Towards Africa's Renewal Jeggan C. Senghor, Nana.K. Poku, 2017-11-22 Africa still finds itself in the clutches of poverty and underdevelopment The expected benefits from economic restructuring have not been realized and the debt burden continues to weigh heavily on African economies constraining the possibilities of growth Problems that have existed since the 1960s remain and links with the global economy continue to increase but fall short of requirements Against this background it is not surprising that the vast majority of African states will not meet the Millennium Development Goals The search for political systems that can deliver development have been categorized by cynics as old wine in old bottles with new stickers As the dividends from globalization elude Africa in the 21st century it becomes clear that it is a series of failed states rogue states and even stateless states This volume brings together leading researchers and analysts to examine issues and identify policy options which can lead to renewal in Africa It provides an opportunity to reflect and offers a critical multidisciplinary appraisal of the future challenges facing Africa

Knowledge Matters Diana Rhoten, Craig Calhoun, 2011-02-22 Universities Are Changing Around The World In China and Africa there is massive expansion while many of America's

greatest public universities are experiencing major budget cuts In Latin America universities have been affected by dictatorships and privatization but are now growing in ways central to economic development In Europe universities built as state institutions are being told to raise more money from private sources and are being reorganized so they will compete better in global rankings In this context clarity about the public mission of universities is vital yet it is lacking both outside and inside academia When universities educate students is this simply a private benefit because it advances their careers Or is it a public good because informed citizens are integral to democracy and essential for national economic development How important is equal opportunity What are the effects of hierarchy Who pays now and who will pay tomorrow Should the results of academic research be private property for sale or openly available for public use Who sets the university research agendas What kinds of scholarship flourish and what kinds suffer Should producing competitive research take priority over educating competent students Do international rankings distort these and other university priorities or provide needed objective assessments What are the university's roles and responsibilities in terms of knowledge creation and dissemination today And tomorrow In this collection scholars report from Asia Africa Europe Latin America and North America They confront the realities and challenges of higher education as it is torn between multiple public and private agendas This comparative perspective illuminates both the continuing importance of the university's public mission and the pressing need to clarify it
