The Multinational History of Strasbourg Astronomical Observatory Andre HECK, 2006-04-04 Strasbourg Astronomical Observatory is quite an interesting place for historians several changes of nationality between France and

Germany high profile scientists having been based there big projects born or installed within its walls and so on Most of the documents circulating on the history of the Observatory and on related matters have however been so far poorly referenced if at all This made necessary the compilation of a volume such as this one offering fully documented historical facts and references on the first decades of the Observatory history authored by both French and German specialists The experts contributing to this book have done their best to write in a way understandable to readers not necessarily hyperspecialized in astronomy nor in the details of European history Several appendices conclude the book lists of council members and of Observatory scientific personnel as well as a compendium of the institutional publications until the year 2000 [A](#)
