Myth and Solidarity in the Modern World Timothy Stacey, 2018-01-17 In the context of the rise of reactionary politics across the globe this book seeks new ways of developing solidarity across religious political and economic differences Drawing on an increasingly influential Christian theological movement postliberalism it claims that the dominance of liberal secular rationality has blinded people to the fundamental role of transcendence and myth in developing solidarity The result is either atrophy or a retrenching in divisive myths of faith race nation or economic status Liberalism is now a dominant force across the globe But its resonance in the Anglo Saxon West from which it originates and has been most fully realized is relatively underexplored The book thus follows two simultaneous lines of enquiry Firstly a genealogical study of social scientific and policy iterations of the relationship between belief and solidarity in the Anglo Saxon West placing postliberal theory into dialogue with the sociology and anthropology of religion politics and economics Secondly it draws from original ethnographic research with groups in London UK that seek to develop solidarity in the face of deep seated difference By bringing a new way of framing these contentious debates about contemporary society this research offers tools for more productive conversations around religious and political topics in particular concluding with a clear policy proposal It is therefore a useful resource for both academics of theology and religious studies political philosophy sociology and anthropology and for politicians policy makers and practitioners hoping to develop solidarity in the modern world
