**National Library of Medicine Current Catalog** National Library of Medicine (U.S.), **Hepatobiliary Diseases** Jesus Prieto, Joan Rodes, David A. Shafritz, 2012-12-06 The last few years have witnessed major developments in molecular biology which have had a significant impact on biomedical knowledge As a result new concepts in cell biology have emerged new etiologic agents have been discovered and new drugs have become available Furthermore the world of mediators cytokines and humoral factors has enlarged considerably in a relatively short period and this has modified our views of diverse physio pathologic processes as well as opened up new therapeutic prospects In addition recent technologic advances have revolutionized our diagnostic methodology and have greatly enhanced the power of our therapeutic resources All these factors have contributed to a substantial remodeling of both liver science and clinical hepatology and these changes have generated the motivation for the production of the present book which attempts to give an account of well known clinical facts in the light of current thinking It is the fruit of the coordinated work of experts from different countries in three continents In a sense it is a manifestation of the fact that inter national cooperation is becoming increasingly important not only in the expansion of science but also in its exposition We hope that Hepatobiliary Diseases will be useful to both students

and clinicians and that internists gastroenterologists and general practitioners will find in its contents a satisfactory coverage of their field of interest *Gastrointestinal and Liver Pathology E-Book* Christine A. Iacobuzio-Donahue, 2011-06-01

**Ultrastructure of the Digestive Tract** P. Motta, H. Fujita, 2012-12-06 When established four years ago the scope of this international series in electron microscopy essentially was to provide an opportunity for the publication of selected review contributions by specialists in ultrastructural research Previous volumes presented over the last three years have focused on special topics of present interest in contemporary biomedicine such as endocrine cells reproduction and connective tissues In these fields in fact integrated methods of electron microscopy have contributed much to generate new ideas and concepts of general value in both basic and clinical applications The Ultrastructure of the Digestive Tract basically follows the same guidelines and style of the other books in the series and is an invited collection of selected contributions of authors from various laboratories active in the field of electron microscopy Therefore although the various chapters consist of individual topics they nevertheless should be considered as interrelated contributions of specific subjects in the field The idea was to have critical reviews of aspects previously published elsewhere by experts in the field who as a rule include other relevant information in their articles in

order to update and enrich the subject This book contains fifteen chapters by renowned electron microscopists Each chapter according to the policy of the editors reviews a particular topic in great detail providing updated information study methods and results authors ideas on future investigative approaches and possible guidelines for forthcoming work We hope that this book will be useful to cell biologists morphologists physiologists and pathologists

**Anaesthesia, Pain, Intensive Care and Emergency Medicine — A.P.I.C.E.** A. Gullo, 2012-12-06 Continuous update in critical care medicine is a real challenge due to the growing dimensions of its contents these elements are the result of new research acquisitions and of those clinical situations where the physician is able to intervene at a given moment with the use of effective prevention techniques They are also the result of new technologies able to define complex sub clinical diagnostic aspects lastly they are the result of effective therapeutic techniques available and of treatment strategies able to influence radically and positively the patient s clinical course Critical care medicine is playing a key role in the most advanced environments as it represents a cross sectional field of action involving several specialties such as anesthesiology general medicine surgery pediatrics
