Division of Organic Coatings and Plastics Chemistry, 1978      Canmaking Terry A. Turner, 2013-04-17 Metal protection including both metal treatments and coating systems affords mutual protection for both can and contents this book is the first reference to meld the knowledge of chemical companies and canmaking companies covering materials and processes used in both protective and decorative aspects of metal packaging Topics include basic substrates aluminum and steel demands of the markets served basic metal forming processes and the specific decorative and protective needs of different packaging types with emphasis given to the technologies most likely to be used such as ultraviolet curing This practical reference gives readers a background and familiarity with terminology and technology and gives insight into why certain technologies are used over others      *Food Packaging* Gordon L. Robertson, 1998-01-15 Presents a comprehensive background on the development of packages and packaging systems for foods examining the aspects of packaging technology that are relevant to the processing preservation distribution and marketing of a particular food and the areas of food science and technology that influence the packaging process This book is designed to be of interest to food scientists and technologists packaging engineers designers and technologists quality assurance personnel and upper level undergraduate and graduate students in these disciplines

**Canmaking for Can Fillers** T. A. Turner, 2001 Ranging from the highly professional global players who buy and fill billions of cans to family concerns in third world countries where hundreds or even thousands of cans may be filled can fillers around the world operate at many different levels of sophistication Canmaking for Can Fillers addresses the enterprise of canmaking It discusses what is possible and what is not and it explains why a particular container may be appropriate in some markets but not in others The material also explores potential developments in the canmaking industry This book is a tremendously valuable reference for packaging technologists in food and beverage companies buyers of packaging in these companies and designers of structural packaging      **Packaging Abstracts**, 1979      The Canning of Fish and Meat R. J. Footitt, 2012-12-06 Canning as a preservation process has proved its value in its contribution to the preservation distribution and storage of world food supplies and is a traditional way of preserving fish and meat With increasing concern for the environment it has much to offer with its use of readily recyclable container materials and product stability at ambient conditions as well as long life For some foods such as fish and meat the character of the canned product has become an accepted and sought after quality by the consumer but for other foods other methods of preservation have delivered a fresher character However there is a growing realisation that these other methods of preservation of foods carry critical control

requirements through the whole distribution chain which considered together with environmental implications of energy usage and packaging recycling potential has led to a resurgence of interest in canning. Increasingly in the major markets legislative control of fish canning is following and extending the style previously only applied to canned meat with enormous implications for fish canneries worldwide.

*Chemical Vapour Deposition* Anthony C. Jones, Michael L. Hitchman, 2009. The book is one of the most comprehensive overviews ever written on the key aspects of chemical vapour deposition processes and it is more comprehensive technically detailed and up to date than other books on CVD. The contributing authors are all practising CVD technologists and are leading international experts in the field of CVD. It presents a logical and progressive overview of the various aspects of CVD processes. Basic concepts such as the various types of CVD processes, the design of CVD reactors, reaction modelling and CVD precursor chemistry are covered in the first few chapters.
