Molecules of Nature Paul F. Torrence,2017-12-13 Molecules of nature are created by living organisms in their quest to survive and thrive in Earth s challenging environments This ages old evolutionary struggle has produced an immense library of chemicals from which humans have selected invaluable therapeutics critical to modern medicine Natural products presently provide half of all prescription medications and 70% of all cancer drugs The success of continued drug development from natural products depends upon the diversity of molecules of nature which in turn depends upon biodiversity Unfortunately human caused damage to the environment from pollution to habitat loss to overexploitation of resources is causing unprecedented ecological damage and death of species a mass extinction event Unless this biotic crisis is obviated humanity will lose a primary source of future novel medicines This book assembles a powerful argument for

nature's critical role in providing medicines for humanity and how that irreplaceable service is threatened by the extinction crisis. A sampling of the molecules of nature employed in modern medicine reads like a catalog of biodiversity. For example, one of the most prescribed drugs in the United States is lisinopril, which controls high blood pressure. Lisinopril originated from the venom of a deadly viper from the Amazonian forests. A denizen of US southwestern deserts provided a therapeutic for type II diabetes. The ancient horseshoe crab of the US Atlantic coast enables a critical test for deadly endotoxins in medical products of all kinds. Once a diagnosis of acute lymphocytic leukemia in children was a death sentence. A tropical flower from Madagascar provided two natural products that changed a 90% fatality rate to a 90% cure rate. The Pacific Yew tree from the US northwest was discovered to contain the potent anticancer agent Taxol, now vital in the treatment of breast and ovarian cancers and Kaposi's sarcoma. This book tells the fascinating story of these and other medicines. It also summarizes some of the driving forces of the Sixth Mass Extinction and shows how it threatens at least half of the planet's species with extinction. We rightly ask: What will be the future of medicine without the contribution of millions of species? How many treatments for disease will be forever lost? What cures are we asking future generations to forgo? As we willy nilly extinguish the future of one organism after another together with all the knowledge they hold, we are like the looters of the Great Library of Alexandria. The final chapter challenges readers to pursue a different outcome. By uniting our efforts, we can still preserve many of the remaining species on our blue-green planet and the invaluable gifts they offer. *Red Snow*

Michael Slade, 2024-08-06. In this mind-bender about a psychopath seeking revenge, the plot yanks you compulsively toward its solution, and the shocks make you jerk back in fright. Toronto Star. The Winter Olympics are coming to western Canada, but the mood is far from celebratory when a snowboarder is murdered on the slopes, his corpse mutilated. And he's only the first athlete to suffer a grisly end. Soon a raging winter storm and a deranged killer's team of mercenaries has cut Whistler Mountain off from the rest of the world. It's a whodunit especially suited to the Special X team, which specializes in psychopathic behavior. Except an old enemy is targeting team commander Robert DeClercq. Bent on bloody revenge, Mephisto has an elaborate plan that includes assassinating anyone connected with the Canadian Mounties. And that's just the start of this megalomaniac's horrific doomsday scheme. Let the games begin. As always with Slade, a cracking good detective story. Anne Perry, New York Times bestselling author of the Thomas Pitt series. *Red Snow* is crisply written, sly, and exciting. Michael Slade is a writer who clearly knows how to tell a story and make it real. Robert McCammon, New York Times bestselling author of *Swan Song* and the Matthew Corbett series. *Red Snow* indeed. This one is guaranteed to keep you awake with the lights burning. The Globe and Mail, Toronto. In the annals of dark fiction, Canada can claim one true champion in Michael Slade. The plot yanks you compulsively toward its solution, and the shocks make you jerk back in fright. Toronto Star. Very good twists and a great villain, Mephisto, who seems to have attained a new level of insanity. Is the kind of homicidal maniac you can't take your eyes off. The writing is tight and compelling. Winnipeg Free Press. *The River Sea* Marshall DeBruhl, 2011-11-08. Since

its discovery by Europeans in 1500 explorers visionaries soldiers of fortune men of God scientists and slavers have been drawn to the legendary Amazon The River Sea is a sweeping chronicle of those brave and hardy souls ranging from the Spanish seafarer Vicente Pinzón who discovered the river to contemporary heroes and heroines like Sister Dorothy Stang and Chico Mendes whose efforts to save the rain forest cost them their lives Among the vast cast of characters who people this drama of the Amazon are Francisco de Orellana the first European to traverse the river from the Andes to the sea the fiery priest Bartolomé de las Casas defender of the indigenous peoples the great scientist explorers Alexander von Humboldt and Alfred Russel Wallace the madman and psychopath Lope de Aguirre and the Peruvian Evangeline Isabel Godin who in 1769 crossed the continent braving the terrors of the jungles to reunite with her husband whom she had not seen in twenty years The River Sea is a compelling account of five centuries of the history the myths and the legends of Rio Amazonas the most exotic and fascinating locale on earth
