modern Greek [R. Mudie]. Robert Mudie,1825 The Public Private House Richard Woditsch,2018 Throughout the twentieth century the ancient city of Athens underwent a massive transformation into simple sets of apartment blocks or polykatoikia Today these multifamily residential units define the city s landscape from center to periphery and house a majority of Greece s population Yet specific circumstances and cultural patterns set Athens s transformation apart from the arrival of architectural modernity in other countries and what has emerged in Athens is a distinctly Greek variety of modern urban development The Public Private House examines Athens s urban character and the apparently unlimited adaptability of polykatoikia In the first part of the book a photoessay offers an overall impression of Athens and its signature housing structure The second part of the book investigates historic developments the genuinely democratic process of urban planning

in the city and comparisons with Le Corbusier's Dom-ino system as well as exogenous factors such as crucial social aspects and the impact of Athens's strict building code. The concluding third part provides an illustrated analysis of Athens's most notable examples of polykatoikia and of current developments in Greece contributing to the building type's decline.

The Creation of Modern Athens Eleni Bastéa, 1999-10-13 *The Creation of Modern Athens: Planning the Myth* is the first book to examine the urban development of Athens in the nineteenth century. Analyzing the process of architectural and urban design, Eleni Bastéa reveals the multiple and often conflicting interpretations of the new city. By following two parallel processes—the building of the new capital and the construction of a new national Greek identity—Bastéa demonstrates that Athens's elaborate urban design and civic architecture reflected both international neoclassical ideals as well as the national aspirations of the modern Greek nation.

Modern Europe Fanny E. Coe, 1892 Builders, Housewives and the Construction of Modern Athens Ioanna Theodoropoulou, 2022-09-15 *Builders, Housewives and the Construction of Modern Athens* reassesses the explosive growth of postwar Athens through its most distinctive building type: the polykatoikia and its different connotations through the decades, from a monotonous and ugly element of the city to the role it might play in the urban sustainability. Sprawling beneath the Acropolis, modern Athens is commonly viewed in negative terms: congested, ugly, and monotonous. *Builders, Housewives and the Construction of Modern Athens* questions this stereotype, reassessing the explosive growth of postwar Athens through its most distinctive building type: the polykatoikia, a small-scale, multi-story apartment block. Theodoropoulou re-evaluates the polykatoikia as a low-tech, easily constructible innovation that stimulated the postwar urban economy, triggering the city's social mid-twentieth-century transformation. The interiors of the polykatoikia apartments reflect a desire for modernity as marketed to housewives through film and magazines. Regular builders became unlikely allies in designing these polykatoikia interiors, enabling inhabitants to exert agency over their daily lives and the shape of the postwar city. This revised edition of Theodoropoulou's study draws on popular media as well as urban and regional planning theory, cultural studies, and anthropology to examine the evolution of this phenomenon. Written in the light of Greece's recent financial crisis, the book's updated Postscript considers the role polykatoikia might play in building an equitable and sustainable twenty-first-century city.
