

CYBERNETICS

Philosophy Cybernetics

Frank Honywill George

Philosophy Cybernetics:

Cybernetics D.A Novikov, 2015-12-09 This book is a concise navigator across the history of cybernetics its state of the art and prospects The evolution of cybernetics from N Wiener to the present day and the reasons of its ups and downs are presented The correlation of cybernetics with the philosophy and methodology of control as well as with system theory and systems analysis is clearly demonstrated The book presents a detailed analysis focusing on the modern trends of research in cybernetics A new development stage of cybernetics the so called cybernetics 2.0 is discussed as a science on general regularities of systems organization and control The author substantiates the topicality of elaborating a new branch of cybernetics i.e. organization theory which studies an organization as a property process and system The book is intended for theoreticians and practitioners as well as for students postgraduates and doctoral candidates In the first place the target audience includes tutors and lecturers preparing courses on cybernetics control theory and systems science

Philosophical Foundations of Cybernetics Frank Honywill George, 1979 Artificial intelligence and the interrogation game Scientific method and explanation Godel's incompleteness theorem Determinism and uncertainty Axioms theorems and formalisation Creativity Consciousness and free will Pragmatics A theory of signs Models as automata The nervous system

Cybernetics and the Philosophy of Mind Kenneth Sayre, 2014-11-20 This book published in 1976 presents an entirely original approach to the subject of the mind-body problem examining it in terms of the conceptual links between the physical sciences and the sciences of human behaviour It is based on the cybernetic concepts of information and feedback and on the related concepts of thermodynamic and communication theoretic entropy The foundation of the approach is the theme of continuity between evolution learning and human consciousness The author defines life as a process of energy exchange between organism and environment and evolution as a feedback process maintaining equilibrium between environment and reproductive group He demonstrates that closely related feedback processes on the levels of the behaving organism and of the organism's nervous system constitute the phenomena of learning and consciousness respectively He analyses language as an expedient for extending human information processing and control capacities beyond those provided by one's own nervous system and shows reason to be a mode of processing information in the form of concepts removed from immediate stimulus control The last chapter touches on colour vision pleasure and pain intentionality self-awareness and other subjective phenomena Of special interest to the communication theorist and philosopher this study is also of interest to psychologists and anyone interested in the connection between the physical and life sciences

Cybernetics for the Social Sciences Bernard Scott, 2021-05-25 Bernard Scott has met a long felt need by authoring a book that shows the relevance of cybernetics for the social sciences including psychology sociology and anthropology Scott provides user friendly descriptions of the core concepts of cybernetics with examples of how they can be used in the social sciences He explains how cybernetics functions as a transdiscipline that unifies other disciplines and a metadiscipline that provides insights about

how other disciplines function He provides an account of how cybernetics emerged as a distinct field following interdisciplinary meetings in the 1940s convened to explore feedback and circular causality in biological and social systems He also recounts how encountering cybernetics transformed his thinking and his understanding of life in general

For the Love of Cybernetics Jocelyn Chapman, 2020-05-21 For the Love of Cybernetics Personal Narratives by Cyberneticians is a collection of personal accounts that offer unique insights into cybernetics via the personal journeys of nine individuals For the authors in this collection cybernetics is not their area of interest it is how they think about what they do and it is their practice Ray Ison Bruce Clarke Frank Galuzska Paul Pangaro Klaus Krippendorff Peter Tuddenham Lucas Pawlik Bernard Scott and Jocelyn Chapman differ in their lineage emphasis and engagement with cybernetics What they have in common is that they share the belief that cybernetics is not a tool to apply here and there but a unifying way of seeing the world that transforms how we behave thus increasing possibilities for positive systemic change This book was originally published as a special issue of the journal World Futures

Cybernetic-Existentialism Steve Dixon, 2019-11-14 Cybernetic Existentialism Freedom Systems and Being for Others in Contemporary Arts and Performance offers a unique discourse and an original aesthetic theory It argues that fusing perspectives from the philosophy of Existentialism with insights from the universal science of cybernetics provides a new analytical lens and deconstructive methodology to critique art In this study Steve Dixon examines how a range of artists works reveal the ideas of Existentialist philosophers including Kierkegaard Camus de Beauvoir and Sartre on freedom being and nothingness eternal recurrence the absurd and being for others Simultaneously these artworks are shown to engage in complex explorations of concepts proposed by cyberneticians including Wiener Shannon and Bateson on information theory and noise feedback loops circularity adaptive ecosystems autopoiesis and emergence Dixon's groundbreaking book demonstrates how fusing insights and knowledge from these two fields can throw new light on pressing issues within contemporary arts and culture including authenticity angst and alienation homeostasis radical politics and the human as system

Philosophy of Education Joseph James Chambliss, 1996 First Published in 1996 Routledge is an imprint of Taylor Francis an informa company
