Eadie, 2009-05-15 The discipline of communication has grown in popularity from the time professors of journalism and speech decided in the mid 1960s that the term communication was an excellent general descriptor for the theory and research that each group aspired to create Over time the two groups grew closer and recognized significant overlap in their theoretical and research interests but there were also differences in their traditions that kept them apart While both groups agreed that communication is a practical discipline journalism professors focused a great deal of their attention on the education of media professionals Speech professors on the other hand often were more oriented to the liberal arts and valued the fact that communication could be approached from a variety of traditions including the arts humanities social sciences and even the sciences A key term in 21st Century communication however is convergence Not only are media and technology converging with each other to produce new means of communicating but individuals are increasingly using both new and existing communication tools to create new forms of communication This convergence forces the various camps within the communication discipline to draw upon each other's theories and research methods to keep up with explaining the rapidly changing communication environment This convergence of ideas and theories provides a space to challenge conventional ways of thinking about the communication discipline and that's the goal of the SAGE 21st Century Reference Series volumes on Communication General Editor William F Eadie has sought to honor the diversity of the study of communication but also integrate that diversity into a

intent on selling us more of the same and on a media industry too greedy to risk investing in intellectually challenging radically new products Sameness and Repetition in Contemporary Media Culture takes a comprehensive approach that both theorises and historically grounds the idea of repetition in relation to media as something that is deeply embedded in our cultural tradition This project received funding from the Carlsberg Foundation      **Travel, Writing and the Media** Barbara Korte, Anna Karina Sennefelder, 2022-03-03 The nexus between travel writing and media in the contemporary world is dense travel practice is increasingly interwoven with media representations in old and new media are co present and converge Digitisation has had a profound impact on the practice and mediation of travel but this volume aims to show that travel and its representation have always been enlaced with media With contributions by experts in literary and cultural studies journalism studies and informatics the book takes a multi and interdisciplinary approach and covers a wide range of media from the hand crafted album to social media It illustrates how current transformations invite us to revisit earlier periods of travel writing and their media environments and to explore the ways in which contemporary forms of mediation are prefigured by earlier practices and forms The book addresses readers interested in travel writing travel studies and cultural studies Chapters Introduction 3 7 and 9 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license Funded by University of Freiburg      Writing Feature Articles Mary Hogarth, 2019-04-09 Writing Feature Articles presents clear and engaging advice for students and young professionals on working as a freelance feature writer This fifth edition not only covers producing content for print but also for digital platforms and online Mary Hogarth offers comprehensive guidance on every aspect of feature writing from having the initial idea and conducting market and subject research to choosing the right target audience and publishing platform and successfully pitching the article In addition the book instructs students on developing their own journalistic style and effectively structuring their feature Each chapter then concludes with an action plan to help students put what they have read into practice Topics include Life as a freelance Building a professional profile Telling a story with images Developing a specialism Interviewing skills Profile and interview articles Working in publicity and advertising A career in magazines and newspapers Getting published overseas Understanding issues in media law and regulation The book also provides an extensive range of interviews with successful media professionals including a newspaper editor a money health and lifestyle journalist a copywriter and an award winning columnist where they share their own experiences of working in the industry and offer invaluable tips on best practice      *The Publishers Weekly*, 1922

**Controversy as News Discourse** Peter A. Cramer, 2011-06-17 This book presents a constitutive approach to controversy based on a discourse analysis of news texts focusing on the role of journalists as participants who shape public controversy for readers Drawing data from the Reuters Corpus the project identifies formulas that journalists use in reporting controversy and draws conclusions about how these serve professional and textual functions and how they shape public

controversy as a natural historical and pragmatic event While the traditions of dialectic and rhetoric have focused on the prescriptive aim of training participants to resolve controversies in philosophical dialogue or public debate settings this orientation has tended to preempt questions about where controversy is located and how it is shaped This project contributes to descriptive ethnographic research about controversy using discourse analysis to address a problem in argumentation
