The Race to Fashoda David L. The Race to Fashoda David L. Lewis, 1989-01-01 The Race to Fashoda David L. Lewis, 1987 *Muslim Interpreters in Colonial Senegal, 1850-1920* Tamba M'bayo, 2016-07-01 This book investigates the lives and careers of Muslim African interpreters employed by the French colonial administration in Saint Louis Senegal from the 1850s to the early 1920s It focuses on the lower and middle Senegal River valley in northern Senegal where the French concentrated most of their activities in West Africa during the nineteenth century The Muslim interpreters performed multiple roles as mediators military and expeditionary guides emissaries diplomatic hosts and treaty negotiators As cultural and political powerbrokers that straddled the colonial divide they were indispensable for French officials in their relations with African rulers and the local population As such a central concern of this book is the paradoxical and often contradictory roles the interpreters played in mediating between the French and Africans This book argues that the Muslim interpreters exemplified a paradox while serving the French administration they pursued their own interests and defended those of their local communities In doing so the interpreters strove to maintain some degree of autonomy Moreover this book contends that the interpreters occupied a vantage position as mediators to influence the construction of colonial discourse and knowledge because they channeled the flow of information between the French and the African population Thus Muslim interpreters had the capacity to shape power relations between the colonizers and the colonized in Senegal

The Oxford History of the British Empire: Volume III: The Nineteenth Century Andrew Porter, 2001-07-26 The Oxford History of the British Empire is a major new assessment of the Empire in the light of recent scholarship and the progressive opening of historical records From the founding of colonies in North America and the West Indies in the seventeenth century to the reversion of Hong Kong to China at the end of the twentieth British imperialism was a catalyst for far reaching change The Oxford History of the British Empire as a comprehensive study helps us to understand the end of Empire in relation to its beginning the meaning of British imperialism for the ruled as well as for the rulers and the significance of the British Empire as a theme in world history Volume III of The Oxford History of the British Empire covers the long nineteenth century from the achievement of American independence in the 1780s to the eve of world war in 1914 This was the period of Britain's greatest expansion as both empire builder and dominant world power The volume is divided into two parts The first contains thematic chapters some focusing on Britain others on areas at the imperial periphery exploring those fundamental dynamics of British expansion which made imperial influence and rule possible They also examine the economic cultural and institutional frameworks which gave shape to Britain's overseas empire Part 2 is devoted to the principal areas of imperial activity overseas including both white settler and tropical colonies Chapters

The Acquisition of Africa (1870-1914) Mieke van der Linden, 2016-10-05 Over recent decades the responsibility for the past actions of the European colonial powers in relation to their former colonies has been subject to a lively debate In this book the question of the responsibility under international law of former colonial States is addressed Such a legal responsibility would presuppose the violation of the international law that was applicable at the time of colonization In the Scramble for Africa during the Age of New Imperialism 1870 1914 European States and non State actors mainly used cession and protectorate treaties to acquire territorial sovereignty imperium and property rights over land dominium The question is raised whether Europeans did or did not on a systematic scale breach these treaties in the context of the acquisition of territory and the expansion of empire mainly through extending sovereignty rights and subsequently intervening in the internal affairs of African political entities

Encyclopedia of the Age of Imperialism, 1800-1914 Carl C. Hodge, 2007-11-30 In 1800 Europeans governed about one third of the world s land surface by the start of World War I in 1914 Europeans had imposed some form of political or economic ascendancy on over 80 percent of the globe The basic structure of global and European politics in the twentieth century was fashioned in the previous century out of the clash of competing imperial interests and the effects both beneficial and harmful of the imperial powers on the societies they dominated This encyclopedia offers current detailed information on the major world powers and their global empires as well as on the people events ideas and movements both European and non European that shaped the Age of Imperialism

In Search of Brightest Africa Jeannette Eileen Jones, 2011-11-01 In the decades between the Berlin Conference that partitioned Africa and the opening of the African Hall at the American Museum of Natural History Americans in several fields and from many backgrounds argued that Africa had something to teach them Jeannette Eileen Jones traces the history of the idea of Africa with an eye to recovering the emergence of a belief in Brightest Africa a tradition that runs through American cultural and intellectual history with equal force to its Dark Continent counterpart Jones skillfully weaves disparate strands of turn of the century society and culture to expose a vivid trend of cultural engagement that involved both critique and activism Filmmakers spoke out against the depiction of savage Africa in the mass media while also initiating a countertradition of ethnographic documentaries Early environmentalists celebrated Africa as a pristine continent while lamenting that its unsullied landscape was vanishing New Negro political thinkers also wanted to save Africa but saw its fragility in terms of imperiled human promise Jones illuminates both the optimism about Africa underlying these concerns and the racist and colonial interests these agents often nevertheless served The book contributes to a growing literature on

the ongoing role of global exchange in shaping the African American experience as well as debates about the cultural place of Africa in American thought

China Goes to Sea Andrew S. Erickson, Lyle J Goldstein, Carnes Lord, 2009-07-01 In modern history China has been primarily a land power dominating smaller states along its massive continental flanks But China's turn toward the sea is now very much a reality as evident in its stunning rise in global shipbuilding markets its vast and expanding merchant marine the wide offshore reach of its energy and minerals exploration companies its growing fishing fleet and indeed its increasingly modern navy Yet for all these achievements there is still profound skepticism regarding China's potential as a genuine maritime power Beijing must still import the most vital subcomponents for its shipyards maritime governance remains severely bureaucratically challenged and the navy evinces at least as of yet little enthusiasm for significant blue water power projection capabilities This volume provides a truly comprehensive assessment of prospects for China's maritime development by situating these important geostrategic phenomena within a larger world historical context China is hardly the only land power in history to attempt transformation by fostering sea power Many continental powers have elected or been impelled to transform themselves into significant maritime powers in order to safeguard their strategic position or advance their interests We examine cases of attempted transformation from the Persian Empire to the Soviet Union and determine the reasons for their success or failure Too many works on China view the nation in isolation Of course China's history and culture are to some extent exceptional but building intellectual fences actually hinders the effort to understand China's current development trajectory Without underestimating the enduring pull of China's past as it relates to threats to the country's internal stability and its landward borders this comparative study provides reason to believe that China has turned the corner on a genuine maritime transformation If that proves indeed to be the case it would be a remarkable if not singular event in the history of the last two millennia

Burton,2015 A short idea driven history of resistance to the British empire written by a senior British historian **Historical Dictionary of the British Empire** Kenneth J. Panton,2015-05-07 For much of the nineteenth and early twentieth centuries Britain was the dominant world power its strength based in large part on its

command of an Empire that in the years immediately after World War I encompassed almost one quarter of the earth's land surface and one fifth of its population. Writers boasted that the sun never set on British possessions which provided raw materials that processed in British factories could be re-exported as manufactured products to expanding colonial markets. The commercial and political might was not based on any grand strategic plan of territorial acquisition; however, the Empire grew piecemeal, shaped by the diplomatic, economic, and military circumstances of the times, and its speedy dismemberment in the mid-twentieth century was similarly a reaction to the realities of geopolitics in post-World War II conditions. Today the Empire has gone, but it has left a legacy that remains of great significance in the modern world.

The *Historical Dictionary of the British Empire* covers its history through a chronology, an introductory essay, appendixes, and an extensive bibliography. The dictionary section has over 700 cross-referenced entries on important personalities, politics, economy, foreign relations, religion, and culture. This book is an excellent access point for students, researchers, and anyone wanting to know more about Britain.

Archives of Empire Mia Carter, Barbara Harlow, 2003. A collection of original writings and documents from British colonialism in Africa.

Archives of Empire Barbara Harlow, Mia Carter, 2003-12-31. A rich collection of primary materials; the multivolume *Archives of Empire* provides a documentary history of nineteenth-century British imperialism from the Indian subcontinent to the Suez Canal to southernmost Africa. Barbara Harlow and Mia Carter have carefully selected a diverse range of texts that track the debates over imperialism in the ranks of the military, the corridors of political power, the lobbies of missionary organizations, the halls of royal geographic and ethnographic societies, the boardrooms of trading companies, the editorial offices of major newspapers, and far-flung parts of the empire itself. Focusing on a particular region and historical period, each volume in *Archives of Empire* is organized into sections preceded by brief introductions. Documents including mercantile company charters, parliamentary records, explorers' accounts, and political cartoons are complemented by timelines, maps, and bibliographies. Unique resources for teachers and students, these volumes reveal the complexities of nineteenth-century colonialism and emphasize its enduring relevance to the global markets of the twenty-first century.

While focusing on the expansion of the British Empire, *The Scramble for Africa* illuminates the intense nineteenth-century contest among European nations over Africa's land, people, and resources. Highlighting the 1885 Berlin Conference in which Britain, France, Germany, Portugal, and Italy partitioned Africa among themselves, this collection follows British conflicts with other nations over different regions as well as its eventual challenge to Leopold of Belgium's rule of the Congo. The reports, speeches, treatises, proclamations, letters, and cartoons assembled here include works by Henry M. Stanley, David Livingstone, Joseph Conrad, G. W. F. Hegel, Winston Churchill, Charles Darwin, and Arthur Conan Doyle. A number of pieces highlight the proliferation of companies chartered to pursue Africa's gold, diamonds, and oil, particularly Cecil J. Rhodes's British South Africa Company and Frederick Lugard's Royal Niger Company. Other documents describe debacles on the continent, such as the defeat of General Gordon in Khartoum and the Anglo-Boer War, and the criticism of imperial maneuvers.
