Bryan Collester,1979 Annotated bibliography and guide to information sources EC countries regional cooperation economic integration economic relations relevant periodicals and recommended holdings for small or private libraries Nationalism and Private Law in Europe Guido Comparato,2014-12-01 While the internationalisation of society has stimulated the emergence of common legal frameworks to coordinate transnational social relations private law itself is firmly rooted in national law European integration processes have altered this state of affairs to a limited degree with a few albeit groundbreaking interventions that have tended to engender resistance from various actors within European nation states Against that background this book takes as its point of departure the need to understand the process of legal denationalisation within broader political frameworks In particular it seeks to make sense of opposition to Europeanisation at this point in the evolution of European law when despite growing nationalist attitudes great efforts have been made to produce comprehensive legal instruments to synthesise general contract law an area that has traditionally been solely within the ambit of nation states Combining insights from the disciplines of law

history and political science the book investigates the conceptual and cultural associations between law and the nation state examines the impact of nationalist ideas in modern legal thought and reveals the nationalist underpinnings of some of the arguments employed against and somewhat paradoxically even in support of legal Europeanisation The author's research for this book has been supported by the Hague Institute for the Internationalisation of Law **Authoritarian Liberalism and** the Transformation of Modern Europe Michael A. Wilkinson, 2021-06-10 This title recounts the transformation of Europe from the post war era until the Euro crisis using the tools of constitutional analysis and critical theory. The central claim is twofold Europe has been gradually reconstituted in a manner that combines political authoritarianism with economic liberalism and that this order is now in a critical condition Authoritarian liberalism is constructed supranationally through a taming of inter state relations in the project of European integration at the domestic level through the depoliticization of state society relations and socially through the emergence of a new constitutional imaginary based on liberal individualism In the language of constitutional theory this transformation can be captured by the substitution of supranationalism for internationalism technocracy for democracy and economic for political freedom Sovereignty is restrained democracy curtailed and class struggle repressed This constitutional trajectory takes time to unfold and develop and it presents continuities and discontinuities On the one hand authoritarian liberalism is deepened by the neoliberalism of the Maastricht era and the creation of Economic and Monetary Union On the other hand counter movements then also begin to emerge geopolitically in the return of the German question domestically in the challenges to the EU presented by constitutional courts and informally in the rise of anti systemic political parties and movements Sovereignty democracy and political freedom resurface but are then more actively suppressed through the harsher authoritarian liberalism of the Euro crisis phase This leads now to an impasse Anti systemic politics return but remain uneasily within the EU suggesting authoritarian liberalism has reached its limits if just about managing to maintain constitutional order As yet there has been no definitive rupture with the possible exception of Brexit A Concise History of Modern Europe David S. Mason, 2022-06-29 Highlighting the key events ideas and individuals that shaped modern Europe this lively book provides a concise history of the continent from the Enlightenment to the present day Drawing on the enduring theme of revolution David S Mason explores the political economic and scientific causes and consequences of revolution the development of human rights and democracy and issues of European identity and integration He deliberately avoids a detailed chronology of every country and time period instead emphasizing the most crucial events in shaping contemporary Europe Fourteen focused chapters address such topical issues as the Enlightenment the French Revolution and Napoleon the Industrial Revolution the theories and impact of Marx and Darwin the revolutions of 1848 1917 and 1989 the unifications of Germany and Italy European imperialism the two world wars the Cold War the evolution and expansion of the European Union and current issues confronting Europe Any reader who wants to view the broad sweep of European history will find this book an engaging

narrative supplemented with maps timelines sidebars photos and a glossary **Jealousy of Trade** Istvan Hont, 2005-08-31 The author focuses on Adam Smith and his contemporaries who pondered these issues particularly the nature and development of commercial society They attempted to come to terms with the claim that on the one hand the market was a decisive element in economic progress and on the other that its workings depended upon the release of the immoral desires of fallen men and that its consequences were socially and politically destabilizing Hont reconstructs the salient features of this controversy between the proponents of market sociability and its most trenchant critics. In doing so he has helped to locate historically the most important arguments at the heart of the emergence of modernity Jacket **Power Elites** Niilo Kauppi, Mikael Rask Madsen, 2013-03-05 This book argues that European Union institutional mechanics and the EU as a political unit cannot be properly understood without taking into account the elites that make the policy decisions Spurred by globalisation technological and economic development has provided the backbone for social and political transformations that have changed the social structures that unite and differentiate individuals and groups in Europe and their interface with extra European actors These developments are not only exemplified by the rise of the EU but also by the rise of a set of transnational European power elites evolving in and around the European construction This book maps out these EU and international interdependencies and provides a comprehensive picture of the European transnational power elites Moving away from the majority of literature on European integration dominated by economics law IR and political science the volume is written from a sociological perspective that takes into account the individuals that make the policy decisions the formal and informal groups in which s he is included as well as the social conventions that regulate political and administrative activities in the EU This book will be of much interest to students of EU studies sociology critical security studies and IR in general
