Fundamentals of Argumentation Theory Frans H. van Eemeren, Rob Grootendorst, Ralph H. Johnson, Christian Plantin, Charles A. Willard, 2013-11-05 Argumentation theory is a distinctly multidisciplinary field of inquiry It draws its data assumptions and methods from disciplines as disparate as formal logic and discourse analysis linguistics and forensic science philosophy and psychology political science and education sociology and law and rhetoric and artificial intelligence This presents the growing group of interested scholars and students with a problem of access since it is even for those active in the field not common to have acquired a familiarity with relevant aspects of each discipline that enters into this multidisciplinary matrix This book offers its readers a unique comprehensive survey of the various theoretical contributions which have been made to the study of argumentation It discusses the historical works that provide the background to the field and all major approaches and trends in contemporary research Argument has been the subject of systematic inquiry for twenty five hundred years It has been graced with theories such as formal logic or the legal theory of evidence that have acquired a more or less settled provenance with regard to specific issues But there has been nothing to date that qualifies as a unified general theory of argumentation in all its richness and complexity This being so the argumentation theorist must have access to materials and methods that lie beyond his or her home subject It is precisely on this account that this volume is offered to all the constituent research communities and their students Apart from the historical sections each chapter provides an economical introduction to the problems and methods that characterize a given part of the contemporary research program Because the chapters are self contained they can be consulted in the order of a reader s interests or research requirements But there is value in reading the work in its entirety Jointly authored by the very people whose research has done much to define the current state of argumentation theory and to point the way toward more general and unified future treatments this book is an impressively authoritative contribution to the field Fundamentals of Error Theory Kaizhong Guo, Shiyong Liu, 2018-12-11 This book provides a tool for generic readers and graduates who are interested or majoring in systems engineering decision science management science and project management to sharpen their system thinking skills equipping them with a multiangle perspective and offering them broader view to understand the complex socioeconomic system in which we are embedded It systematically investigates the root causes and mechanisms that generate errors through the use of fuzzy set theory systems science logic and set theory and decision science an area that has rarely been explored in literature The topics covered include classic error set fuzzy error set multivariate error set error function identification of errors error systems error logic error matrix and practical application of error theory in a sewage project Modern and Contemporary Taiwanese Philosophy Jana S. Rošker, 2020-11-19 This collection contains 13 essays on modern and contemporary Taiwanese philosophy written by outstanding scholars working in this field It highlights

the importance of Taiwanese philosophy in the second half of the 20th century While the Chinese conceptual tradition especially Confucianism fell out of favor from the 1950s onwards and was often banned or at least severely criticized on the mainland Taiwanese philosophers constantly strove to preserve and develop it Many of them tried to modernize their own traditions through dialogs with Western thought especially with the ideas of the European Enlightenment However it was not only about preserving tradition in the second half of the 20th century several complex and coherent philosophical systems emerged in Taiwan The creation of these discourses is evidence of the great creativity and innovative power of many Taiwanese theorists whose work is still largely unknown in the Western world The A to Z of Logic Harry J. technical aspects of mathematics and delves into the philosophical implications of mathematical concepts Russell explores questions of truth knowledge and the nature of reality as they relate to mathematics Set Theory and Foundations Russell introduces the principles of set theory and discusses their role in establishing the foundations of mathematics He explores the paradoxes that arise in set theory and proposes solutions to resolve these paradoxes Bertrand Russell was a renowned philosopher logician and mathematician His contributions to various fields of study including philosophy of language logic and mathematics have had a profound impact on intellectual thought Introduction to Mathematical Philosophy showcases Russell's expertise in both mathematics and philosophy solidifying his reputation as a leading figure in analytical philosophy and mathematical logic Foundations of Language, 1965 The Semantics and Pragmatics of Quotation Paul Saka, Michael Johnson, 2017-12-07 The chapters in this volume address a variety of issues surrounding quotation such as whether it is a pragmatic or semantic phenomenon what varieties of quotation exist and what speech acts are involved in quoting Quotation poses problems for many prevailing theories of language One fundamental principle is that for a language to be learnable speakers must be able to derive the truth conditions of sentences from the meanings of their parts Another popular view is that indexical expressions like I display a certain fixity that they always refer to the speaker using them Both of these tenets appear to be violated by quotation This volume is suitable for scholars in philosophy of language semantics and pragmatics and for graduate students in philosophy and linguistics The book will also be useful for researchers in other fields that study quotation including psychology and computer science Footnotes to Formal Logic Charles Henry Universal Logic, Ethics, and Truth Timothy J. Madigan, Jean-Yves Béziau, 2024-05-13 John Corcoran was a Rieber, 1918 very well known logician who worked on several areas of logic He produced decisive works giving a better understanding of two major figures in the history of logic Aristotle and Boole Corcoran had a close association with Alfred Tarski a prominent 20th century logician This collaboration manifested in Corcoran's substantial introduction to Tarski's seminal book Logic Semantics Metamathematics 1956 Additionally Corcoran's posthumous editorial involvement in What are logical notions 1986 breathed new life into this seminal paper authored by Tarski His scholarly pursuits extended to the intricate explication of fundamental concepts in modern logic including variables propositions truth consequences and categoricity Corcoran s academic curiosity extended further to the intersection of ethics and logic reflecting his contemplation of their interrelation Beyond these theoretical contributions Corcoran was deeply engaged in the pedagogical dimensions of logic instruction This volume serves as a compilation of articles contributed by Corcoran s students colleagues and international peers By encompassing a diverse range of subjects this collection aptly mirrors Corcoran's wide ranging interests offering insights that not only deepen our understanding of his work but also advance the theoretical frameworks he explored Future Logic Avi Sion, 1990-08-02 Future Logic is an original and wide ranging treatise of formal logic It deals with deduction and induction of categorical and conditional propositions involving the natural temporal extensional and logical modalities This is

the first work ever to strictly formalize the inductive processes of generalization and particularization through the novel methods of factorial analysis factor selection and formula revision This is the first work ever to develop a formal logic of the natural temporal and extensional types of conditioning as distinct from logical conditioning including their production from modal categorical premises An Annotated Bibliography on Ibn Sînâ (1970-1989) Jules L. Janssens,1991 n this bibliography more extensive and systematic attention is paid to non Western publications especially Arabian persian Turkish and Russian Of special interest is the inclusion of a number of Indian publications
