Modeling of Curves and Surfaces in CAD/CAM Mamoru Hosaka, 2012-12-06 1 Aims and Features of This Book The contents of this book were originally planned to be included in a book entitled Geometric Modeling and CAD/CAM to be written by M Hosaka and F Kimura but since the draft of my part of the book was finished much earlier than Kimura's we decided to publish this part separately at first In it geometrically oriented basic methods and tools used for analysis and synthesis of curves and surfaces used in CAD/CAM various expressions and manipulations of free form surface patches and their connection interference as well as their quality evaluation are treated They are important elements and procedures of geometric models And construction and utilization of geometric models which include free form surfaces are explained in the application examples in which the methods and the techniques described in this book were used In the succeeding book which Kimura is to write advanced topics such as data structures of geometric models non manifold models geometric inference as well as tolerance problems and product models process planning and so on are to be included Consequently the title of this book is changed to Modeling of Curves and Surfaces in CAD/CAM Features of this book are the following Though there are excellent text books in the same field such as G Farin's Curves and Surfaces for CAD/CAM I and C M
