Philosophical Problems of Psychology Edward H. Madden, 1973 [Philosophical Problems in Psychology](#) Neil Bolton, 1979 *On More Elementary Philosophical Problems of Psychology* Jay N. Eacker, 1974 **Problems of Philosophy and Psychology** Jay N. Eacker, 1975 To find more information about Rowman and Littlefield titles please visit www.rowmanlittlefield.com [World Views and Scientific Discipline Formation](#) W.R. Woodward, Robert S. Cohen, 2012-12-06 The various efforts to develop a Marxist philosophy of science in the one time socialist countries were casualties of the Cold War Even those who were in no way Marxists and those who were undogmatic in their Marxisms now confront a new world All the more harsh is it for those who worked within the framework imposed upon professional philosophy by the official ideology Here in this book we are concerned with some 31 colleagues from the late German Democratic Republic representative in their scholarship of the achievements of a curiously creative while dismayingly repressive period The literature published in the GDR was blossoming certainly in the final decade but it developed within a totalitarian regime where personal careers either advanced or faltered through the private protection or denunciation of mentors We will never know how many good minds did not enter the field of philosophy in the first place due to their prudent judgments that there was a virtual requirement that the candidate join the Socialist Unity i e Communist Party Among those who started careers and were sidetracked the record is now beginning to be revealed and for the rest the price of doing philosophy was mostly silence in the face of harassments the likes of which make academic politics in the West seem child's play *Philosophy of Psychology: Causality and Psychological Subject* Wenceslao J. Gonzalez, 2018-06-11 Contemporary philosophy of science analyzes psychology as a science with special features because this discipline includes some specific philosophical problems descriptive and normative structural and dynamic Some of these are particularly relevant both theoretically causal explanation and practically the configuration of the psychological subject and its relations with psychiatry Two central aspects in this book are the role of causality especially conceived as intervention or manipulation and the characterization of the psychological subject This requires a clarification of scientific explanations in terms of causality in psychology because characterizations of causality are quite different in epistemological and ontological terms One of the most influential views is James Woodward's approach to causality as intervention which entails an analysis of its characteristics new elements and limits This means taking into account the structural and dynamic aspects included in causal cognition and psychological explanations Psychology seen as special science also requires us to consider the scientific status of psychology and the psychological subject which leads to limits of naturalism in psychology **Philosophical Problems of Psychology** , 2014 [Psychology as Philosophy, Philosophy as Psychology: Articles and Reviews 2006-2019](#) Michael Starks, 2019-09-27 Since philosophical problems are the result of our innate psychology or as Wittgenstein put it due to the lack of perspicuity of language they run throughout human discourse and behavior so there is endless need for philosophical

analysis not only in the human sciences of philosophy sociology anthropology political science psychology history literature religion etc but in the hard sciences of physics mathematics and biology It is universal to mix the language game questions with the real scientific ones as to what the empirical facts are Scientism is ever present and Wittgenstein arguably the greatest intuitive psychologist of all time has laid it before us long ago beginning with the Blue and Brown Books in the early 1930 s Language is programmed in our genes and is involved in nearly all our social behavior Philosophy in the strict sense i e academic philosophy is as Wittgenstein showed us the study of the way language is used language games and I regard it as the descriptive psychology of higher order thought i e pretty much everything involving language which is often called System 2 or slow thinking However as I hope I have shown in my writings over the last decade nonlinguistic behavior or System 1 or fast thinking is also described with language and this leads to endless confusion which I have tried to clarify here and which is summarized in the tables that I present It is my contention that the table of intentionality rationality mind thought language personality etc that features prominently here describes more or less accurately or at least serves as an heuristic for how we think and behave and so it encompasses not merely philosophy and psychology but everything else history literature mathematics politics etc Note especially that intentionality and rationality as I along with Searle Wittgenstein and others view it includes both conscious deliberative linguistic System 2 and unconscious automated prelinguistic System 1 actions or reflexes I provide a critical survey of some of the major findings of two of the most eminent students of behavior of modern times Ludwig Wittgenstein and John Searle on the logical structure of intentionality mind language behavior taking as my starting point Wittgenstein s fundamental discovery that all truly philosophical problems are the same confusions about how to use language in a particular context and so all solutions are the same looking at how language can be used in the context at issue so that its truth conditions Conditions of Satisfaction or COS are clear The basic problem is that one can say anything but one cannot mean state clear COS for any arbitrary utterance and meaning is only possible in a very specific context I analyze various writings by and about them from the modern perspective of the two systems of thought popularized as thinking fast thinking slow employing a new table of intentionality and new dual systems nomenclature I show that this is a powerful heuristic for describing behavior with critical reviews of the writings of a wide variety of behavioral scientists i e everyone The first group of articles attempt to give some insight into how we behave that is reasonably free of theoretical delusions In the next three groups I comment on three of the principal delusions preventing a sustainable world technology religion and politics cooperative groups People believe that society can be saved by them so I provide some suggestions in the rest of the book as to why this is unlikely via short articles and reviews of recent books by well known writers

Philosophical Problems of the Internal and External Worlds John Earman, Allen Janis, Gerald J. Massey, Nicholas Rescher, 2014-02-06 The inaugural volume of the Pittsburgh Konstanz series devoted to the work of philosopher Adolf Gr nbaum encompasses the philosophical problems of space time and cosmology the nature of scientific

methodology and the foundations of psychoanalysis
