Conference, 2004 Modern political anthropology began in 1940 with the first systematic comparative studies of how primitive societies maintained law and order The focus was on government and the presence or absence of state institutions Recently interest has shifted to the study of power to examining the manipulation of political relations and to the task of elaborating a classification of governmental systems that will throw light on the important problems for research First published in 1965 **Economic Models for Policy Making** Solomon Cohen, 2013-05-02 Over the past decades many different kinds of models have been developed that have been of use to policy makers but until now the different approaches have not been brought together with a view to enhancing the systematic unification and evaluation of these models This new volume aims to fill this gap by bringing together four decades worth of work by S I Cohen on economic modelling for policy making Work on older models has been rewritten and brought fully up to date and these older models have therefore been brought back to the fore both to assess how they influenced more recent models and to see how they could be used today The focus of the book is on models for development policies in developing

The British Prime Minister in the Core Executive Birgit

Bujard, 2018-07-21 This book examines the UK prime minister's political leadership in the domestic executive. By offering a comparative study of the political leadership of James Callaghan, Margaret Thatcher, John Major, and Tony Blair with regard to European monetary policy, it challenges the thesis that British prime ministers today have more power, resources, and autonomy than their predecessors, giving them a greater capacity to act. Taking key European monetary policy decisions by the British government between 1976 and 2007 as empirical cases, the book assesses the extent to which the political leadership of each prime minister was affected by the cabinet, the parliamentary party, as well as the media, and the extent to which he or she was able to manage these factors. It becomes clear from this analysis that prime ministerial predominance is not as frequent as suggested, while collective leadership does not represent a return to cabinet government. Moreover, particularly the party in government affects the prime minister's leadership by shaping his or her options on appointments, and therefore the composition of the core executive, and through its behaviour in parliament, e.g., through rebellions or the threat of them.

Chinese Models of Development Tse-Kang Leng, Yu-Shan Wu, 2014-11-20 Discussion of the Chinese Model abounds with the rise of China. This volume analyzes the Chinese case in a theoretical framework, provides an evolutionary perspective, and compares it with other models of development. Instead of focusing on one specific case, the book's contributors shed light on the application of theories of international relations, comparative politics, and development studies to the topic under deliberation. This book reflects that the uniqueness of the Chinese model should also be put in an historical and evolutionary context. It also provides insights into comparisons with other models of development, such as the East Asian model and experiences of the former Soviet Union. The authors in the book argue that while globalization constrains state power, it may also open new windows of accommodation and adjustments. Linkages between the domestic dynamics of development and external forces of change become pertinent in understanding the Chinese models of development.
