Race To Oblivion:

Race to Oblivion Herbert Frank York,1971 **Bulletin of the Atomic Scientists** ,1983-08 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world Race to oblivion Herbert York,1970 **Race to oblivion** J. E. York,1970 *The Missile Defense Controversy* Ernest Yanarella,2010-09-12 This revised and updated edition identifies the cultural factors and specific administrative agendas that have shaped the way we view ballistic missile technology Three new sections connect our recent sudden shifts in foreign policy to ongoing historical patterns Whether cautioning against the almost neurotic pursuit of absolute security or examining the powerful influence of religion on military buildup Ernest J Yanarella uncovers the deeply ingrained attitudes that will determine the future of American missile defense Apocalyptic Projections Annette M. Magid,2015-06-18 Apocalyptic Projections have been pondered since Biblical times Theories abounded in an attempt to prepare for calamity and plan for the future Worldwide concern regarding a twenty first century apocalypse related to the 2012 Mayan Apocalyptic prediction sparked renewed interest Even though the concept of apocalypse evokes images of total oblivion threads of possibility and redemption offer a potential fabric of hope The majority of the papers included in Apocalyptic Projections were p **The Ice Age Challenge** Rolf A. F. Witzsche,2005-03-01 The Ice Age Challenge refers to the challenge that we face globally to create a new foundation for living when the coming Ice Age climate shuts down most of the world s agriculture possibly 100 to 150 years from now The novel is the first part of the second episode of the series The Lodging for the Rose an eight part science fantasy centered on universal love by Rolf A F Witzsche We truly are in a race against time the greatest race since the dawn of man racing to create the technologies economies finances politics and social cultures that enable us to shift agriculture into efficient indoor facilities in order to protect our food production in the coming Ice Age environment The Earth has been in an Ice Age for 1 8 million years interspersed by the occasional warm period like the present one that is ending in spite of global warming The necessary infrastructures for survival are technologically feasible but will we empower ourselves to create them That appears to be less certain It seems that we have been put in race without the skills for it But then don t we have the potential to be fast learners In the course of exploring the question the novel touches on the collapse of the Soviet Union the Aryan invasion in historic India the face of Islam the fascist holocaust depopulation global warming nuclear fusion power indoors agriculture and principles of marriage sex culture and science Military Technology, Armaments Dynamics and Disarmament Hans Gunter Brauch,1989-01-13 **A Shuddering Dawn** Ira Chernus,Edward T. Linenthal,1989-08-17 Exploring the symbolic meanings of the Bomb this book excavates the depth dimension of the nuclear age Rather than adding to the many ethical commentaries asking whether or not there should be nuclear weapons the authors ask why there are nuclear weapons and a continuing arms race They also address the kinds of symbolic changes that must occur in order to

reverse the build up of nuclear weapons The authors approach these questions from the perspective of academic research not from particular faith commitments asking the reader to envision different human responses to this technology human stances that can be illuminated by the creative insight of religious studies **My Avatar, My Self** Zach

Waggoner,2014-01-10 With videogames now one of the world s most popular diversions the virtual world has increasing psychological influence on real world players This book examines the relationships between virtual and non virtual identity in visual role playing games Utilizing James Gee s theoretical constructs of real world identity virtual world identity and projective identity this research shows dynamic varying and complex relationships between the virtual avatar and the player s sense of self and makes recommendations of terminology for future identity researchers **Great Power Security**

Cooperation David W. Kearn,2014-12-18 This book explains the conditions under which great powers are likely to cooperate to improve their security by engaging in qualitative arms control In agreeing to limit or proscribe certain classes of weapons states will constrain their military capabilities and therefore decrease the threat they pose to potential adversaries Focusing on the expected military impact of technological change and the capacity of states to confidently monitor the activities of its negotiating partners it may be possible to forge lasting agreements that improves the security of the participating states However at other times the nature technological change may force states to engage in competitive behavior precluding cooperation and increasing the probability of conflict Examining a diverse set of cases including the Washington Naval Conference The World Disarmament Conference at Geneva the Baruch Plan for the International Control of Atomic Energy and the SALT I Accords including the ABM Treaty this volume presents a persuasive comprehensive and interesting contribution to the literature on arms racing and arms control and should be of interest to students of international relations theory and security studies By presenting a theoretical informed model that explicitly links the security strategies of states to their choices about development and deployment of new weapons and consequently their willingness to engage in arms control cooperation this book provides an important refinement upon existing theoretical and historical approaches

Bulletin of the Atomic Scientists ,1983-08 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world **Counsels of War** Gregg Herken,2015-02-18 Since the first atomic bomb was exploded in 1945 a close community of civilian experts including scientists academics and think tank

intellectuals has advised the American government on the prospects of nuclear war Based on interviews with these experts as well as hundreds of pages of recently declassified documents *Counsels of War* is the first book to trace in detail the deliberations and shifting recommendations of the experts on the bomb from Hiroshima to Star Wars Gregg Herken writes about the people whose profession it has been to think about the unthinkable Robert McNamara Paul Nitze Herman Kahn Bernard Brodie including their intense rivalries personal animosities and often contentious relationship with the professional military He reveals how the influence of the scientist and strategist has extended well beyond the laboratory and the classroom in the proposal of Kennedy s advisers for a nuclear demonstration and even a clever first strike against the Russians for example *Counsels of War* also shatters certain popular assumptions about U S nuclear policy As Herken points out while American doctrine stresses retaliation U S strategists have always planned to pre-empt a Soviet attack Herken shows that the lines in the current nuclear debate were actually drawn at the dawn of the atomic age and that the experts technically abstruse arguments have only served to hide from the public the fundamental deeply held and quite subjective differences at the heart of the debate Since Hiroshima there has been a growing awareness of the peril created by nuclear weapons yet the crucial questions that were never adequately addressed in 1945 unanswered today Given the inability of the experts to confront the essential dilemma of the nuclear age *Counsels of War* calls for a new nuclear debate one focused on American rather than Soviet intentions and that seeks an answer to the fundamental yet still unresolved question What are these weapons for

Bulletin of the Atomic Scientists, 1983-08 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world *Oblivion's Cloak* Dylan McFadyen, 2022-12-03 First Lieutenant Shaara was dead this morning Her captain is furious at her She wasted company resources getting herself killed and it s coming out of her paycheck Now she s sitting across from the first other human being she s seen in six years His name is Adnan He claims to come from Earth but that s impossible Earth died a long time ago If Adnan s telling the truth he and the decaying ship the captain pulled him off are nearly a thousand years old Wherever he s from he s Shaara s responsibility now Which is the last thing she needs But it s either that or the captain sells Adnan into slavery Shaara knows what that would mean Most humans do And something inside her won t let her abandon Adnan to it revenant memories stabbed awake by the look in his eyes Facing those memories won t be easy It d be far easier to ignore the feeling driving her forward Far easier to let it all go to hell and drift back to sleep Until a shadowy new faction starts stoking the fires of war They re looking for Adnan Earth s last survivor holds the key to unleash a terrible indiscriminate vengeance on the galaxy that wronged them Who they are is a mystery to everyone but Shaara Hard as she s tried to forget she knows them all too well Which means she s the only one who can stop them The question is does she want to Maybe the galaxy s earned a little vengeance

Highway to Hell Scott Ritter, 2025-05-01 The world stands on the precipice of a

nuclear Armageddon the byproduct of a confluence of the demise of the foundational principles of arms control that had served as a check on the world's two largest nuclear armed nations the United States and Russia and the geopolitical consequences of a failing hegemon clashing with an emerging multipolar reality Nuclear weapons once codified as weapons of deterrence intended never to be used have morphed into weapons that have become integrated in the warfighting plans of the nuclear armed powers Deterrence is no longer in vogue warfighting and war winning are There will be no winner in a nuclear conflict Critical thinking about the dangers posed by nuclear weapons the necessity of arms control and the consequences of nuclear war has never been more urgently needed Highway to Hell The Armageddon Chronicles 2015 2024 affords the reader a comprehensive insight into these critical issues as they were unfolding free of the circumspection and narrative management of conventional histories Scott Ritter has been sounding the alarm about the dangerous path the world is headed down for some time now his book Scorpion King America's Suicidal Embrace of Nuclear Weapons from FDR to Trump serves as a stark warning about the inherent dangers posed by nuclear weapons and the policies that sustain them Another book Disarmament in the Time of Perestroika Arms Control and the End of the Soviet Union brings to life the important potential of arms control agreements in bringing the threat posed by nuclear weapons to heel by detailing his own personal experiences from 1988 1990 as a weapons inspector in the successful implementation of the INF arms control treaty with the Soviet Union Highway to Hell offers some of Scott Ritter's best writing and analysis on the danger of nuclear weapons and the need for arms control culled from dozens of articles he wrote from 2015 to 2024 on the arms race the death of arms control the nuclear role of China Iran North Korea and Israel and the U S nuclear posture shift from deterrence to employment This is where we are today on the cusp of a nuclear conflict with Russia Humanity is no longer protected from nuclear war by the series of arms control treaties between the US and Russia This book awakens the reader to the existential danger nuclear weapons pose today and seeks to motivate them to do something about it

Scientists, Business, and the State, 1890-1960 Patrick Joseph McGrath, 2002-01-01 McGrath describes how between 1890 and 1960 scientific business and political leaders together forged a new definition of American democracy in which science and technology were presented to the public as crucial ingredients of the nation's progress prosperity and political stability Scientists even argued that the very act of expert collaboration whether in business or politics offered a model of ways to solve social problems and achieve political stability

Oblivion's Children Jim Wegryn, Roland James, 2001 Robots are merely machines until they escape the bounds of programming and reveal that spark called free will Yet that gift of consciousness may be only an illusion a facade of elaborate imitation Not even Turing's test can prove otherwise But there is a way they can show their soul If they were asked to help save humankind could they If so would they
