Apocalypse Yesterday Brock Adams,2020-09-08 With his best and craziest days behind him a Florida call center employee struggles through mind numbing drudgery day after day but he just might have a way to reclaim the madness and his former life The zombie apocalypse is over The humans have won Life is back to normal And Rip is bored as hell It's not much of a life sitting in a call center in the poor town of Spanish Shanty Florida answering emails like a drone and listening to customer complaints Rip was ruler of a tiny kingdom in the Lazy River waterpark killing zombies by day and making passionate love at night He misses the danger the camaraderie and the blistering love he once knew He longs to feel Santana his trusty machete in his hand and Davia the fiercest woman alive in his arms once again He can still picture it life on the razor's edge and he would do anything to get that feeling back But what if Rip could get it back He's totally desperate Not normal desperate more like ready to restart the apocalypse desperate Condemning humanity to a repeat merely for an adrenaline rush is probably not a good idea But life at the call center is nothing more than a slow death and Rip might not be able to go on without trying to find out **Apocalypse 2012** Lawrence E. Joseph,2007-01-23 Updated to include dramatic new evidence from NASA and the National Academy of Sciences pointing to a knockout of the electrical power grid by solar systems expected to climax in 2012 2013 Don't look up It won't help You can't get out of the way you can't dig a hole deep enough to hide The end is coming and there's nothing you can do about it So why read this book Because you can't look away when not just the religious fanatics are saying we're all going to be destroyed but the scientists are in on the act too Here's what they're saying We're a million years over due for a mass extinction The sun at radiation minimum is acting much worse than at solar maximum and one misdirected spewing of plasma could fry us in an instant The magnetic field which shields us from harmful radiation is developing a mysterious crack Our solar system is entering an energetically hostile part of the galaxy The Yellowstone supervolcano is getting ready to blow and if it does we can look forward to nuclear winter and 90 percent annihilation The Maya the world's greatest timekeepers ever say it's all going to stop on December 21 2012 So see There's nothing you can do but you might as well sit back and enjoy the show You'll get a good chuckle That's why you
