Westad,2013-10-14 Since the cold war ended it has become an international field of study with new material from China the former Soviet Union and Europe This volume takes stock of where these new materials have taken us in our understanding of what the cold war was about and how we should study it      [Air University Quarterly Review](#) ,1949      [The Air Force Law Review](#) ,1990

**Pearl to V-J Day** Jacob Neufeld,William T. Y'Blood,Mary Lee Jefferson,2000 In observance of the 50th

anniversary of the end of World War II the Air Force History and Museums Program sponsored a symposium on the War in the Pacific held at the Bethesda MD Naval Officers Club The gathering offered a unique opportunity for its guest panelists participants in that war or historians of it to reflect on a variety of subjects Japanese objectives American military preparedness and grand strategy the interaction between U S Army Air and Navy leaders combined operations political and diplomatic intrigue the challenges of ground air and sea warfare within differing Pacific theaters military science and technology the essential role of intelligence the proposed Allied invasion of the Japanese home islands and the use of the atomic bombs For the United States World War II began and ended in the Pacific from Japan s aerial attack on Pearl Harbor on December 7 1941 to its surrender in Tokyo Bay on September 2 1945 For all but 5 months of those years Americans and their Allies were compelled to hold the line in Asia doggedly opposing imperialist Japan while a Europe First policy against Nazi Germany and fascist Italy prevailed in the Atlantic and Mediterranean The United States operated over huge distances from China Burma and India to countless Pacific islands Sixty five photographs are included     *Grace Hopper* Kathleen Broome Williams,2013-01-15 When Grace Hopper retired as a rear admiral from the U S Navy in 1986 she was the first woman restricted line officer to reach flag rank and at the age of seventy nine the oldest serving officer in the Navy A mathematician by training who became a computer scientist the eccentric and outspoken Hopper helped propel the Navy into the computer age She also was a superb publicist for the Navy appearing frequently on radio and television and quoted regularly in newspapers and magazines Yet in spite of all the attention she received until now Amazing Grace as she was called has never been the subject of a full biography Kathleen Broome Williams looks at Hopper s entire naval career from the time she joined the WAVES and was sent in 1943 to work on the Mark I computer at Harvard where she became one of the country s first computer programmers Thanks to this early Navy introduction to computing the author explains Hopper had a distinguished civilian career in commercial computing after the war gaining fame for her part in the creation of COBOL The admiral s Navy days were far from over however and Williams tells how Hopper already past retirement age was recalled to active duty at the Pentagon in 1967 to standardize computer programming languages for Navy computers Her temporary appointment lasted for nineteen years while she standardized COBOL for the entire department of defense Based on extensive interviews with colleagues and family and on archival material never before examined this biography not only illuminates Hopper s pioneering accomplishments in a field that came to be dominated by men but provides a fascinating overview of computing from its beginnings in World War II to the late 1980s     *Orientation Fact Sheets* ,1949     [The Nuclear Spies](#) Vince Houghton,2019-09-15 Why did the US intelligence services fail so spectacularly to know about the Soviet Union s nuclear capabilities following World War II As Vince Houghton historian and curator of the International Spy Museum in Washington DC shows us that disastrous failure came just a few years after the Manhattan Project s intelligence team had penetrated the Third Reich and knew every detail of the Nazi s plan for an atomic bomb What changed and what

went wrong Houghton's delightful retelling of this fascinating case of American spy ineffectiveness in the then new field of scientific intelligence provides us with a new look at the early years of the Cold War During that time scientific intelligence quickly grew to become a significant portion of the CIA budget as it struggled to contend with the incredible advance in weapons and other scientific discoveries immediately after World War II As *The Nuclear Spies* shows the abilities of the Soviet Union's scientists its research facilities and laboratories and its educational system became a key consideration for the CIA in assessing the threat level of its most potent foe Sadly for the CIA scientific intelligence was extremely difficult to do well For when the Soviet Union detonated its first atomic bomb in 1949 no one in the American intelligence services saw it coming

**Disease Emergence and Resurgence** Milton Friend,2006 **I'd Much Rather Laugh! Preferisco Ridere!** Vincent Licitra,2013-02 Do not read this book if you are weak scared or otherwise indifferent to the world around you Put this book down if you could care less about America and Americans or if you tire easily are distracted quickly and would rather be superficially entertained while consuming a large bucket of popcorn Stay away if you are content with your lot in life or do not believe in the power of love or the ability of the underdog to overcome hatred and evil intent on pressing down on the lives of your fellow man Don't pick this book up because it can impact your world in ways you may not be prepared to experience This is a story of my life as I've lived it and as I've come to see all things including struggle envy scorn individualism prejudice and politics The future must be confronted for it is always but one second removed from the present Prepare to face your destiny and live a little If you are still in possession of this written material let me thank you for being at least willing to think outside the box for examining the possibility of being willing to live outside the box and perhaps for participating in a movement to utterly destroy the box we've all been placed in which in its current set up permits not the realization of American democracy God Speed

[American War Plans 1945-1950](#) Steven T. Ross,2013-10-18 In late 1945 it became clear that the Soviet Union was an aggressive power American military planners began to develop strategies to deal with the frightening possibility of a war with the Soviet Union This work examines those plans

*Creating the National Security State* Douglas Stuart,2012-06-24 For the last sixty years American foreign and defense policymaking has been dominated by a network of institutions created by one piece of legislation the 1947 National Security Act This is the definitive study of the intense political and bureaucratic struggles that surrounded the passage and initial implementation of the law Focusing on the critical years from 1937 to 1960 Douglas Stuart shows how disputes over the lessons of Pearl Harbor and World War II informed the debates that culminated in the legislation and how the new national security agencies were subsequently transformed by battles over missions budgets and influence during the early cold war Stuart provides an in depth account of the fight over Truman's plan for unification of the armed services demonstrating how this dispute colored debates about institutional reform He traces the rise of the Office of the Secretary of Defense the transformation of the CIA and the institutionalization of the National Security Council He also illustrates how the development of this network of

national security institutions resulted in the progressive marginalization of the State Department Stuart concludes with some insights that will be of value to anyone interested in the current debate over institutional reform     **Air University Review**
