Political Handbook Of The World 1987 Political Handbook Of The World:

Political Handbook of the World, 1988 Political Handbook of the World, 1987 Arthur S. Banks, 1987-05 **Political handbook of the world** Arthur Sparrow Banks (red.), 1987 Nber Macroeconomics Annual 1993 Olivier Blanchard, Stanley Fischer, 1993 This annual is designed to stimulate research on problems in applied economics to bring frontier theoretical developments to a wider audience and to accelerate the interaction between analytical and empirical research in macroeconomics **Political Cycles and the Macroeconomy** Alberto Alesina, Nouriel Roubini, Gerald D. Cohen, 1997 This book examines how electoral laws the timing of election the ideological orientation of governments and the nature of competition between political parties influence unemployment economic growth inflation and monetary and fiscal policy The book presents both a thorough overview of the theoretical literature and a vast amount of empirical evidence

Negotiating Democracy Gretchen Casper, Michelle M. Taylor, 1996-07-15 This book explains why some countries succeed in installing democracy after authoritarian rule and why some of these new democracies make progress toward consolidation Casper and Taylor show that a democratic government can be installed when elite bargaining during the transition process is relatively smooth They view elite bargaining in twenty four transitions cases some where continued authoritarianism was the result others where a democratic government was the result and a third outcome where progress towards consolidation was the end product *Political Economy in Macroeconomics* Allan Drazen, 2018-06-05 Originally economics was called political economy and those studying it readily accepted that economic decisions are made in a political world But economics eventually separated itself from politics to pursue rigorous methods of analyzing individual behavior and markets Recently an increasing number of economists have turned their attention to the old question of how politics shape economic outcomes To date however this growing literature has lacked a cogent organization and a unified approach Here in the first full length examination of how political forces affect economic policy decisions Allan Drazen provides a systematic treatment organizing the increasingly influential new political economy as a more established field at the highly productive intersection of economics and political science Although he provides an extraordinarily helpful guide to the recent explosion of papers on political economy in macroeconomics Drazen moves far beyond survey giving definition and structure to the field He proposes that conflict or heterogeneity of interests should be the field s essential organizing principle because political questions arise only when people disagree over which economic policies should be enacted or how economic costs and benefits should be distributed Further he illustrates how heterogeneity of interests is crucial in every part of political economy Drazen s approach allows innovative treatment using rigorous economic models of public goods and finance economic growth the open economy economic transition political business cycles and all of the traditional topics of macroeconomics This major text will have an enormous impact on students and professionals in political science as well as economics redefining how decision makers on several continents think about the full range of macroeconomic issues and

informing the approaches of the next generation of economists *The Comparative Political Economy of the Welfare State*
Thomas Janoski, Alexander M. Hicks, 1994-01-28 Comparative research is exploding with alternative methodological and theoretical approaches In this book experts in each one of these methods provide a comprehensive explanation and application of time series pooled event history and Boolean methods to substantive problems of the welfare state Each section of the book focuses on a different method with a general introduction to the methods and then two papers using the method to deal with analysis concerning welfare state problems in a political economy perspective Scholars concerned with methodology in this area cannot afford to overlook this book because it will help them keep up on proliferating methodologies Graduate students in political science and sociology will find this book extremely useful in their careers Governments and Markets in East Asia Jungug Choi, 2007-01-24 The Asian economic crisis of 1997 to 1998 had a dramatic impact on the region's economies and its politics This book is a comparative study of five countries experiences making important contributions to key theoretical debates on the relationship between economic performance and practical stability **Reclaiming Paradise** John McCormick, 1991 **Coalition Strategies of Marxist Parties** Trond Gilberg, 1989 During the early part of this decade many individuals both policy makers and scholars wondered about the new look of some communist parties as they billed themselves as potential participants in the pluralistic game of politics in many parts of the world This image was certainly different from the old notion of dedicated revolutionaries who scornfully rejected the existing order and plotted its overflow How genuine was the new look Were the communists sincere when they discussed interaction with other elements of political order in which they operated What were their tactical policies in pursuit of these strategic goals Some of us began to examine these questions more systematically We ran a panel at an academic conference enjoyed the feedback from our colleagues and began the process of writing this book Now several years later it is a finished product after many full scale revisions and updates The topic is still very relevant and that shows the enduring importance of the questions asked a number of years ago Scholars will need to return to this question in the future perhaps the best strategy is a continuous examination of this crucial subject **Monetary and Fiscal Policy: Politics** Torsten Persson, Guido Enrico Tabellini, 1994 This is the first of two volumes on a theory of macroeconomic policy that analyzes which policies are credible or politically feasible Instead of looking at policy as an end product the contributors approach policy as an ongoing process of revised goals changes in tactics and political pressures They consider what kinds of incentives within different institutional settings drive policy making and the behaviour of policy makers The approach explains why certain monetary and fiscal policies are implemented and provides insights into situations that occur repeatedly in macroeconomic policy such as the bias toward government deficits partisan competition and central bank independence **Political Economy, Growth, and Business Cycles** Alex Cukierman, Zvi Hercowitz, Leonardo Leiderman, 1992 These original contributions by some of today's leading macroeconomists and political economists explore a broad spectrum of social political and technological variables that

encourage or impede economic growth What political and economic factors stimulate growth and make an economy expand These original contributions by some of today's leading macroeconomists and political economists explore a broad spectrum of social political and technological variables that encourage or impede economic growth Topics range from economic reform and price flexibility to the economic effects of political coups and include both theoretical analysis and empirical results During the past decade economists have seen important new developments linking growth and business cycles to government policy These contributions provide a clear understanding of these processes and their effect in shaping economic policy They look at the welfare side of economics and offer strong economic models to explain the connection between social policies and economic growth For example John Londregan and Keith Poole address the economic effects of political coups Torsten Persson and Guido Tabellini explore the question of whether inequality is harmful for growth and Stephen Parente and Edward Prescott look at the role of technology adoption in stimulating growth The essays cover a wide range of approaches Several focus on the interaction between growth and the choice of policy where policy reacts to economic and distributional considerations through a majority rule process Others take the policy as given and focus on the empirical estimation of the speed of convergence of rates of growth across states and regions and the importance of externalities and knowledge spillovers for rates of growth Essays about the business cycle fall into two broad categories One arising from the new political economy tradition examines the effects of elections and price decontrols on the business cycle The other explores the implications of optimal economic policies in a representative agent framework for the cyclical behavior of the economy

Transitions and Consolidation of Democracy in Africa Samuel Ebow Quainoo, 2008 What conditions motivate a transition to democracy Can the dynamics of a transition influence its outcome Under what circumstances has democracy been consolidated in Africa This trilogy of questions has become necessary in light of the current democratic wave engulfing Africa and the rest of the world In examining the conditions that initiate democratic transitions this book investigates the circumstances under which democracy movements have operated between 1980 and 1990 It concludes that contrary to dominant democratic theory the transitions to democracy in Africa have occurred under declining levels of development With regard to transitions the book recognizes that they have their own dynamics Two main types of transitions are discerned top down and bottom up The book argues that in spite of the restrictive nature of top down transitions they offer a better opportunity for democratic consolidation because of the consensus between elites of the pro democracy regime and their counterparts in the authoritarian regime a condition that is normally absent under bottom up transitions Finally relying on the cases of consolidated democracies the book derives an African democracy model The model delineates five main conditions that facilitate democratic consolidation including good leadership relevant political institutions external support civic space and a reasonable level of development It cautions however that these are not sufficient conditions nor are all of them necessary Since countries have unique historical circumstances specific countries will have to combine conditions in

the model that are relevant to that society to consolidate its democracy The right combination will depend on the specific needs of the individual country

The German Language and the Real World Patrick Stevenson, 1997 This collection of specially commissioned essays focuses on the forms functions and uses of contemporary German in the period of dynamic change following reunification Some contributors address broad issues language and national identity the status of German as an international language language change and attempts to fix the form of the language and sociolinguistic variation while others examine topics of particular significance in the current sociopolitical climate These include social change and linguistic variation in Berlin after the Wall the political language of the Right and Left the speech of youth subcultures language and gender language and television and language in intercultural communication Reviews of the hardback edition This volume fills a void in up to date English language information on German linguistics Highly recommended for all college and university collections as well as public libraries Choice 33 3 November 1995 The appearance of this collection is timely it updates us on important immediate issues affecting German language and society while this work will be appreciated most by those focusing on sociolinguistics in the German speaking context those searching for comparative sociolinguistic material will find it a valuable source as well All in all Stevenson has organized an interesting and useful volume for Germanophile sociolinguists and for those interested in a multidimensional real German Language Learning 46 1 March 1996

The New Institutional Politics Svante Ersson, Jan-Erik Lane, 2002-01-31 The New Institutional Politics is a comparative study of the impact of political institutions upon outcomes and covers some of the major themes in the new institutionalism It looks at how various democratic institutions like Konkordanzdemokratie or corporatism promote better outcomes than Westminster institutions The evaluation of the performance of political institutions covers the executive the legislature and the judicial system The book also looks at economic outcomes such as affluence and GDP growth as well as social ones like income distribution and quality of life It examines the problems of institutional effects in democracies and dictatorships and provides analysis of some of the major models in political science This is an exploration of how political institutions matter for political economic and social outcomes It estimates their impact in relation to other major factors such as culture and social structure It is written for political scientists and graduates studying comparative politics

The European Voter Jacques Thomassen, 2005-07-28 This book provides a systematic comparative analysis of how and why voting behaviour has changed in Europe in recent decades It has been widely argued that radical changes have occurred in the how and why of voting behaviour in Europe as a result of changes in the structure of society most notably the rise in material affluence and educational attainment and the decline in religious observance and the size of the working class But most tests of this proposition have been undertaken on single countries This book however systematically tests the validity of this proposition across various European countries The argument that social change has altered voting behaviour has been increasingly challenged on the grounds that it takes too little account of changes in the choices that are put before voters by the parties such as the promises and proposals that are put forward at election time This book therefore also assesses the relative explanatory power of claims that voting behaviour has changed because of changes in society against claims that it responds to changes in the offerings of political parties And it is clear from the analyses reported in this book that contrary to the claims of much of the extant literature the latter argument appears better able to account for many of the patterns and changes in European voting behaviour and thus the book constitutes an important challenge to much current academic

orthodoxy This is the first book to provide a systematic comparison of the long term dynamics of the voting behaviour of individual voters across such a wide range of European countries taking into account the dynamics of the choices put before voters by the parties and for the first time relating this to the way voters behave Comparative Politics is a series for students and teachers of political science that deals with contemporary issues in comparative government and politics The General Editors are Max Kaase Professor of Political Science Vice President and Dean School of Humanities and Social Science International University Bremen and Kenneth Newton Professor of Comparative Politics University of Southampton The series is published in association with the European Consortium for Political Research
