S. Commission on Civil Rights,2018-02-16 Excerpt from Racial Isolation in the Public Schools Vol 1 A Report of the U S Commission of Civil Rights Although we have made substantial progress in ending formal segregation of schools racial isolation in the schools persists both in the North and the South because of housing patterns School districting economic stratification and population movements It has become apparent that such isolation presents serious barriers to quality education The problems are more subtle and complex than those presented by segregation imposed by law The remedy may be difficult But as a first and vital step the Nation needs to know the facts About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works      **Racial Isolation in the Public Schools** United States Commission on Civil Rights,1967 V 1 Report v 2 Appendices      *Local Policies on Racial Isolation in the Public Schools* Maurice James Ross,Connecticut. Crain,1997-01-01 This important book takes the discussion of racial inequality in America beyond simplistic arguments of white racism and black victimization to a more complex conversation about the separate but unequal situation in many schools today Amy Stuart Wells and Robert Crain investigate the St Louis Missouri school desegregation plan a unique agreement that since 1983 has given black inner city students the right to choose to attend predominantly white suburban schools After five years of research and hundreds of interviews with policymakers administrators teachers students and parents Wells and Crain conclude that when school desegregation is examined from

these many perspectives more strengths than weaknesses emerge They call for a reexamination of now popular school choice policies across the country so that these policies may help to bring about more racial and social class integration Stepping over the Color Line intertwines data on student achievement and racial isolation with stories of the people who participated in the St Louis program The authors set these individuals within a broad historical and social context and demonstrate how important linkages between the past and present help explain why efforts to overcome racial inequality in St Louis and in the larger society are so difficult The authors do a superb job of explaining how this innovative program came about placing it in a broad context that takes it beyond its immediate and local implications The book is at times heartbreaking and at times uplifting Richard Zweigenhaft co author of Blacks in the White Establishment A Study of Race and Class in America

*Racial Isolation in the Public Schools* William R. Corlis, 1967      After Brown Charles T. Clotfelter, 2011-10-16 The United States Supreme Court's 1954 landmark decision Brown v Board of Education set into motion a process of desegregation that would eventually transform American public schools This book provides a comprehensive and up to date assessment of how Brown's most visible effect contact between students of different racial groups has changed over the fifty years since the decision Using both published and unpublished data on school enrollments from across the country Charles Clotfelter uses measures of interracial contact racial isolation and segregation to chronicle the changes He goes beyond previous studies by drawing on heretofore unanalyzed enrollment data covering the first decade after Brown calculating segregation for metropolitan areas rather than just school districts accounting for private schools presenting recent information on segregation within schools and measuring segregation in college enrollment Two main conclusions emerge First interracial contact in American schools and colleges increased markedly over the period with the most dramatic changes occurring in the previously segregated South Second despite this change four main factors prevented even larger increases white reluctance to accept racially mixed schools the multiplicity of options for avoiding such schools the willingness of local officials to accommodate the wishes of reluctant whites and the eventual loss of will on the part of those who had been the strongest protagonists in the push for desegregation Thus decreases in segregation within districts were partially offset by growing disparities between districts and by selected increases in private school enrollment      **Racial Isolation in the Public Schools a Report** Commission on Civil Rights (Estados Unidos), 1967      **Racial Segregation in the Public Schools** Reynolds Farley, Alma F.
