Modern Hebrew:

The Schizoid Nature of Modern Hebrew Paul Wexler, 1990 Hebrew is regarded as a former living language which ceased to be a native language 1800 years ago only to be given a spoken function anew in the late 19th century Since the re acquisition of a lost colloquial function has never been documented Modern Hebrew has become an object of fascination among linguists and laymen alike In this book the author claims Modern Hebrew is not a direct continuation of monolingual Semitic Hebrew Modern Hebrew was created when Yiddish speaker re lexified their language to Biblical and Mishnaic Hebrew Yiddish is a Slavic language derived from Sorbian and thus Modern Hebrew is a Slavic Language These claims raise a number of interesting questions why do most speakers believe that Modern Hebrew is a Semitic language what are the contributions of Modern Hebrew to the typology of diglossia historical and genetic linguistics universal grammar 2nd language acquisition and political science

Historical Continuity in the Emergence of Modern Hebrew Yael Reshef, 2019-11-13 *Historical Continuity in the Emergence of Modern Hebrew* offers a new perspective on the emergence processes of Modern Hebrew and its relationship to earlier forms of Hebrew Based on a textual examination of select case studies of language use throughout the modernization of Hebrew this book shows that due to the unconventional sociolinguistic circumstances in the budding speech community linguistic processes did not necessarily evolve in a linear manner blurring the distinction between true and apparent historical continuity The emergent language s standardization involved the restructuring of linguistic habits that had initially taken root among the first speakers often leading to a retreat from early contact induced or non classical phenomena Yael Reshef demonstrates that as a result superficial similarity to earlier forms of Hebrew did not necessarily stem from continuity and deviation from canonical Hebrew features does not necessarily stem from change

Malatesha Joshi,P.G. Aaron,2013-05-13 Until about two decades ago the study of writing systems and their relationship to literacy acquisition was sparse and generally modeled after studies of English language learners This situation is now changing As the worldwide demand for literacy continues to grow researchers from different countries with different language backgrounds have begun

examining the connection between their writing systems and literacy acquisition This text which derives from a NATO sponsored conference on orthography and literacy brings together the research of 70 scholars from across the world the largest assemblage of such experts to date Their findings are grouped into three parts as follows Part I Literacy Acquisition in Different Writing Systems describes the relationship between orthography and literacy in twenty five orthographic systems This section serves as a handy reference source for understanding the orthographies of languages as diverse as Arabic Chinese English Icelandic Kannada and Kishwahili Part II Literacy Acquisition From a Cross Linguistic Perspective makes direct comparisons of literacy acquisition in English and other orthographic systems The overall conclusion that emerges from these eight chapters is that the depth of an orthographic system does influence literacy acquisition primarily by slowing down the acquisition of reading skills Even so studies show that dyslexic readers can be found across all orthographic systems whether shallow or deep which shows that dyslexia also has internal cognitive and biological components Part III Literacy Acquisition Instructional Perspectives explores literacy acquisition from developmental and instructional perspectives and ends with a look into the future of literacy research This Handbook is appropriate for scholars researchers and graduate students in such diverse fields as cognitive psychology psycholinguistics literacy education English as a second language and communication disorders

Proper Names versus Common Nouns Javier Caro Reina,Johannes Helmbrecht,2022-11-07 Recent

research has shown that proper names morphosyntactically differ from common nouns in many ways. However, little is known about the morphological and syntactic distributional differences between proper names and common nouns in less known Non Indo European languages. This volume brings together contributions which explore morphosyntactic phenomena such as case marking, gender assignment rules, definiteness marking and possessive constructions from a synchronic, diachronic and typological perspective. The languages surveyed include Austronesian languages, Basque, English, German, Hebrew and Romance languages. The volume contributes to a better understanding not only of the contrasts between proper names and common nouns but also of formal contrasts between different proper name classes such as personal names, place names and others.
