Speak Not James Griffiths, 2021-10-21 A New Yorker Best Book of 2022 A Globe Mail Book of the Year A stimulating work on the politics of language LA Review of Books As globalisation continues languages are disappearing faster than ever leaving our planet's linguistic diversity leaping towards extinction The science of how languages are acquired is becoming more advanced and the internet is bringing us new ways of teaching the next generation however it is increasingly challenging for minority languages to survive in the face of a handful of hegemonic super tongues In Speak Not James Griffiths reports from the frontlines of the battle to preserve minority languages from his native Wales Hawaii and indigenous American nations to southern China and Hong Kong He explores the revival of the Welsh language as a blueprint for how to ensure new generations are not robbed of their linguistic heritage outlines how loss of indigenous languages is the direct result of colonialism and globalisation and examines how technology is both hindering and aiding the fight to prevent linguistic extinction Introducing readers to compelling characters and examining how indigenous communities are fighting for their languages Griffiths ultimately explores how languages hang on what happens when they don't and how indigenous tongues can be preserved and brought back from the brink

English in China Emily Tsz Yan Fong, 2021-03-29 This

volume explores Chinese identity through the lens of both the Chinese and English languages. Until the twentieth century, English was a language associated with capitalists and military aggressors in China. However, the massive progression of globalisation in China following the 1980s has transformed the language into an important tool for China's modernisation. Regardless of the role English plays in China, there has always been a fear that the spread of culture associated with English would lead to weakening of the Chinese identity. This fear resulted in the development of the *ti yong* principle: Chinese learning for essence (*ti*), Western learning for utility (*yong*). Fong's book aims to enhance understanding of the *ti yong* dichotomy in relation to people's sense of being Chinese in China, the penetration of English into non-English speaking societies, the resultant tensions in people's sense of personal and national identity and their place in the world. Using Q methodology, the book presents observations based on data collected from four participant groups: namely, high school and university students, teachers, and parents in China, to investigate their perspectives on the status and roles of English as well as those of Chinese. Considering the growing international interest in China, this volume will appeal to readers interested in China's contemporary society in general, its language, culture, and identity. It will be a useful resource for academics, researchers, and students in the field of applied linguistics, language education, and Chinese cultural studies, and can also be adopted as a reference book for undergraduate courses relating to language identity and culture.

The Rise of Chinese as a Global Language Jeffrey Gil, 2021-06-07. This book investigates the macroacquisition of Chinese: its large-scale acquisition and adoption for various purposes by individuals, governments, and organisations, and the implications of this process for the future of English as a global language. The author contextualises the macroacquisition of Chinese within the global ecology of languages, then analyses the factors responsible for the macroacquisition of Chinese, showing in contrast to most academic and popular commentary that a character-based writing system will not stop Chinese from becoming a global language. He then articulates three possible future scenarios: English remaining a dominant global language; English and Chinese both being global languages; and Chinese becoming a global language instead of English. The book concludes by outlining directions for further research on the acquisition and use of Chinese around the world. It will be of interest to students and scholars with an interest in English as a global language, Chinese as a second foreign language, language education policy, and applied linguistics more generally.

Hybridity in Translated Chinese Guangrong Dai, 2016-05-20. This book investigates the characteristics of hybridity in Chinese texts that have been translated from English. It also explores the potential impact of translation and hybridity on written Chinese over the past 70 years. It suggests that English-Chinese translations have introduced more and more hybrid structures into Chinese. This book can help us with understanding language change and development, and it can also shed new light on the translation process and help identify translation norms.
