palaces for social and political history, landscape history, architectural history and archaeology. It is the first book-length study of such sites since Michael Thompson's *Medieval Bishops Houses* 1998 and the first work ever to adopt such a wide-ranging approach to them in terms of themes and geographical and chronological range. Including contributions from the late Antique period through to the eighteenth and nineteenth centuries, it deals with bishops' residences in England, Scotland, Wales, the Byzantine Empire, France and Italy. It is structured in three sections: design and function, which considers how bishops' palaces and houses differed from the palaces and houses of secular magnates in their layout, design, furnishings and functions; landscape and urban context, which considers the relationship between bishops' palaces and houses and their political and cultural context, the landscapes and towns or cities in which they were set, and the parks, forests and towns that were planned and designed around them; and architectural form, which considers the extent of shared features between bishops' palaces and houses and their relationship to the houses of other Church potentates and to the houses of secular magnates.
