Christian theology proposing a much broader concept of health care An important contribution to a critical discussion *Tie a Knot and Hang on* Teresa Scheid, 2018-04-17 *Tie a Knot and Hang On* is an analysis of mental health care work that crosses the borders of diverse sociological traditions The work seeks to understand the theoretical and empirical linkages between environmental pressures and activities and how these intersect with organizations and individuals The work draws upon a research tradition that sees the issue of mental health care in terms of institutional pressures and normative values The author provides a description and a sociological analysis of mental health care work emphasizing the interaction of professionally generated norms that guide the emotional labor of mental health care workers and the organizational contexts within which mental health care is provided She concludes with a discussion of emerging institutional forces that will shape the mental health care system in the future These forces are having greater impact than ever before as managed care comes to have a huge fiscal as well as institutional impact on the work of mental health professionals Scheid's book is a brilliant nuanced effort to explain the institutional demands for efficiency and cost containment with the professional ethics that emphasize quality care for the individual The book is essential reading for those interested in mental health care organizations and the providers responding to these seemingly larger abstract demands The work offers a rich mixture not just of the problems faced by mental health care personnel but the equilibrium currently in place u an equilibrium that shapes the theory of the field no less than the activities of its practitioners Teresa L Scheid is associate professor of sociology at the University of North Carolina at Charlotte She has published widely in the area including major essays in *Sociology of Health and Illness* *Sociological Quarterly* *Perspectives on Social Problems* and *The Journal of Applied Behavioral Science*

History of Psychiatry and Medical Psychology Edwin R. Wallace, John Gach, 2010-04-13 Most of the prefatory issues are extensively elaborated upon in the *Prolegomenon* which also contains the complete references to the texts and authors discussed below Nevertheless the Preface would be grossly incomplete without touching on some of these issues books and scholars Too many of this book's chapters e g Mora's Marx's D B Weiner's examine and reference important earlier as well as contemporary general histories of psychiatry and specialized monographs in German French Italian and Spanish Also in his 1968 *Short History of Psychiatry* discussed below Ackerknecht pp xi xii references important nineteenth and earlier twentieth century psychiatric histories in English French and German Such citations will of course not be repeated here Finally thanks to several publishers re editions of dozens of classical psychiatric texts one can consult their bibliographies as well See *Prolegomenon* for references to these splendid series In a rough and ready sense medical history began in classical Greece for example *On Ancient Medicine* While traditionally included in the Hippocratic corpus this text seems more likely to have been written by a non or even anti Hippocratic doctor Moreover the Hippocratic and other schools were hardly as secular as we now suppose *On Epilepsy* for example does not so much declare the prevalent denotation of it as the sacred disease erroneous as it does that it is no more nor less sacred than any other disease
