## **Modern Garden Design Innovation Since 1900:**

*Modern Garden Design* Janet Waymark, 2005 A survey of the works of top garden and landscape designers throughout the past century considers the significant impact of postwar designers the influence of international artists and the contributions of garden city designs in an account that places each depicted artist in a historical and international context Reprint The Modern Garden Pierluigi Serraino, 2024-10-01 Visionary landscape architecture and garden design at mid century in North America is captured by the greats of the era including Julius Shulman and Ezra Stoller in many previously unpublished photographs The treasures of mid century American architecture have long been celebrated Less appreciated has been the landscape design that provides the framing for these masterworks But more than frame landscape architecture is an art worthy of the spotlight particularly at mid century when the notion that gardens are outdoor spaces for people to live in was championed and brought to the fore now gardens and landscapes are not just external attributes to the house but a continuation of it and its living spaces in a relationship of symbiosis with its pools and terraces its winding lawns and its partly enclosed room like spaces flanked by brick or stone or plantings in a range of colors and forms Approximately seventy five mostly residential projects are thoroughly documented and recounted Landscape architects whose work is featured include Thomas Church Lawrence Halprin and Garrett Eckbo among others Highlights include the dramatic surrounds of Richard Neutra's Perkins House in its Pasadena hillside setting and Frank Lloyd Wright's Marin County Civic Center where environment and building comeingle in an extraordinary modernist vision of the future made real This book is both a wishful gesture toward a realignment of building with nature and a must have for anyone with a visceral appreciation for a designed environment understood as an integrated whole Ultimately the book underlines the fundamental importance of gardens and landscape design intended in the widest possible sense for the quality of living of all individuals **Modern Hospice**

**Design** Ken Worpole, 2023-09-29 The new edition of this acclaimed book comprehensively updates its timely advocacy of the need for good quality palliative care today more necessary than ever Rooted in the social history of the care of the elderly and terminally ill *Modern Hospice Design The Architecture of Palliative and Social Care* takes cognisance of the new conditions of social care in the 21st century principally in the UK Europe and North America It does so with regard to the development of new building types but also in response to new philosophies of palliative care and the status of the elderly and the dying Benefitting from a clearer methodological approach and conceptual framework the expanded book allows a broad section of readers to navigate the text more easily At its core is a public discussion of a philosophy of design for providing care for the elderly and the vulnerable taking the importance of architectural aesthetics the use of quality materials the porousness of design to the wider world and the integration of indoor and outdoor spaces as part of the overall care environment In doing so it advocates care settings that in the words of Maggie Jencks whose life and ideas inspired the Maggie's Centres rise to the occasion Including new chapters and new in depth case studies complete with full colour
