**Modelling of Livestock Production Systems** S. Korver, J.A.M. van Arendonk, 1988-03-31 A seminar in the Community Programme for the Coordination of Agricultural Research held in Brussels Belgium April 7 9 1987 *Mathematical Modelling of Livestock Production Systems* International Livestock Centre for Africa, 1978 **Mathematical Modelling of Livestock Production Systems: Application of the Texas A&M University Beef Cattle Production to Botswana**, *Mathematical Modelling of Livestock Production Systems*, 1978 Modelling of Livestock Production Systems Commission of the European Communities, 1988 **Livestock Productivity and Trypanotolerance** International Livestock Centre for Africa, *Modelling of Extensive Livestock Production Systems* N. de Ridder, International Livestock Centre for Africa, 1986-01-01 ILCA's policy towards modelling in the framework of livestock systems research models and the analysis of productivity in extensive livestock systems in Israel prediction of actual primary production under nitrogen limitation behavioural aspects of intake at pasture in ruminants prediction of feed intake in ruminants relationships between chemical composition and voluntary intake of feeds by sheep and cattle the effect of breeding season duration on production and feed consumption in grazing beef cattle in the south of Israel adaptation of the Kahan model for a mixed farming system in southeastern Asia appraisal of the ILCA cattle herd dynamics model using data from pastoral systems in Mali and Kenya modeling pastoral livestock production problems and prospect analysis of management impact in semi arid agropastoral systems modelling economic outcomes of livestock production systems selection of sheep husbandry technologies under single and multiple goal constraints types purposes and users of models problems related to intake Mathematical Modeling of Livestock Production Systems, 1978 *Reducing greenhouse gas emissions from livestock production* Dr Richard Baines, 2021-07-20 A comprehensive review of both the causes of greenhouse gas emissions from livestock and the range of ways these emissions can be reduced Particularly strong focus on the range of nutritional strategies from forage and silage to feed supplements such as plant bioactive compounds and direct fed microbials as well as inhibitors and vaccines Covers other approaches such as genetics and selection improved husbandry as well as manure management *The Economics of Animal Health and Production* Jonathan Rushton, 2009 The efficient functioning of the livestock sector encompassing all facets of input supply production processing and marketing is critical for food security and safety This book draws on both extensive literature and experience in animal health economics and livestock issues in Europe Asia Africa and Latin America It provides comprehensive coverage of the history of livestock and animal health economics theory and tools for the economics of animal health and production a review of the application of economics to animal diseases and health problems and worldwide examples of economic analysis and policy making , **Advances in crop modelling for a sustainable agriculture** Emeritus Professor Ken Boote, 2019-12-03 Focus on development of next generation of whole farm models to improve decision making and support for farmers Addresses the challenges of combining modular sub systems into whole

farm system models Reviews the performance of specific models such as APSIM and DSSAT **Modelling Vector-borne and Other Parasitic Diseases** Hansen, J.W (ed.),Brain D. Perry,1994-01-01 **Field and Laboratory Methods for Grassland and Animal Production Research** L. 't Mannetje,R. M. Jones,2000 Considers a range of methods used by plant and animal production scientists to study grassland vegetation and animal performance This volume replaces a previous title Measurement of Grassland Vegetation and Animal Production published in 1978 but incorporates many new topics

**Modelling Nutrient Digestion and Utilisation in Farm Animals** D. Sauvant,J. van Milgen,P. Faverdin,N. Friggens,2011-05-02 For more than 30 years modelling has been an important method for integrating in a flexible comprehensive and widely applicable way basic knowledge and biological concepts on digestion and metabolism in farm animals The purpose of this book is to present the state of art in this area The chapters are written by leading teams and researchers in this field of study mainly from Europe North America and Australasia Considerable progress has been made in topics dealing with modelling methods feeding behaviour digestion and metabolic processes in ruminants and monogastric animals This progress is clearly illustrated by the emergence of a new paradigm in animal nutrition which has moved from the aim to cover the requirements of the animal to explaining and predicting the responses of the animals to diets e g productivity and efficiency impact on quality of products environmental aspects health and well being In this book several chapters illustrate that through empirical models meta analysis is an efficient tool to synthesize information gathered over recent decades In addition compared with other books on modelling farm animal nutrition two new aspects received particular attention expanding knowledge of the individual animal to understanding the functioning and management of herds and the consideration of the environmental impact of animal production This book is a valuable source of information for researchers nutritionists advisors and graduate students who want to have up to date and concise information on mathematical modelling applied to farm animals **Managing Healthy Livestock Production and Consumption** Nadia El-Hage Scialabba,2021-12-02 Managing Healthy Livestock Production and Consumption is a highly interdisciplinary resource based on scientific and empirical evidence It is illustrated with best practices of low input livestock systems from different continents and offers predictive modelling alternatives for a more resilient future By addressing gaps of knowledge and presenting scientific perspective studies of livestock s impact on the environment and the global food supply up to 2050 this book is useful for those advocating for sustainable food systems Existing evidence of the effects of livestock production on food quality and nutrition is reviewed Livestock production and consumption is a highly diverse topic where current publications only include focus a single aspect of the issues for example greenhouse gas emissions or health impacts leading to unilateral decisions such as refraining from meat consumption However animals are necessary to soil fertility and ecosystems balance and a more realistic resource is necessary for researchers scientists and policy makers This book clarifies perceptions by presenting sound scientific evidence across livestock landscapes for the scientific community to

better appreciate the ecological web of life and the social web of community related to livestock production. An edited work written by globally diverse scientists and practitioners including field workers, technicians and policy makers, this is a valuable resource for researchers, teachers and development agents working in the area of sustainable livestock production and consumption of animal source foods. National, international organizations, policy makers and donors interested in sustainable development of the livestock sector will also find the information here practical and applicable. Describes the public health impacts of sustainable diets and livestock products. Presents the impacts of livestock production on the environment and food supply. Explores future scenarios up to 2050 of low input livestock systems. Includes current case studies of low input livestock systems that offer potential for scaling up and replication for sustainable livestock futures.

**Handbook on Climate Change and Agriculture** Ariel Dinar, Robert O. Mendelsohn, 2011-01-01. This book is a very useful resource for the lawyer. It makes a good start by presenting a wide ranging portfolio of multidisciplinary research that will assist in progressing the task, challenging though it may be. Chris Rodgers, *Environmental Liability*. This book explores the interaction between climate change and the agriculture sector. Agriculture is essential to the livelihood of people and nations, especially in the developing world; therefore any impact on it will have significant economic, social and political ramifications. Scholars from around the world and from various fields have been brought together to explore this important topic. The contributions found here analyze direct agronomic effects, the economic impacts on agriculture, agricultural impacts on the economy, agricultural mitigation and farmer adaptation. The authors argue that climate change is likely to have an extensive impact on agriculture around the world through changes in temperature, precipitation, concentrations of carbon dioxide and available water flows. This thorough and timely volume is an invaluable resource for anyone interested in exploring the impacts of climate change in arguably the most important sector of the world economy. Economists, agronomists and climate modelers in academia and the public sector, policy analysts and development agency staff and graduate/postgraduate students will find this remarkable volume a welcome addition to their collection.
