

Modern Music

James Huneker

Modern Music:

Modern Music and After Paul Griffiths, 2011-02-16 Over three decades Paul Griffiths's survey has remained the definitive study of music since the Second World War this fully revised and updated edition re-establishes Modern Music and After as the preeminent introduction to the music of our time The disruptions of the war and the struggles of the ensuing peace were reflected in the music of the time in Pierre Boulez's radical reformation of compositional technique and in John Cage's development of zen music in Milton Babbitt's settling of the serial system and in Dmitry Shostakovich's unsettling symphonies in Karlheinz Stockhausen's development of electronic music and in Luigi Nono's pursuit of the universally human in Iannis Xenakis's view of music as sounding mathematics and in Luciano Berio's consideration of it as language The initiatives of these composers and their contemporaries opened prospects that haven't yet stopped unfolding This constant expansion of musical thinking since 1945 has left us with no singular history of music Griffiths's study accordingly follows several different paths showing how and why they converge and diverge This new edition of Modern Music and After discusses not only the music of the fifteen years that have passed since the previous edition but also the recent explosion of scholarly interest in the latter half of the twentieth century In particular the book has been expanded to incorporate the variety of responses to the modernist impasse experienced by composers of the 1980s and 1990s Griffiths then moves the book into the twenty-first century as he examines such highly influential composers as Helmut Lachenmann and Salvatore Sciarrino For its breadth wealth of detail and characteristic wit and clarity the third edition of Modern Music and After is required reading for the student and the enquiring listener

Modern Music Paul Griffiths, 1994 Beginning at the threshold of the modern era with the late Romanticism of Debussy and Mahler the author traces the new directions of music through composers such as Alban Berg and Anton Webern Charles Ives Edgard Varese and Olivier Messiaen Karlheinz Stockhausen Pierre Boulez Philip Glass and Elliott Carter The various paths are made clear by a concentration on the major works and turningpoints in the music of our time the new rhythmic force that came in with The Rite of Spring the unbounded universe of Schoenberg's atonality the undreamed of possibilities opened up by electronics the role of chance in the music of John Cage and the astonishing diversity of minimalism

Dialogue on Ancient and Modern Music Vincenzo Galilei, Victor Palisca, Henry L. Lucy G. Moses Professor of Music, Claude V. Palisca, 2003-01-01 Vincenzo Galilei the father of the astronomer Galileo was a guiding light of the Florentine Camerata His Dialogue on Ancient and Modern Music published in 1581 or 1582 and now translated into English for the first time was among the most influential music treatises of his era Galilei is best known for his rejection of modern polyphonic music in favor of Greek monophonic song The treatise sheds new light on his importance both as a musician who advocated a new philosophy of music history and theory based on an objective search for the truth and as an experimental scientist who was one of the founders of modern acoustics

Modern Music, 1924

Modern Music Max Graf, 1946

Samuel Beckett, Repetition and Modern Music John McGrath, 2017-11-13 Music

abounds in twentieth century Irish literature Whether it be the thought tormented music of Joyce's *The Dead* the folk tunes and opera that resound throughout *Ulysses* or the four part threnody in Beckett's *Watt* it is clear that the influence of music on the written word in Ireland is deeply significant Samuel Beckett arguably went further than any other writer in the incorporation of musical ideas into his work Musical quotations inhabit his texts and structural devices such as the *da capo* are metaphorically employed Perhaps most striking is the erosion of explicit meaning in Beckett's later prose brought about through an extensive use of repetition influenced by his reading of Schopenhauer's philosophy of music Exploring this notion of semantic fluidity John McGrath discusses the ways in which Beckett utilised extreme repetition to create texts that operate and are received more like music Beckett's writing has attracted the attention of numerous contemporary composers and an investigation into how this Beckettian musicalized fiction has been retranslated into contemporary music forms the second half of the book Close analyses of the Beckett inspired music of experimental composer Morton Feldman and the structured improvisations of avantjazz guitarist Scott Fields illustrate the cross genre appeal of Beckett to musicians but also demonstrate how repetition operates in diverse ways Through the examination of the pivotal role of repetition in both music and literature of the twentieth century and beyond John McGrath's book is a significant contribution to the field of Word and Music Studies

The BBC and Ultra-Modern Music, 1922-1936 Jennifer Ruth Doctor, 1999 This book first published in 2000 examines the BBC's campaign to raise cultural awareness of British mass audiences in the early days of radio As a specific case it focuses on policies and plans behind transmissions of music by composers associated with Arnold Schoenberg's circle between 1922 when the BBC was founded and spring 1936 when Edward Clark a former Schoenberg pupil and central figure in BBC music resigned from the Corporation This study traces and analyses the BBC's attempts to manipulate critical and public responses to this repertory The book investigates three interrelated aspects of early BBC history Policy decisions relating to contemporary music transmissions are examined to determine why precious broadcast time was devoted to this repertory Early personnel structures are reconstructed to investigate the responsibilities attitudes and interests of those who influenced music broadcasting Finally broadcasts of Second Viennese School works are examined in detail

Mezzotints in Modern Music James Hunecker, 1899 **Walt Whitman and Modern Music** Lawrence Kramer, 2018-12-07 Walt Whitman's poetry especially his Civil War poetry attracted settings by a wide variety of modern composers in both English and German speaking countries The essays in this volume trace the transformation of Whitman's nineteenth century texts into vehicles for confronting twentieth century problems aesthetic social and political The contributors pay careful attention to music and poetry alike in examining how the Whitman settings become exemplary means of dealing with both the tragic and utopian faces of modernism The book is accompanied by a recording by Joan Heller and Thomas Stumpf of complete Whitman cycles composed by Kurt Weill George Crumb and Lawrence Kramer and the first recording of four Whitman songs composed in the 1920s by Marc Blitzstein

The History of Modern Music John

Hullah,1862 **Alan Bush, Modern Music, and the Cold War** Joanna Bullivant,2022-12-15 The first major study of Alan Bush this book provides new perspectives on twentieth century music and communism British communist composer of politicised works and friend of Soviet musicians Bush proved to be a lightning rod in the national musical culture His radical vision for British music prompted serious reflections on aesthetics and the rights of artists to private political opinions as well as influencing the development of state sponsored music making in East Germany Rejecting previous characterisations of Bush as political and musical Other Joanna Bullivant traces his aesthetic project from its origins in the 1920s to its collapse in the 1970s incorporating discussion of modernism political song music theory opera and Bush s response to the Soviet music crisis of 1948 Drawing on a wealth of archival sources including recently released documents from MI5 this book constructs new perspectives on the cultural Cold War through the lens of the individual artist The History of Modern Music John Hullah,2023-11-19 Reprint of the original first published in 1875 Gender, Branding, and the Modern Music Industry Kristin Lieb,2013 Critical frameworks for considering pop stars Female popular music stars as brands The modern music industry The lifecycle for female popular music stars The lifecycle model continued Theoretical foundations for the lifecycle

Modern Music-Inspired Optimization Algorithms for Electric Power Systems Mohammad Kiani-Moghaddam, Mojtaba Shivaie, Philip D. Weinsier, 2019-05-21 In today's world with an increase in the breadth and scope of real world engineering optimization problems as well as with the advent of big data improving the performance and efficiency of algorithms for solving such problems has become an indispensable need for specialists and researchers In contrast to conventional books in the field that employ traditional single stage computational single dimensional and single homogeneous optimization algorithms this book addresses multiple newfound architectures for meta heuristic music inspired optimization algorithms These proposed algorithms with multi stage computational multi dimensional and multi inhomogeneous structures bring about a new direction in the architecture of meta heuristic algorithms for solving complicated real world large scale non convex non smooth engineering optimization problems having a non linear mixed integer nature with big data The architectures of these new algorithms may also be appropriate for finding an optimal solution or a Pareto optimal solution set with higher accuracy and speed in comparison to other optimization algorithms when feasible regions of the solution space and or dimensions of the optimization problem increase This book unlike conventional books on power systems problems that only consider simple and impractical models deals with complicated techno economic real world large scale models of power systems operation and planning Innovative applicable ideas in these models make this book a precious resource for specialists and researchers with a background in power systems operation and planning Provides an understanding of the optimization problems and algorithms particularly meta heuristic optimization algorithms found in fields such as engineering economics management and operations research Enhances existing architectures and develops innovative architectures for meta heuristic music inspired optimization algorithms in order to deal with complicated real world large scale non convex non smooth engineering optimization problems having a non linear mixed integer nature with big data Addresses innovative multi level techno economic real world large scale computational logical frameworks for power systems operation and planning and illustrates practical training on implementation of the frameworks using the meta heuristic music inspired optimization algorithms
