Race And The Writing Of History Riddling The Sphinx:

Race and the Writing of History Maghan Keita, 2000 Despite increased interest in recent years in the role of race in Western culture scholars have neglected much of the body of work produced in the nineteenth and twentieth centuries by black intellectuals For example while DuBois thoughts about Africa may be familiar to contemporary academics those of his important precursors and contemporaries are not widely known Similarly although contemporary figures such as Martin Bernal Molefi Assante and other Afrocentrists are the subject of heated debate such debates are rarely illuminated by an awareness of the traditions that preceded them Race and The Writing of History redresses this imbalance using Bernal s Black Athena and its critics as an introduction to the historical inquiries of African American intellectuals and many of their African counterparts Keita examines the controversial legacy of writing history in America and offers a new perspective on the challenge of building new historiographies and epistemologies As a result this book sheds new light on how ideas about race and racism have shaped the stories we tell about ourselves Race and the Writing of History Maghan Keita, 2000-11-30 Despite increased interest in recent years in the role of race in Western culture scholars have neglected much of the body of work produced in the nineteenth and twentieth centuries by black intellectuals For example while DuBois thoughts about Africa may be familiar to contemporary academics those of his important precursors and contemporaries are not widely known Similarly although contemporary figures such as Martin Bernal Molefi Assante and other Afrocentrists are the subject of heated debate such debates are rarely illuminated by an awareness of the traditions that preceded them Race and The Writing of History redresses this imbalance using Bernal's Black Athena and its critics as an introduction to the historical inquiries of African American intellectuals and many of their African counterparts Keita examines the controversial legacy of writing history in America and offers a new perspective on the challenge of building new historiographies and epistemologies As a result this book sheds new light on how ideas about race and racism have shaped the stories we tell about ourselves Black Christology and the Quest for Authenticity John H. McClendon III,2019-05-03 Black Christology and the Quest for Authenticity A Philosophical Appraisal constitutes a philosophical inquiry on Black Theology and its attendant Black Christology Explicitly the philosophical examination of Black Theology conceptually maps its quest for establishing Black Christology as an authentic form within Christian theology This text critically expounds on the methodologies and arguments which guide how Black Theology specifically affirms Black Christology as the definitive paradigm for authentic Christianity Significantly the racialized character of Black Theology immediately sets this discourse within the context of philosophy of race Clearly the philosophy of race in terms of its substance and scope is continually expanding Notably the philosophy of religion in its conceptual association with the African American experience considerably enriches the content of the philosophy of race Therefore Black Christology and the Quest for Authenticity A Philosophical Appraisal stands as a unique contribution to philosophy of race Summarily while this book

tackles the formidable problem of Christian theological subject matter nonetheless the reader must be aware that this is not a work executed methodologically in any theological manner inclusive of Christian theology Subsequently while the object of our investigation substantively remains theological in character the method of investigation is guided by philosophical inquiry which is based on secular principles Furthermore although most mainstream works in philosophy of religion along with theology neglect to exam African American theologians and philosophers the subject matter of Black Christology substantially facilitates in filling this intellectual void Suburban Erasure Walter Greason, 2013 For generations historians believed that the study of the African American experience centered on the questions about the processes and consequences of enslavement Even after this phase passed the modern Civil Rights Movement took center stage and filled hundreds of pages creating a new framework for understanding both the history of the United States and of the world Suburban Erasure by Walter David Greason contributes to the most recent developments in historical writing by recovering dozens of previously undiscovered works about the African American experience in New Jersey More importantly his interpretation of these documents complicates the traditional understandings about the Great Migration civil rights activism and the transformation of the United States as a global economic superpower Greason details the voices of black men and women whose vision and sacrifices made the dream of Dr Martin Luther King Ir possible Then in the second half of this study the limitations of this dream of integration become clear as New Jersey a state that took the lead in showing American how to overcome the racism of the past fell victim to a recurring pattern of colorblindness that entrenched the legacy of racial inequality in the consumer economy of the late twentieth century Suburbanization simultaneously erased the physical architecture of rural segregation in New Jersey and ideologically obscured the deepening persistent injustices that became the War on Drugs and the prison industrial complex His solution for the twenty first century involves the most fundamental effort to racially integrate state and local government conceived since the Reconstruction Era Suburban Erasure is a must read for people concerned with democracy human rights and the future of civil society **Navigating World History** P. Manning, 2003-05-15 World history has expanded dramatically in recent years primarily as a teaching field and increasingly as a research field Growing numbers of teachers and Ph Ds in history are required to teach the subject They must be current on topics from human evolution to industrial development in Song dynasty China to today s disease patterns and then link these disparate topics into a coherent course Numerous textbooks in print and in preparation summarize the field of world history at an introductory level But good teaching also requires advanced training for teachers and access to a stream of new research from scholars trained as world historians In this book Patrick Manning provides the first comprehensive overview of the academic field of world history He reviews patterns of research and debate and proposes guidelines for study by teachers and by researchers in world history The Smell of Slavery Andrew Kettler, 2020-05-28 Slavery capitalism and colonialism were understood as racially justified through false olfactory perceptions of African bodies throughout the Atlantic World

A Historical Guide to Mark Twain Shelley Fisher Fishkin, 2002 Mark Twain is still one of the most enduring and beloved of America's great writers In this guide to Twain his life and times and the historical context in which he operated Shelley Fisher Fishkin assembles original essays by leading scholars that describe and define the man Countrymen Onyeka Nubia, 2019-06-15 The Tudor period remains a source of timeless fascination with endless novels TV programmes and films depicting the period in myriad ways And yet our image of the Tudor era remains overwhelmingly white This ground breaking and provocative new book seeks to redress the balance revealing not only how black presence in Tudor England was far greater than has previously been recognised but that Tudor conceptions of race were far more complex than we have been led to believe Onyeka Nubia's original research shows that Tudors from many walks of life regularly interacted with people of African descent both at home and abroad revealing a genuine pragmatism towards race and acceptance of difference Nubia also rejects the influence of the Curse of Ham myth on Tudor thinking persuasively arguing that many of the ideas associated with modern racism are in fact relatively recent developments England's Other Countrymen is a bravura and eloquent forgotten history of diversity and cultural exchange and casts a new light on our own Race, Culture, and the Intellectuals, 1940-1970 Richard H. King, 2004-08-17 To study this attitudes towards race transition from universalism to cultural particularism Richard King focuses on the arguments of major thinkers movements and traditions of thought attempting to construct a map of the ideological positions that were staked out and an intellectual history of this transition What Is Global History? Sebastian Conrad, 2017-08-29 The first comprehensive overview of the innovative new discipline of global history Until very recently historians have looked at the past with the tools of the nineteenth century But globalization has fundamentally altered our ways of knowing and it is no longer possible to study nations in isolation or to understand world history as emanating from the West This book reveals why the discipline of global history has emerged as the most dynamic and innovative field in history one that takes the connectedness of the world as its point of departure and that poses a fundamental challenge to the premises and methods of history as we know it What Is Global History provides a comprehensive overview of this exciting new approach to history The book addresses some of the biggest questions the discipline will face in the twenty first century How does global history differ from other interpretations of world history How do we write a global history that is not Eurocentric yet does not fall into the trap of creating new centrisms How can historians compare different societies and establish compatibility across space What are the politics of global history This in depth and accessible book also explores the limits of the new paradigm and even its dangers the question of whom global history should be written for and much more Written by a leading expert in the field What Is Global History shows how by understanding the world's past as an integrated whole historians can remap the terrain of their

discipline for our globalized present African Americans and the Classics Margaret Malamud, 2016-10-16 A new wave of research in black classicism has emerged in the 21st century that explores the role played by the classics in the larger cultural traditions of black America Africa and the Caribbean Addressing a gap in this scholarship Margaret Malamud investigates why and how advocates for abolition and black civil rights both black and white deployed their knowledge of classical literature and history in their struggle for black liberty and equality in the United States African Americans boldly staked their own claims to the classical world they deployed texts ideas and images of ancient Greece Rome and Egypt in order to establish their authority in debates about slavery race politics and education A central argument of this book is that knowledge and deployment of Classics was a powerful weapon and tool for resistance as improbable as that might seem now when wielded by black and white activists committed to the abolition of slavery and the end of the social and economic oppression of free blacks The book significantly expands our understanding of both black history and classical reception in Re-Membering History in Student and Teacher Learning Joyce E. King, Ellen E. Swartz, 2014-03-05 What kind of social studies knowledge can stimulate a critical and ethical dialog with the past and present Re Membering History in Student and Teacher Learning answers this question by explaining and illustrating a process of historical recovery that merges Afrocentric theory and principles of culturally informed curricular practice to reconnect multiple knowledge bases and experiences In the case studies presented K 12 practitioners teacher educators preservice teachers and parents use this praxis to produce and then study the use of democratized student texts they step outside of reproducing standard school experiences to engage in conscious inquiry about their shared present as a continuance of a shared past This volume exemplifies not only why instructional materials including most so called multicultural materials obstruct democratized knowledge but also takes the next step to construct and then study how re membered student texts can be used Case study findings reveal improved student outcomes enhanced relationships between teachers and families and teachers and students and a closer connection for children and adults to their heritage From Du Bois to Obama Charles Pete Banner-Haley, 2010-06-16 In his groundbreaking new book Charles Pete Banner Haley explores the history of African American intellectualism and reveals the efforts of black intellectuals in the ongoing struggle against racism showing how they have responded to Jim Crow segregation violence against black Americans and the more subtle racism of the postintegration age Banner Haley asserts that African American intellectuals including academicians social critics activists and writers serve to generate debate policy and change acting as a moral force to persuade Americans to acknowledge their history of slavery and racism become more inclusive and accepting of humanity and take responsibility for social justice Other topics addressed in this insightful study include the disconnection over time between black intellectuals and the masses for which they speak the ways African American intellectuals identify themselves in relation to the larger black community America as a whole and the rest of the world how black intellectuals have gained legitimacy in American society

and have accrued moral capital especially in the area of civil rights and how that moral capital has been expended Among the influential figures covered in the book are W E B Du Bois Ralph Ellison Richard Wright James Weldon Johnson E Franklin Frazier Ralph Bunche Oliver C Cox George S Schuyler Zora Neale Hurston Martin Luther King Jr Jesse Jackson Cornel West Toni Morrison bell hooks Charles Johnson and Barack Obama African American intellectuals as Banner Haley makes clear run the political gamut from liberal to conservative He discusses the emergence of black conservatism with its accompanying questions about affirmative action government intervention on behalf of African Americans and the notion of a color blind society He also looks at how popular music particularly rap and hip hop television movies cartoons and other media have functioned as arenas for investigating questions of identity exploring whether African American intellectuals can also be authentically black A concluding discussion of the so called browning of America and the subsequent rise in visibility and influence of black intellectuals culminates with the historic election of President Barack Obama an African American intellectual who has made significant contributions to American society through his books articles and speeches Banner Haley ponders what Obama's election will mean for the future of race relations and black intellectualism in America
