Global warming, pollution, and other issues have made the environment a topic of constant discussion these days. Many environmental concerns were treated by early American nature writers who recognized the beauty of the natural world in an age of commercial expansion. Some of the most famous writers of the 18th and 19th centuries wrote about nature, and their works are stylistic masterpieces. At a time when students are being encouraged to read and write about nonfiction, these masterworks of early American nature writing are all the more important.
