Race Intelligence:

Race in Mind A. Alland, 2002-10-18 The notion that intelligence is somehow related to race is a notoriously tenacious issue in America Anthropologist Alexander Alland provides the most comprehensive overview of the recent history of research on race and IQ offering critiques of the biological determinism of Carlton Coon Arthur Jensen Cyril Burt Robert Ardrey Konrad Lorenz William Shockley Michael Levin and others This reasoned authoritative history also explains the basis of evolutionary genetics for the general reader concluding that biologically race cannot explain human variation Written in a lively conversational style Alland imparts real substantive scientific arguments cuts through the ideological posturing and jargon that so often characterizes discussions about race and shows us a more nuanced and scientifically valid way to understand the diversity that is the human condition

Race and Intelligence Jefferson M. Fish, 2013-05-13 In recent years reported racial disparities in IQ scores have been the subject of raging debates in the behavioral and social sciences and education What can be made of these test results in the context of current scientific knowledge about human evolution and cognition Unfortunately discussion of these issues has tended to generate more heat than light Now the distinguished authors of this book offer powerful new illumination Representing a range of disciplines psychology anthropology biology economics history philosophy sociology and statistics the authors review the concept of race and then the concept of intelligence Presenting a wide range of findings they put the experience of the United States so frequently the only focus of attention in global perspective They also show that the human species has no races in the biological sense though cultures have a variety of folk concepts of race that there is no single form of intelligence and that formal education helps individuals to develop a variety of cognitive abilities *Race and Intelligence* offers the most comprehensive and definitive response thus far to claims of innate differences in intelligence among races
