Ruttkamp, 2013-03-14 In this book Emma Ruttkamp demonstrates the power of the full blown employment of the model theoretic paradigm in the philosophy of science Within this paradigm she gives an account of sciences as process and product She expounds the received statement and the non statement views of science and shows how the model theoretic approach resolves the spurious tension between these views In this endeavour she also engages the views of a number of contemporary philosophers of science with affinity to model theory This text can be read by specialists working in philosophy of science or formal semantics by logicians working on the structure of theories and by students in philosophy of science this text offers a thorough introduction to non statement accounts of sciences as well as a discussion of the traditional statement account of science *Small Places, Large Issues* Thomas Hylland Eriksen, 2015-08-20 This introduction to social and cultural anthropology has become a modern classic revealing the rich global variation in social life and culture across the world Presenting a clear overview of anthropology it focuses on central topics such as kinship ethnicity ritual and political systems offering a wealth of examples that demonstrate the enormous scope of anthropology and the importance of a comparative perspective Unlike other texts on the subject *Small Places Large Issues* incorporates the anthropology of complex modern societies Using reviews of key works to illustrate his argument Thomas Hylland Eriksen s lucid and accessible overview remains an established introductory text in anthropology This fourth edition is updated throughout and increases the emphasis on the interdependence of human worlds It incorporates recent debates and controversies ranging from globalisation and migration research to problems of cultural translation and discusses the challenges of

interdisciplinarity in a lucid way **Selected Essays in Monetary Economics (Collected Works of Harry Johnson)** Harry Johnson, 2013-07-18 This volume consists of selected previously published key essays which have proved most useful for teaching advanced monetary economics A short introduction was added which places the selection of essays and the issues they cover in the contemporaneous context of simultaneous high inflation and high unemployment As relevant today as they were when they were first written they enable the reader to anticipate intelligently what is likely to happen and why

The anthropology of power, agency, and morality Victor de Munck, Elisa J. Sobo, 2022-06-07 The works of F G Bailey 1924 2020 provide a seminal template for good ethnography Central to this is Bailey s ability to conceptually connect the well described micro contexts of individual interactions to the macro context of culture Bailey s core concerns the tension between individual and collective interests the will to power and the dialectics of social forces which foster both collective solidarity as well as divisiveness and discontent are themes of universal interest the beauty of his work lies in his analyses of how these play out in local arenas between real people His models provide nuanced yet explicit road maps to analysing the

different leadership styles of everyday people and contemporary leaders This volume seeks to inspire new generations of anthropologists to revisit Bailey's seminal texts to help them navigate their way through the ethnographic thicket of their own research

A Theory of Legal Punishment Matthew Altman, 2021-05-05 This book argues for a mixed theory of legal punishment that treats both crime reduction and retribution as important aims of the state A central question in the philosophy of law is why the state's punishment of its own citizens is justified Traditionally two theories of punishment have dominated the field consequentialism and retributivism According to consequentialism punishment is justified when it maximizes positive outcomes According to retributivism criminals should be punished because they deserve it This book recognizes the strength of both positions According to the two tiered model the institution of punishment and statutory penalties as set by the legislature are justified based on their costs and benefits in terms of deterrence and rehabilitation The law exists to preserve the public order Criminal courts by contrast determine who is punished and how much based on what offenders deserve The

courts express the community's collective sense of resentment at being wronged. This book supports the two-tiered model by showing that it accords with our moral intuitions. It commonly held compatibilist theories of freedom and assumptions about how the extent of our knowledge affects our obligations. It engages classic and contemporary work in the philosophy of law and explains the theory's advantages over competing approaches from retributivists and other mixed theorists. The book also defends consequentialism against a longstanding objection that the social sciences give us little guidance regarding which policies to adopt. Drawing on recent criminological research, the two-tiered model can help us to address some of our most pressing social issues, including the death penalty, drug policy, and mass incarceration. This book will be of interest to philosophers, legal scholars, policymakers, and social scientists, especially criminologists, economists, and political scientists.

The Protohistoric Pueblo World, A.D. 1275-1600 E. Charles Adams, Andrew I. Duff, 2004-07-01. In the centuries before the arrival of Europeans, the Pueblo world underwent nearly continuous reorganization. Populations moved from Chaco Canyon and the great centers of the Mesa Verde region to areas along the Rio Grande, the Little Colorado River, and the Mogollon Rim, where they began constructing larger and differently organized villages, many with more than 500 rooms. Villages also tended to occur in clusters that have been interpreted in a number of different ways. This book describes and interprets this period of southwestern history immediately before and after initial European contact, A.D. 1275-1600, a span of time during which Pueblo peoples and culture were dramatically transformed. It summarizes one hundred years of research and archaeological data for the Pueblo IV period as it explores the nature of the organization of village clusters and what they meant in behavioral and political terms. Twelve of the chapters individually examine the northern and eastern portions of the Southwest and the groups who settled there during the protohistoric period. The authors develop histories for settlement clusters that offer insights into their unique development and the variety of ways that villages formed these clusters. These analyses show the extent to which spatial clusters of large settlements may have formed regionally organized alliances and, in some cases, they reveal a connection between protohistoric villages and indigenous or migratory groups from the preceding period. This volume is distinct from other recent syntheses of Pueblo IV research in that it treats the settlement cluster as the analytic unit. By analyzing how members of clusters of villages interacted with one another, it offers a clearer understanding of the value of this level of analysis and suggests possibilities for future research. In addition to offering new insights on the Pueblo IV world, the volume serves as a compendium of information on more than 400 known villages larger than 50 rooms. It will be of lasting interest not only to archaeologists but also to geographers, land managers, and general readers interested in Pueblo culture.

First Fieldwork Laura Zimmer-Tamakoshi, 2018-08-31. *First Fieldwork* Pacific Anthropology 1960-1985 explores what a generation of anthropologists experienced during their first visits to the field at a time of momentous political changes in Pacific island countries and societies and in anthropology itself. Answering some of the same how and why questions found in Terence E. Hays' *Ethnographic Presents: Pioneering Anthropologists in the Papua New Guinea*

Highlands 1993 First Fieldwork begins where that collection left off in the 1950s and covers a broader selection of Pacific Islands societies and topics Chapters range from candid reflections on working with little known peoples to reflexive analyses of adapting research projects and field sites in order to better fit local politics and concerns Included in these accounts are the often harsh emotional and logistical demands placed on fieldworkers and interlocutors as they attempt the work of connecting and achieving mutual understandings Evident throughout is the conviction that fieldwork and what we learn from and write about it are necessary to a robust anthropology By demystifying a phase begun in the mid 1980s when critics considered attempts to describe fieldwork and its relation to ethnography as inevitably biased representations of the unknowable truth First Fieldwork contributes to a renewed interest in experiential and theoretical nuances of fieldwork Looking back on the richest of fieldwork experiences the contributors uncover essential structures and challenges of fieldwork connection context and change What they find is that building relationships and having others include you in their lives once referred to as achieving rapport is determined as much by our subjects as by ourselves As they examine connections made or attempted during first fieldwork and bring to bear subsequent understandings and questions new contexts from which to view and think about their experiences the contributors provide readers with multidimensional perspectives on fieldwork and how it continues to inspire anthropological interpretations and commitment A crucial dimension is change Each chapter is richly detailed in history theirs ours colonial postcolonial and the then and now of theory and practice While change is ever present specifics are not Reflecting back the authors demonstrate how that specificity defined their experiences and ultimately their ethnographic re productions

King, 2012-12-06 IE King Michael Kalecki 1899 1970 was one of the most important and also one of the most underrated economists of the twentieth century In the 1930s he made a series of fundamental contributions to macroeconomic theory which anticipated complemented and in some ways surpassed those of Keynes Almost entirely self educated in economics and influenced much by Marxism as by mainstream theory Kalecki very largely escaped the fatal embrace of pre Keynesian orthodoxy which blunted the thrust of the General Theory Many Post Keynesians in particular have found in his work the elements of a convincing alternative to what Joan Robinson Kalecki's greatest advocate in the English speaking world was scathingly to describe as bastard Keynesianism But Kalecki was never interested in theory for its own sake He approached economics from a practical perspective wrote extensively on applied and policy questions and in the final decades of his life turned his attention increasingly to problems of economic development and the management of state socialist economies The Dialectics of Mission Elmer A.
