firsthand experience how sun power can transform lives and communities for the better He has traveled the globe bringing solar generated electricity to struggling communities throughout Asia Africa India and the developing world From isolated villages high in the mountains of Nepal to remote settlements in South Africa Williams has worked to bring sun power to even the most off the grid reaches of the planet He has brought that knowledge and experience back to America where he founded one of the country s fastest growing solar companies If millions of poor families in the Third World can get their power from the sun why can t Americans concerned with their rising power bills dependence on foreign oil and carbon footprints do the same The answer is that sun power is here it works and can light up a new era of economic and environmental security if we have the will to seize this historic opportunity This book is not about predictions or promises It s about what s happening now all over the world and what still needs to be done At the Publisher s request this title is being sold without Digital Rights Management Software DRM applied
