White,2023-07-07 This is the second collection of studies by Stephen D White to be published by Variorum the first being *Feuding and Peace Making in Eleventh Century France* The essays in this volume look principally at France and England from Merovingian and Anglo Saxon times up to the 12th century They analyze Latin and Old French discourses that medieval nobles used to construct their relationships with kin lords men and friends and investigate the political dimensions of such relationships with particular reference to patronage clientage the use of land as an item of exchange and feuding In so doing the essays call into question the conventional practice of studying kinship and feudalism as independent systems of legal institutions and propose new strategies for studying them **Feudalism,**

Monarchies, and Nobility Jeanne Nagle, 2014-07-15 Stories of pageantry associated with kings queens and the upper class have long captivated readers of all ages The reality behind how these entities have operated within set governmental systems has not always been as glamorous as these tales but it retains an allure of its own nonetheless This book provides a firm grounding in the historic political social and economic implications of rule by monarchy including the prevalence of the feudal system in medieval Europe Modern monarchies and the role of the aristocracy in every age are also detailed

Feudal Society in Medieval France Theodore Evergates, 2011-06-03 Theodore Evergates has assembled translated and annotated some two hundred documents from the country of Champagne into a sourcebook that focuses on the political economic and legal workings of a feudal society uncovering the details of private life and social history that are embedded in the official records

Davies, 2009 It is well known that political economic and social power in the British Isles in the Middle Ages lay in the hands of a small group of domini lords In his final book the late Sir Rees Davies explores the personalities of these magnates the nature of their lordship and the ways in which it was expressed in a diverse and divided region in the period 1272 1422

Although their right to rule was rarely questioned the lords flaunted their identity and superiority through the promotion of heraldic lore the use of elevated forms of address and by the extravagant display of their wealth and power

The Lordship of England Scott L. Waugh, 2014-07-14 This thorough examination of the feudal powers of English kings in the thirteenth and early fourteenth centuries is the only study to analyze the actual pattern of royal grants and the grantees use of their rights and to place them in the social context of marriage kinship and landholding within the English elite The royal rights known as feudal incidents included custody of a tenant s lands when he died leaving minor heirs the

arrangement of the heir's marriage and consent to the widow's remarriage Scott Waugh shows how the king exercised those rights and how his use of feudal incidents affected his relations with the tenants in chief He concludes that royal lordship was of fundamental importance in reinforcing the power and prestige of the monarchy and in offering the king a valuable source of patronage English kings therefore devoted considerable effort to defining and institutionalizing their feudal authority in the thirteenth century It is also clear that families living under royal lordship were profoundly concerned about these rights especially since marriage was of such critical importance in providing for the smooth transfer of lands from one generation to another Given the hazards of life in the Middle Ages inheritance by minors was a frequent occurrence and the king's distribution of feudal incidents was therefore a delicate political problem It raised issues not only about royal finances and favoritism but also about the fate of families Originally published in 1988 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Lordship and Locality in the Long Twelfth Century Hannah Boston, 2024 A new perspective on lordship in England between the Norman Conquest and Magna Carta Multiple lordship that is holding land or owing allegiance to more than one lord simultaneously was long regarded under the western European feudal model as a potentially dangerous aberration and a sign of decline in the structure of lordship Through an analysis of the minor lords of Leicestershire Derbyshire and Staffordshire during the long twelfth century this study demonstrates conversely that multiple lordship was at least as common as single lordship in this period and regarded as a normal practice and explores how these minor lords used the flexibility of lordship structures to construct localised centres of authority in the landscape and become important actors in their own right Lordship was moreover only one of several forces which minor lords had to navigate Regional society in this period was profoundly shaped by overlapping ties of lordship kinship and locality each of which could have a fundamental impact on relationships and behaviour These issues are studied within and across lords' honours around religious houses and urban areas and in a close case study of the abbey of Burton upon Trent This book thus contextualises lordship within a wider landscape of power and influence

Episcopal Power and Ecclesiastical Reform in the German Empire John Eldevik, 2012-08-06 This book explores how bishops used the medieval tithe as a social and political tool in eleventh century Germany and Italy

Vassals, Heiresses, Crusaders, and Thugs Hugh M. Thomas, 2016-11-11 In recent decades works of the gentry have revolutionized our understanding of late medieval and early modern England In *Vassals Heiresses Crusaders and Thugs* Hugh M Thomas takes the study of the gentry back to the period 1154-1216 His conclusions not only reveal remarkable similarities between the gentry of various periods but also shed light on the massive changes that transformed

England in the Angevin Period The Origins of Peasant Servitude in Medieval Catalonia Paul Freedman, 2004-01-22 This 1991 book is an examination of Catalonian peasants in the Middle Ages integrating archival evidence with medieval theories of society The Lordship of Ireland in the Middle Ages James F. Lydon, 2003 The lordship of Ireland in the middle ages was vested in the English crown by the famous grant of Pope Adrian IV in 1155 resulting in the invasion of 1169 This book shows how that lordship developed and the heritage it passed on to later generations It is not wholly a narrative but is thematic in its approach examining the emergence of the Anglo Irish identity the growth of separatism both politically and culturally and the survival of Gaelic Ireland The resulting conflict between the two traditions helped to create the situation out of which modern Ireland was to emerge Professor Lydon's book presented here in a new annotated edition with full apparatus is a highly readable and scholarly overview of four centuries of Irish political history **Lordship in the County of Maine, C. 890-1160** Richard Ewing Barton, 2004 The vision and chronology of tenth and eleventh century lordship on offer here departs from the model of feudal mutation and emphasizes two major themes the centrality of intangible charismatic elements of honor prestige and acclamation and the lack of foundation for any notion of feudal transformation while acknowledging changes in the geography of power across the tenth and eleventh centuries the argument insists that the practicalities of the practice of lordship remained essentially the same between 890 and 1160 BOOK JACKET *Routledge Revivals: Medieval France (1995)* William W.
